Oxford English for Careers is a series which prepares pre-work students for starting their career. Everything in each Student Book is vocation specific, which means students get the language, information, and skills they need to help them get a job in their chosen career.

Global Politics and the Power of Language OXFORD

Presenting the first exploration of Christopher Marlowe's complex place in the canon, this collection reads Marlowe's work against an extensive backdrop of

repertory, publication, transmission, and reception. Wide-ranging and thoughtful chapters consider Marlowe's deliberate engagements with the stage and print culture, the agents and methods involved in the transmission of his work, and his cultural reception in the light of repertory and print evidence. With contributions from major international scholars, the volume considers all of Marlowe's oeuvre, offering illuminating approaches to his extended animation in theatre and print, from the putative theatrical debut of Tamburlaine in 1587 to the most current editions of his work.

Commerce OXFORD

The Rise of English is a masterful account of the spread of English as the dominant lingua franca worldwide, its intimate connections with globalization and neoliberalism, and its effects on linguistic justice, opportunity, and identity. Deeply researched and wide-ranging in scope, this book shows how English has privileged some and disadvantaged others, but ultimately offers the promise of transcending cultural and linguistic borders in a multilingual world.

Libro OUP Oxford

The complete series will cover Commerce, Tourism, Nursing, and Technology at Pre-Intermediate and Intermediate levels.

Oxford English for Cambridge Primary Student OUP Oxford

Wartime is not just about military success. *Economists at War* tells a different story - about a group of remarkable economists who used their skills to help their countries fight their battles during the Chinese-Japanese War, Second World War, and the Cold War. 1935-55 was a time of conflict, confrontation, and destruction. It was also a time when the skills of economists were called upon to finance the military, to identify economic vulnerabilities, and to help reconstruction. *Economists at War: How a Handful of Economists Helped Win*

and *Lose the World Wars* focuses on the achievements of seven finance ministers, advisors, and central bankers from Japan, China, Germany, the UK, the USSR, and the US. It is a story of good and bad economic thinking, good and bad policy, and good and bad moral positions. The economists suffered threats, imprisonment, trial, and assassination. They all believed in the power of economics to make a difference, and their contributions had a significant impact on political outcomes and military ends. *Economists at War* shows the history of this turbulent period through a unique lens. It details the tension between civilian resources and military requirements; the desperate attempts to control economies wracked with inflation, depression, political argument, and fighting; and the clever schemes used to evade sanctions, develop barter trade, and use economic espionage. Politicians and generals cannot win wars if they do not have the resources. This book tells the human stories behind the economics of wartime. *Tourism* OXFORD University Press
Commerce 1 is a course for pre-work students studying commerce related

courses, who will need to communicate accurately in English at work. This resource is written for pre-work students, studying at pre-intermediate to intermediate level, who will need to use English in work situations. This resource helps develop the vocabulary, language, and skills that students need to communicate effectively in both formal and informal scenarios in the workplace. These include taking part in meetings, giving presentations, and socialising with colleagues. Each unit includes grammar tests and communication activities. A student book, teacher book and class CD is included in the set. Table of contents: * The business environment * The company * Travel * Sport * Sales * Cultural awareness * Trade fairs * Advertising * Fashion and style * Technology * Job satisfaction * Market research * Bright ideas * Dealing with people * Getting a job. *Teacher's Resource Book* Oxford University Press, USA

of-unit checklist with 'Can do' tick boxes Teaches English in context, so students practise the language and skills they need for the job in real work situations Real-world profiles from genuine professionals in the 'It's my job' section offer authentic and engaging insights into the industry Extra facts, figures, quotations, and specialist terminology included in the top margin of unit pages Additional activities and tests in the Teacher's Resource Book make the course suitable for mixed-ability classes The Teacher's Resource Book provides specialist background to the industry for every unit, as well as industry tips to support non-expert teachers Project work in the Student's Book, additional activities on the Student's Site, and a Key words list of essential vocabulary at the end of every unit provide extra opportunities for revision

Oxford English for Careers: Tourism 3: Student's Book OUP Oxford

This volume presents eighteen papers by leading Roman historians and archaeologists discussing trade in the Roman Empire during the period c.100 BC to AD 350. It focuses especially on the role of the Roman state in shaping the

institutional framework for trade within and outside the empire, in taxing that trade, and in intervening in the markets to ensure the supply of particular commodities, especially for the city of Rome and for the army. As part of a novel interdisciplinary approach to the subject, the chapters address its myriad facets on the basis of broadly different sources of evidence: historical, papyrological, and archaeological. They are grouped into three sections, covering institutional factors (taxation, legal structures, market regulation, financial institutions); evidence for long-distance trade within the empire in wood, stone, glass, and pottery; and trade beyond the frontiers, with the east (as far as China), India, Arabia, the Red Sea, and the Sahara. Rome's external trade with realms to the east emerges as being of particular significance, but it is in the eastern part of the empire itself where the state appears to have adapted the mechanisms of taxation in collaboration with the elite holders of wealth to support its need for revenue. On the other hand, the price of that collaboration, which was in effect a fiscal partnership, ultimately led in the longer term in slightly different

forms in the east and the west to a fundamental change in the political character of the empire.
