Please note: this book was written and published prior to Manning's identification as Chelsea. Beginning in early 2010, Chelsea Manning leaked an astounding amount of classified information to the whistleblower website WikiLeaks: classified combat videos as well as tens of thousands of documents from the war in Afghanistan, hundreds of thousands from Iraq, and hundreds of thousands more from embassies around the globe. Almost all of WikiLeaks's headline-making releases of information have come from one source, and one source only: Chelsea Manning. Manning's story is one of global significance, yet she remains an enigma. Now, for the first time, the full truth is told about a woman who, at the age of only twenty-two, changed the world. Though the overarching narrative in media reports on

Manning explain her leaks as motivated by the basest, most self-serving intentions, Private paints a far more nuanced, textured portrait of a woman haunted by demons and driven by hope, forced into an ethically fraught situation by a dysfunctional military bureaucracy. Relying on numerous conversations with those who know Manning best, this book displays how Manning's precocious intellect provided fertile ground for her sense of her own intellectual and moral superiority. It relates how a bright kid from middle America signed on to serve her country and found herself serving a cause far more sinister. And it explains what it takes for a person to betray her orders and fellow troops—and her own future—in order to fulfill what she sees as a higher purpose. Manning's court-martial may be the military trial of the decade, if not the century. This book is a must-read for anyone who wants to understand the woman behind it all.

The image of that world was so horrible to contemplate that both sides stepped away from that precipice and opted for peace. Fires of October is the exhilarating military history of the Cuban Missile Crisis exploring in detail the strategic plans implemented by American Armed Forces as they headed towards a catastrophic nuclear collision with Cuba and the USSR. Using recently declassified material, Blaine Pardoe systematically recounts the origins of the crisis, from the Berlin Crisis of 1961 and Cuba's military metamorphosis, to the internal disorganization of the US military, which exacerbated tensions between the USA, Cuba, and the USSR. Pardoe reveals that the invasion plans were based on old intelligence, outdated maps, and misconceptions about the size, strength, and composition of the Soviet forces in Cuba; for the first time, and with harrowing results, he scrutinizes the potential fallout had the invasion gone ahead. Gripping and unnerving, Fires of October shows us just how close the world came to nuclear war.

Xinjiang, China's far northwestern province where the majority of the population are Muslim Uyghurs, was for most of its history contested territory. On the Silk Road, a region of overlapping cultures, the province was virtually independent until the late nineteenth century, nominally part of the Qing Empire, with considerable interest taken in it by the British and the Russians as part of their Great Game rivalry in Asia. Ruled by warlords in the early twentieth century, it was occupied in 1949-50 by the People's Liberation Army, since when attempts have been made to integrate the province more fully into China. This book outlines the history of Xinjiang. It focuses on the key city of Kashgar, the symbolic heart of Uighur society, drawing on a large body of records in which ordinary people provided information on the period around the communist takeover. These records provide an exceptionally rich source, showing how ordinary Uyghurs lived their everyday lives before 1949 and how those lives were affected by the arrival of the Chinese Communist Party and its army. Subjects covered by the book include Eastern Turkestan independence, regional politics, local government, the military, taxation, education and the press.

Water Management Challenges in Global Change contains the

proceedings of the 9th Computing and Control for the Water Industry (CCWI2007) and the Sustainable Urban Water Management (SUWM2007) conferences. The rationale behind these conferences is to improve the management of urban water systems through the development of computerbased methods. Issues such as economic globalisation, climate changes and water shortages call for a new approach to water systems management, which addresses the relevant technical, social and economic aspects. This collection represents the views of academic and industrial experts from a number of countries, who provide technical solutions to current water management problems and present a vision for addressing the global questions. The themes underlying many of the contributions include energy and material savings, water savings and the integration of different aspects of water management. The papers are grouped into three themes covering water distribution systems, sustainable urban water management and modelling of wastewater treatment plants. The water distribution topics cover asset and information management, planning, monitoring and control, hydraulic modelling of steady state and transients, water quality and treatment, demand and leakage management, optimisation, design and decision support systems, as well as reliability and security of water distribution systems. The sustainable urban water management topics include urban drainage systems, water reuse, social aspects of water management and also selected facets of water resources and irrigation. Computer control of wastewater treatment plants has been seen as less advanced than that of clean water systems. To address this imbalance, this book presents a number of modelling techniques developed specifically for these plants. Water Management Challenges in Global Change will prove to be invaluable to water and environmental engineering researchers and academics; managers, engineers and planners; and postgraduate students.

Leo Fisch is a young man with a brilliant future ahead of him. He is bright, sociable and on the verge of moving in with his beautiful girlfriend, Kathryn. Outwardly, at least, he seems happy. Then when a sinister discovery is made in a forest near Leo's home town, a figure from childhood re-enters his life. David Caldwell is tough and aggressive; the very opposite of the company Leo now keeps. Unlikely friends, they are bound by a shared summer - and a shared secret - they had promised to forget. As past and present begin to close in, the comfortable life Leo has created for himself starts to unravel. Their terrible truth begins to emerge and Leo must confront not only the awkward, fragile boy he once was, but the events of that summer which threaten to destroy them both.
