A 13-point manifesto for a new financial services marketing model Anthony Thomson knows a thing or two about new and disruptive financial services, having co-founded and chaired first the ground-breaking Metro Bank and then the purely digital, app-based Atom Bank. And as a financial services marketing specialist for over 30 years, Lucian Camp has helped develop more new and innovative financial services propositions than anyone. Now they've put their heads together to write No Small Change, a passionate, opinionated and practical manifesto arguing that the fast-changing financial

services world urgently needs to rethink the whole of its approach to marketing. Most of all, they propose that an increasingly digital, fintech-driven industry needs not just more marketing, but also better marketing to make sure it's successfully identifying consumers' real needs, and finding powerful and successful ways to engage with them. After detailing the forces of change that demand a new approach, the book then examines in 13 chapters what the key components of that new approach should look like. It takes a broad and multi-faceted perspective, exploring areas as diverse as the crisis of consumer trust, the ever-growing power of Big Data, the importance of leadership and corporate culture and the rapid advance in thinking based on Behavioural Economics. In developing these themes, the authors don't pull their punches. The book is fiercely critical of some of the industry's long-established marketing habits, providing compelling reasons why it's time to abandon the practices that have given it a bad name. Marketers will applaud, but the book is also intended for a broader audience. Thomson and Camp challenge senior management in financial firms to appreciate the real value that marketers can bring to shaping the business agenda at the highest level, and not just to label marketing with that tired old phrase "the colouring-in department." Rich in anecdotes, comments from leading industry figures, personal experiences on the part of both authors and findings from original research, No Small Change is an entertaining and rewarding read - and, at this point in the development of financial services, a timely and important one.

One of the main reasons to name this book as Financial Management from an Emerging Market Perspective is to show the main differences of financial theory and practice in emerging markets other than the developed ones. Our many years of learning, teaching, and consulting experience have taught us that the theory of finance differs in developed and emerging markets. It is a well-known fact that emerging markets do not always share the same financial management problems with the developed ones. This book intends to show these differences, which could be traced to several characteristics unique to emerging markets, and these unique characteristics could generate a different view of finance theory in a different manner. As a consequence, different financial decisions, arrangements, institutions, and practices may evolve in emerging markets over time. The purpose of this book is to provide practitioners and academicians with a working knowledge of the different financial management applications and their use in an emerging market setting. Six main topics regarding the financial management applications in emerging markets are covered, and the context of these topics are "Capital Structure," "Market Efficiency and Market Models," "Merger and Acquisitions and Corporate Governance," "Working Capital Management," "Financial Economics and Digital Currency," and "Real Estate and Health Finance."
