This text defines the scope of observation medicine as a new and cost-effective service in the field of emergency medicine. It reviews the principles and practice of providing services in an observation unit and examines in detail the 25 most common conditions/syndromes which comprise 95 per cent of services offered in observation units.

ECGs for the Emergency Physician 2
Parenting Press, Inc.

This simple first aid book helps kids think wisely in an emergency. Well illustrated and easy to understand, it describes accident situations that children are likely to find themselves in. The paramedic/teacher author team provides step-by-step directions for handling such common problems as cuts, bloody noses, stings, electric shock and burns. One of our most popular children's books, "Kids to the Rescue!" opens with a note for parents, explaining how children can practice the first aid techniques. It concludes with a first aid quiz and instructions on calling 9-1-1 and other emergency numbers. The back cover has an index so kids can easily find the page of instructions they need. Expanded and revised to cover HIV-safety.

Observation Medicine Simon and Schuster

Welcome to the new gold standard in critical care transport training. Published in conjunction with the American Academy of Orthopaedic Surgeons (AAOS) and the American College of Emergency Physicians (ACEP), Critical Care Transport offers cutting edge content relevant to any healthcare provider training in critical care

transport. Like no other textbook in this market, *Critical Care Transport* thoroughly prepares medical professionals to function as competent members of a critical care team by covering the material that everyone—paramedics, nurses, physicians, and specialty crew—needs to know to operate effectively in the prehospital critical care environment. This book meets the curricula of major critical care training programs, including University of Maryland, Baltimore County (UMBC). It covers both ground and flight transport, and meets the objectives of critical care transport certification exams such as the Certified Flight Paramedic (FP-C) exam administered by the Board for Critical Care Transport Paramedic Certification. Content includes information specific to prehospital critical care transport, such as flight physiology, lab analysis, hemodynamic monitoring, and specialized devices such as the intra-aortic balloon pump. Standard topics such as airway management, trauma, and pharmacology are covered in the context of critical care. Chapters have been authored by leading critical care professionals across the country and represent the most current, state-of-the-art information on management of critical care patients.

Implant Restorations: A Step-by-Step Guide, Third Edition offers clinicians a practical, step-by-step approach to treatment planning and restoring dental implants. This highly illustrated, case-based book demonstrates how to treat the most commonly encountered treatment scenarios, describing the procedures, techniques, and sequences required in clear, concise language and in an easy-to-use format. The book takes the theory of implant restoration, using as its basis 3i's implant systems, and places it directly in the operatory, concentrating in detail on each stage of the actual clinical procedures involved in treating different patients. It integrates implant treatment with the realities of running a successful restorative practice. Building on the work of the 2nd edition, the 3rd edition of this successful text reflects the advances of implant prosthetics over the intervening years, providing all new cases, exploring new techniques and technology, and demonstrating updated system components and armamentarium. *Implant Restorations: A Step-by-Step Guide* follows a logical structure of three sections. The first section introduces implant restorative dentistry, how to develop an implant restorative practice, the issues involved, the technical components of the 3i systems, diagnosis, and treatment planning. The central section of the book devotes

separate chapters to in-depth descriptions of each of several types of patients that the restorative dentist may encounter, ranging from basic to more challenging cases. Every step of each procedure is described and illustrated with clinical photographs. Laboratory work orders are presented for use with commercial dental laboratories. The final section discusses record-keeping, patient compliance, hygiene regimes and follow-up, and provides the reader with an outline of best-practice procedural protocols. An excellent and accessible guide on the most burgeoning subject in modern dental practice by one of its most experienced clinicians, *Implant Restorations: A Step-by-Step Guide, Third Edition* will appeal to prosthodontists, general dentists, implant surgeons, dental students, dental laboratory technicians and dental assistants.

For introductory courses in Management Information Systems Processes, Systems, and Information: An Introduction to MIS, provides a concise introduction to MIS with a hands-on approach to business processes. Authored by Earl H. McKinney, Jr. and David M. Kroenke, the text shows students exactly how businesses use information systems and technology to accomplish their goals, objectives, and competitive strategy. Packed with examples of business situations, both real and fictitious, the book helps students understand what business systems actually are—and see why they

are so important. The text consists of the five SAP-focused chapters from McKinney and Kroenke's Processes, Systems, and Information: An Introduction to MIS. A pair of appendices after chapters four and five contains SAP process exercises that enable students to get hands-on experience applying what they're learning in the course. This clear emphasis on business processes, and SAP in particular, makes Processes, Systems, and Information: An Introduction to MIS, the ideal text for courses attended by students not majoring in MIS. An Introduction to Clinical Emergency Medicine Penguin

A compilation of articles written by and about Suleika Jaouad and a journey through cancer from age 22. "My life was interrupted overnight. But guess what? That interruption was the best thing that's ever happened to me. I would never go so far as to say "cancer is a gift." It's not. And I've seen it take way too many lives, way too soon. But when I found out I had cancer, I also began to find my voice."
