Taylor & Francis

An analysis of Americanization in European and Japanese industry after World War II. The contributors analyze the creative role of local actors in selectively adapting US technology and management methods to suit local conditions, and in creating hybrid forms combining foreign and indigenous practices in unforeseen, yet remarkably competitive ways.

Among the founding nations of the European Union, no nation has experienced a more devastating affect from the 2008 economic crisis than Italy. Although its recovery has recently begun, Italy has fallen even further behind EU economic leaders and the EU average. Looking at how and why this happened, Facing the Crisis brings together ethnographic material from anthropological research projects carried out in various Italian industrial locations. With

its wide breadth of locations and industries, the volume looks at all corners of the diverse Italian manufacturing system.

This volume addresses the fraught relationship between market and society in times of social and economic crisis, exploring how they interact in key social, cultural, and political arenas on a global scale. The contributors examine the neoliberal market in anthropological and ethnographic terms to question whether “market logic” has won out against social aspects of human existence in a framework of minimal state protection and the devaluation of human labor. Fruitfully combining empirical data and theoretical approaches, the volume investigates the extent to which ordinary people accept unequal allocations of resources and examines their sense of belonging in an expansive neoliberal economy.

Consigliato ad un pubblico 14+ Questi sono i racconti che raccontavo alla mia nipotina quando, da piccola, si divertiva a

sentire raccontare fatti accaduti in un altro secolo. Qui li racconto a voi. Io non sono uno scrittore, bensì una persona comune che ha avuto una vita comune, con alti e bassi, come le persone normali. Quello che voglio scrivere non lo scrivo per gli altri, ma per me; di modo che, quando lo leggerò, farò finta che tutti gli eventi avvenuti siano stati vissuti da un altro, da un estraneo. Così che la mia valutazione sia più equilibrata e corretta possibile, e non di parte. Gli eventi che vengono narrati nella prima parte (Le uova) e nella seconda (Il batacchio) sono realmente accaduti e vengono raccontati in ordine cronologico, come si sono presentati nei miei nostalgici ricordi, pieni di sentimenti adolescenziali. Mentre nella terza parte, fino ad un certo punto i fatti raccontati sono realmente accaduti e sono fedeli alla realtà; poi è subentrata la fantasia, che ha contornato la realtà, fino a confondere anche me, tanto da non capire dove la fantasia convive con la realtà e dove addirittura la scaccia e si impadronisce della scena, fino a diventarne la sola protagonista.

Excerpt: An electric car is an automobile that is propelled by one electric motor or more, using electrical energy stored in batteries or another energy storage device. Electric motors give electric cars instant torque, creating strong and smooth acceleration. Electric cars were popular in the late 19th century and early 20th century, until advances in internal combustion engine technology and mass production of cheaper gasoline vehicles led to a decline in the use of electric drive vehicles. The energy crises of the 1970s and 1980s brought a short-lived interest in electric cars, though those cars did not reach mass marketing as today's electric cars experience it. Since the mid-2000s, the production of electric...

In this second edition of *Electronic Engine Control Technologies*, the latest

advances and technologies of electronic engine control are explored in a collection of 99 technical papers, none of which were included in the book's first edition. Editor Ronald K. Jurgen offers an informative introduction, "Neural Networks on the Rise," clearly explaining the book's overall format and layout. The book then closely examines the many areas surrounding electronic engine control technologies, including: specific engine controls, diagnostics, engine modeling, innovative solid-state hardware and software systems, communication techniques for engine control, neural network applications, and the future of electronic engine controls.

Winner of the Society for the Anthropology of Work book prize 2017 This volume presents a global range of ethnographic case studies to explore the ways in which - in the context of the restructuring of industrial work, the ongoing financial crisis, and the surge in unemployment and precarious employment - local and global actors engage with

complex social processes and devise ideological, political, and economic responses to them. It shows how the reorganization and re-signification of work, notably shifts in the perception and valorization of work, affect domestic and community arrangements and shape the conditions of life of workers and their families.

Per alcuni stranieri, l'Italia è solo una grande, poetica, immutabile "Toscana mentale". Una terra di luce e profumi, aperitivi al tramonto, mattoni a vista e indigeni cordiali. Ma nella testa degli italiani — purtroppo o per fortuna — c'è ben altro. Percorrendo la Penisola in compagnia di amici venuti dall'estero, Beppe Severgnini diventa cicerone ironico e implacabile. Da Milano a Firenze, da Roma a Napoli, dalla Sardegna fino alla sua città (Crema): l'insolita guida 'traduce' le strade, le case, le piazze, i negozi, le chiese, gli stadi, gli ipermercati, le spiagge. Un viaggio metaforico, autocritico e divertente attraverso il nostro modo di vivere oggi. Dieci giorni, trenta luoghi. Dall'alimentazione alla politica, dalla morale

alla TV, dal sesso (inevitabile) alla generosità (indiscutibile). Grazie allo sguardo e alla penna di uno dei nostri autori più amati, il ritratto di un Paese che 'ci manda in bestia e in estasi nel raggio di cento metri e nel giro di dieci minuti'.

Associazione "La Primula" - Associazione delle associazioni "Lucinîs" - Parrocchia di Lucinico Between 1948 and the end of the 1950s, Italian and American government agencies and corporations commissioned hundreds of short films for domestic and foreign consumption on topics such as the fight against unemployment, the transformation of rural and urban spaces, and the re-establishment of democratic regimes in Italy and throughout Europe. In *Schooling in Modernity*, Paola Bonifazio investigates the ways in which these sponsored films promoted a particular vision of modernization and industry and functioned as tools to govern the Italian people. The author uses extensive archival research and various theoretical approaches to examine the politics of sponsored filmmaking in

postwar Italy. Among the many topics explored are target audiences and audience response, sources of funding, censorship, debates on cinematic realism, and the connections and differences between American and Italian strategies and styles of documentary filmmaking. Insightful and richly detailed, *Schooling in Modernity* shows the importance of these under-appreciated films in the postwar modernization process, the transition from Fascism to democracy, and Italy's involvement in the Cold War.

A hidden corner of eastern Europe, Montenegro lies across the Adriatic Sea from Italy, its stark mountains rising up from the coast. It offers superb, year-round, eco-adventure and sports

facilities. Medieval architectural gems vie for attention with more recent Venetian fortresses and churches, reflecting the diversity of Montenegrin culture.

Along the eastern border lies Lake Skadar, a nature lover's dream with national park status. Updated throughout, this edition has all the practical information the independent traveller needs, including new hotels and restaurants on the coast and in the mountains. Outdoor and cultural enthusiasts will enthuse over the extended coverage on national parks, fishing opportunities and archaeological finds.

L'Enciclopedia dell'Automobile, in oltre 1100 pagine, ripercorre la storia di più di 700 case automobilistiche, raccontate modello per modello con immagini e descrizioni dettagliate. Un'enciclopedia da leggere come un avvincente romanzo, ma anche da consultare di volta in volta per avere un immediato ragguglio su una marca o semplicemente rammentare una data o un modello.

L'Enciclopedia dell'Automobile è una vera e propria guida per ripercorrere il lungo cammino dell'automobile, gustandone appieno atmosfere e individui. Di questi personaggi, grandi professionisti ma anche semplici dilettanti pronti a tutto pur di incidere il loro nome nell'albo d'oro della storia dell'automobile e dell'agonismo, si raccontano le avventure umane e imprenditoriali intessute di cuore e passioni, di azzardo e creatività. L'Enciclopedia racconta queste sfide affiancando alle idee, che hanno portato alla nascita dei modelli di successo, i piloti, meccanici e manager che hanno permesso che un'intuizione si trasformasse in una brillante realtà produttiva. Ogni Paese è rappresentato, dalla Cina ad Israele, con un occhio di riguardo alla storia motoristica italiana.

This book introduces a compelling new personality to the modernist canon, Marisa Mori (1900-1985), who became the only female contributor to *The Futurist Cookbook* (1932) with her recipe for "Italian Breasts in the Sun." Providing

something more complex than a traditional biographical account, Griffiths presents a feminist critique of Mori's art, converging on issues of gender, culture, and history to offer new critical perspectives on Italian modernism. If subsequently written out of modernist memory, Mori was once at the center of the Futurism movement in Italy; yet she worked outside the major European capitals and fluctuated between traditional figurative subjects and abstract experimentation. As a result, her in-between pictures can help to rethink the margins of modernism. By situating Mori's most significant artworks in the critical context of interwar Fascism, and highlighting her artistic contributions before, during, and after her Futurist decade, Griffiths contributes to a growing body of knowledge on the women who participated in the Italian Futurist movement. In doing so, she explores a woman artist's struggle for modernity among the Italian Futurists in an age of Fascism.

Embark on a transformative journey with Professor Felice E. Corcione's groundbreaking book, where environmental consciousness meets cutting-edge technology in mobility. Delving deep into the intricate relationship between mobility and the environment, Corcione offers insightful analyses of pollutants and lays the groundwork for sustainable practices. At the heart of Corcione's narrative lies the transformative potential of hydrogen, drawing inspiration from celestial phenomena and scientific innovation. With a focus on hydrogen's energy density and versatile applications in fuel cells, Corcione presents innovative solutions for sustainable transportation

without compromising performance. Join Corcione and colleagues as they discuss pressing environmental challenges and chart a course towards a greener future. This book is more than just a read-it's a call to action to embrace "green mobility" and contribute to a sustainable future. Join the expedition towards zero-emission transportation and environmental stewardship. "This work is designed to outline a proposal for the rebirth of the planet in the name of renewable energy and a circular economy model affecting every economic sector-from agriculture and manufacturing to transportation." --Prisco Piscitelli, epidemiologist, Vice-president of the Italian Society of Environmental Medicine.
