Unwrapping the Gifts of Recovery Jones & Bartlett Publishers

Chemical Dependency: Women at Risk shows readers how to design and implement drug and alcohol treatment programs that take into account not only gender but also the cultural differences among women. Whether you're a counselor, researcher, or health care provider, this book will show you how to abandon 'one-size-fits-all' treatment approaches that fail to address the individual needs of women undergoing substance abuse treatment. Instead, you'll learn to recognize and respect cultural and

individual differences among women. Use this book as a guide to develop your own innovative multicultural treatment approaches to substance abuse. Chemical Dependency offers a three-stage cultural assessment model that serves as a key starting point for transforming your services into culture-, gender-, and ethnic-sensitive programs. You'll acquire the knowledge and skills necessary to develop recovery services that identify patterns of belief and customs that can assist or hinder women in achieving and maintaining recovery. Readers of Chemical Dependency discover the obstacles to the development of effective women's

recovery programs, as well as key service elements of successful recovery programs. In addition, they witness firsthand how to integrate an understanding of women's lives from a multigenerational and life span perspective with consideration of issues such as sexuality, violence and sexual abuse, and codependence and parenting. As a result, professionals in the field at all levels are equipped with the necessary know-how for providing services to underserved women and offering them the assistance they so desperately need to overcome their substance abuse problems. Chemical Dependency provides readers with the most comprehensive analysis to date of marijuana addiction in women with effective methods for outreach, intervention, treatment, and research. The techniques it offers for establishing discussion frameworks for sexuality and HIV in the context of recovery can be incorporated immediately into existing treatment programs, as can its strategies to assist lesbians and bisexual women in confronting the trauma they suffer as a result of addiction, sexism, and societal homophobia. The book's authors are professionals in the fields of treatment, research, prevention, community organizing, and policymaking. Readers acquire from their collaborative effort an understanding of alcohol and drug addiction as a complex 'bio-psycho-social-spiritual' disease. Counselors, researchers, health care providers, and faculty and students of chemical dependency programs will find Chemical Dependency an invaluable guidebook for the development or improvement of their own approaches to successful intervention and treatment of women susceptible to drug and alcohol abuse.

Aggression, Family Violence and Chemical Dependency Mometrix Secrets Study Guides

Motivation is key to substance use behavior change. Counselors can support clients' movement toward positive changes in their substance use by identifying and enhancing motivation that already exists. Motivational approaches are based on the principles of person-centered counseling. Counselors' use of empathy, not authority and power, is key to enhancing clients' motivation to change. Clients are experts in their own recovery from SUDs. Counselors should engage them in collaborative partnerships. Ambivalence about change is normal. Resistance to change is an expression of ambivalence about change, not a client trait or characteristic. Confrontational approaches increase client resistance and discord in the counseling relationship.

Motivational approaches explore ambivalence in a nonjudgmental and compassionate way.

Introduction to the Counseling Profession
Hazelden Publishing & Educational Services

Counseling Chemically Dependent People with HIV Illness describes frontline clinical treatment of HIV-infected chemically dependent persons. It provides a realistic view of what the daily work with this population is like. Specific, in-depth case examples and material give readers a solid understanding of how to work more effectively with chemically dependent clients infected with HIV. By concentrating on practical instead of theoretical aspects of treatment, this groundbreaking book helps practitioners better understand problems in treatment and shows different ways treatment can be given. Authors discuss and describe methods they use such as group work, drug and AIDS education, treatment teams, and the harm reduction model. Chapters address work with specific patient populations with the dual diagnosis of HIV and chemical dependency and describe treatment in a variety of modalities, such as outpatient, residential, or hospital setting. This timely book also includes helpful background material which introduces the complexities of work with this population through the story of one man’s struggle with AIDS and alcohol and drug addiction. *Counseling Chemically Dependent People with HIV Illness* also describes medical symptoms and problems of HIV-positive persons which gives non-medical counselors and therapists a preliminary understanding of what their patients may be undergoing physiologically. Other chapters focus on such topics as work with adolescents, short term group work in hospitals, HIV-infected persons on methadone maintenance, effective AIDS prevention with active drug users, and countertransference in professionals working with chemically dependent HIV clients. One of few books to address specifics of counseling and therapy with this difficult population, *Counseling Chemically Dependent People with HIV Illness* is an extremely valuable and helpful guide for substance abuse counselors, certified alcoholism counselors, psychiatrists, psychologists, and social workers working in the chemical dependency field.
