**SPSS Base 16.0 User's Guide** Routledge  
Historically, clinicians and researchers have focused on depression and dementia in older people, paying little attention to anxiety except as a complication of these disorders. However, increased research into late-life anxiety has seen a growth in scientific literature and clinical interest. This important book brings together

international experts to provide a comprehensive overview of current knowledge in relation to anxiety in older people, highlighting gaps in both theory and practice, and pointing towards the future. Early chapters cover the broader aspects of anxiety disorders, including epidemiology, risk factors, diagnostic issues, association with insomnia, impaired daily functioning, suicidality, and increased use of healthcare services. The book then explores cross-cultural issues, clinical assessment, and pharmacological

and psychological interventions across a variety of settings. An invaluable resource for mental health professionals caring for older people including researchers, psychiatrists, psychologists, specialist geriatric nurses and social workers. Perinatal Mental Health Elsevier Health Sciences  
Penulis : lin Patimah, S.Kep., M.Kep.  
Ukuran : 14,5 cm x 21 cm Tebal : 111  
Halaman ISBN : 978-623-79439-2-1 blurb :  
Buku yang berjudul "Konsep Relaksasi Zikir Dan Implikasinya Terhadap Penderita

Gagal Ginjal Kronis: Kajian Teoritik Dan Praktik” sebagai pengembangan dari penelitian penulis sebelumnya. Gagal Ginjal Kronis (GGK) merupakan gangguan fungsi ginjal yang bersifat progressive dan irreversible yang mengakibatkan tubuh gagal untuk mempertahankan metabolisme dan keseimbangan cairan dan elektrolit tubuh yang normal. Oleh karena itu, diperlukan upaya untuk meminimalkan resiko lebih lanjut salah satunya dengan tindakan hemodialisa. Tindakan hemodialisa merupakan salah satu terapi pengganti ginjal buatan yang bertujuan membuang sisa-sisa produk metabolisme tubuh dan koreksi gangguan keseimbangan cairan dan elektrolit. Kemudian, CBT, logotherapy, SEFT serta distraksi merupakan teknik yang terbukti efektif untuk menurunkan kecemasan, namun untuk melakukan hal tersebut diperlukan pelatihan serta fasilitator yang terlatih agar terapi dapat dilakukan secara efektif. Teknik relaksasi bertujuan untuk membuat kondisi tubuh menjadi rileks. Tubuh dalam kondisi rileks dapat mengaktifkan kerja saraf parasimpatis dan menekan kerja saraf simpatis. Salah satu pendekatan keyakinan spiritual pada

agama Islam yaitu dengan teknik mengingat Allah atau berzikir. zikir dapat memberikan keyakinan pada seseorang bahwa sesuatu yang terjadi adalah kehendak Allah dan masalah apapun yang dihadapi akan mendapat pertolongan dari Allah. Untuk itu, zikir sebagai terapi non medis yang digunakan sebagai jalan alternatif untuk menenangkan kecemasan psikis dan mental pasien. Dengan amalan zikir pasien bisa merasakan ketenangan batin, sejujnya akal pikiran, dan optimis dalam menjalani ujian; rasa sakit yang diderita sehingga berdampak pada ketentraman jiwa dan kekuatan imunitas. Selamat membaca dan semoga bermanfaat.

**A Clinical Guide** Prentice Hall Bagaimanapun, teknik-teknik dalam pola asuh (parenting style) akan berpengaruh terhadap pembentukan kepribadian anak (kecerdasan, emosi, spiritual, dan aspek psikologis lainnya). Namun demikian, terkadang orang tua tak menyadari apakah karakteristik psikologis anaknya sesuai dengan gaya pengasuhan yang mereka terapkan. Ketidaktahuan ini pada gilirannya berakibat pada kelalaian pengasuhan (salah asuh) dan berbagai

penyimpangan (behavioral and psychological deviations). Itulah mengapa, pada beberapa kasus, ada anak kiai tapi ia pemabuk dan penjudi, anak seorang guru tapi suka mem-bully teman sekolahnya, bahkan ada juga anak polisi yang justru terlibat tawuran pelajar. Menurut banyak psikolog, orang tua luput/keliru dalam memahami situasi psikologis anak dan menyelenggarakan pendidikan keluarga yang sesuai. Sebab, masing-masing anak ialah individu yang unik. Mereka tak bisa saling disamakan karena perkembangannya dipengaruhi nature (sifat alamiah; genetik) dan nurture (sifat yang terbentuk dari interaksi sosial). Persoalan itu semakin rumit lebih-lebih karena orang tua tak menemukan cara mengidentifikasi karakter anak, prosedur mengukur kesehatan mental anak, bagaimana mengatasi depresi pada anak, dan bagaimana strategi mendidik anak agar psikisnya sehat. Buku ini berusaha menyajikan solusi atas problematika tersebut secara akademis; merujuk teori-teori psikologi, hasil penelitian, dan pengalaman empiris dari berbagai riset psikologis di Indonesia. Sebagai bahan kajian yang riil, buku ini juga mengangkat

contoh-contoh kasus pola pengasuhan pada keluarga utuh, single parent, dan broken home.

**Adult Nursing Practice** Routledge  
Buku Menyusun Instrumen Penelitian & Uji Validitas Realibilitas merupakan buku yang menyajikan cara menyusun instrumen penelitian dan melakukan pengujian validitas realibilitas berbagai instrumen penelitian. Buku ini ditulis dengan bahasa sederhana dan dilengkapi contoh aplikasi penelitian sekaligus cara pengujian data melalui program Statistical Product and Service Solution (SPSS), yang memungkinkan para pembaca dapat menyelesaikan problem penelitian khususnya dalam masalah penyusunan instrumen dan pengujian instrumen hingga penyelesaian akhir  
Integrating Psychotherapy, Psychopharmacology, and Complementary and Alternative Approaches Birkhäuser  
ABSTRACT: Helping patients achieve an optimal quality of life through patient-centered treatment planning should be the ultimate goal of all oral health care providers. However, this issue extends beyond the realm of the individual clinician's office. This text presents

quality-of-life research from various fields, including psychology, public health, and general health care; discusses how a patient-centered approach can be applied to basic oral and craniofacial research, clinical dental practice, community dental health issues, and dental education; and addresses how oral health-related quality of life relates to treating and understanding different patient populations, such as children with special needs, medically compromised patients, patients with oral cancer, and patients with chronic facial pain. Also discussed is how factors such as race/ethnicity, gender, and age can affect oral health-related quality-of-life concerns and treatment strategies. Finally, the book offers an outlook on the role that oral health-related quality of life will play in future research and dental education.

*Emotion-Focused Cognitive Therapy* EDU PUBLISHER

Meditative practices have flourished in widely different parts of Eurasia, yet historical research on such practices is limited. Research to date has focused on contexts rather than actual practices, and within individual traditions. For the first

time in one volume, the meditative practices of the three traditions of Judaism, Christianity and Islam are examined. They are viewed in a global perspective, considering both generic and historical connections to practices in other traditions, particularly in India and East Asia. Their cultural and historical peculiarities are examined, comparing them both to each other and to Asian forms of meditation. The book builds on a notion of meditation as self-administered techniques for inner transformation, a definition which focuses on transformative practice rather than notions of meditative states and mystical experiences. It proposes ways of studying meditative practice historically, and concludes with an essay on the modern scientific interest in meditation.

*Fear of Failure* CRC Press

Now in two colours throughout, this new edition of *LectureNotes: Neurology* contains the core neurological information required, whichever branch of clinical medicine you choose. Reflecting current clinical practice, the latest advances in the diagnosis and management of neurological diseases are concisely

covered. The book is divided into two parts. The Neurological Approach looks at neurological history taking. The neurological examination is then discussed in detail –consciousness, cognitive function, vision and other cranial nerves, motor function, sensation and autonomic function. In part two, Neurological Disorders, the common neurological conditions are described, along with neurological emergencies and neuro-rehabilitation. Featuring a self-assessment section, and with clinical scenario and key points boxes throughout, *Lecture Notes: Neurology* is ideal for medical students, junior doctors, and specialist nurses who want a concise introduction to clinical neurology that can be used as a core text or as a revision resource.

Myles' Textbook for Midwives E-Book  
Elsevier Health Sciences

*The Body and Shame: Phenomenology, Feminism, and the Socially Shaped Body* investigates the concept of body shame and explores its significance when considering philosophical accounts of embodied subjectivity. Body shame only finds its full articulation in the presence

(actual or imagined) of others within a rule and norm governed milieu. As such, it bridges our personal, individual and embodied experience with the social, cultural and political world that contains us. Luna Dolezal argues that understanding body shame can shed light on how the social is embodied, that is, how the body—experienced in its phenomenological primacy by the subject—becomes a social and cultural artifact, shaped by external forces and demands. *The Body and Shame* introduces leading twentieth-century phenomenological and sociological accounts of embodied subjectivity through the work of Edmund Husserl, Maurice Merleau-Ponty, Jean-Paul Sartre, Michel Foucault and Norbert Elias. Dolezal examines the embodied, social and political features of body shame, contending that body shame is both a necessary and constitutive part of embodied subjectivity while simultaneously a potential site of oppression and marginalization. Exploring the cultural politics of shame, the final chapters of this work explore the phenomenology of self-presentation and a

feminist analysis of shame and gender, with a critical focus on the practice of cosmetic surgery, a site where the body is literally shaped by shame. *The Body and Shame* will be of great interest to scholars and students in a wide variety of fields, including philosophy, phenomenology, feminist theory, women's studies, social theory, cultural studies, psychology, sociology, and medical humanities.  
*God's Plan for Ministry in the Kingdom*  
Academic Press

Saat ini masyarakat berpendapat bahwa orang dikatakan gangguan jiwa jika orang tersebut sudah menyerang orang lain, sudah berbicara sendiri atau sudah tidak mau bergaul dengan orang lain (mengurung diri sendiri). Seiring dengan dengan waktu tantangan hidup yang lebih berat, setiap individu bisa mengalami tekanan psikologi, tekanan fisik, tekanan ekonomi, lingkungan sosial yang tidak menyenangkan, bahkan budaya yang berbeda dapat menimbulkan stress, cemas, pustus asa dan bahkan sampai depresi. Kondisi tersebut merupakan bagian dari gangguan psikososial dalam kehidupan. Dalam buku ini akan dibahas tentang gangguan psikososial, disertai

dengan cara penanganan untuk gangguan psikososial dengan tindakan khusus keperawatan. Kebutuhan hidup yang meningkat dan tantangan hidup yang dihadapi oleh masyarakat saat ini dapat menjadi faktor pencetus gangguan psikososial. Masyarakat diharapkan dapat ikut bisa menangani kondisi bersama dengan tenaga kesehatan, dosen keperawatan jiwa bahkan mahasiswa yang sedang mempelajari tentang gangguan jiwa, khususnya gangguan jiwa: psikososial. Salah satu hal yang dilakukan oleh pendidik dan mahasiswa adalah melakukan penelaahan secara ilmiah. Penelaahan ilmiah dalam hal ini adalah penelitian-penelitian tentang gangguan jiwa. Berkaitan dengan hal tersebut, penulis melengkapi buku ini dengan instrumen-instrumen sebagai alat ukur untuk penelitian khususnya tentang gangguan jiwa psikososial. Instrumen penelitian yang dilampirkan meliputi alat ukur tentang: kecemasan, stress, dan depresi.

Phenomenology, Feminism, and the Socially Shaped Body Springer

This reference presents research and clinical developments in the field,

presenting comprehensive, problem-focused approaches to psychodermatology. It offers a panoramic perspective of worldwide research efforts to improve the understanding and treatment of the psychodermatological patient.

Nyeri pada persalinan dikarenakan adanya kontraksi otot-otot uterus, peregangan serviks pada waktu membuka, iskemia korpus uteri serta peregangan segmen bawah rahim. Sebab itulah terjadinya nyeri pada saat persalinan berlangsung. Namun, hal demikian sebenarnya dapat dikurangi dengan metode farmakologi maupun nonfarmakologi. Berdasar hal itu, nyeri-nyeri persalinan sejatinya timbul secara fisiologi. Buku ini akan membahas penanganan nyeri persalinan dari berbagai metode nonfarmakologi. Terapi Benson dan Massage Effleurage merupakan metode nonfarmakologi untuk mengurangi rasa nyeri saat persalinan. Selain itu, terapi ini bebas dari komplikasi atau indikasi dari masalah nyeri yang dihadapi oleh ibu-ibu dalam masa persalinan juga akan dipaparkan secara jelas dan rinci.

Teknik-teknik untuk mengurangi “nyeri” tersebut dalam buku ini disajikan dengan bahasa yang sederhana. Harapannya, hal yang demikian itu dapat menambah pengetahuan dan pengalaman kepada para pembaca sehingga tidak ada lagi alasan takut ketika berhadapan dengan persalinan.

*Aplikasi Statistik untuk Penelitian Bidang Ekonomi dan Sosial* Lexington Books  
Murottal Al-Qur’an atau rekaman lantunan Al- Qur’an yang disuarakan dengan lembut dan merdu oleh Qori atau Qori’ah diyakini oleh banyak orang, terutama kaum muslim, bahwa murottal Al-Qur’an dapat memberikan rasa rileks, tenang, dan santai bagi yang mendengarkannya. Buku ini berisi rangkuman penelitian tentang hubungan murottal Al-Qur’an dengan ansietas dan kualitas tidur pada mahasiswa kedokteran. Diharapkan buku ini menjadi rujukan pengetahuan baru bagi mahasiswa, bahwa terapi murottal Al-Qur’an dapat menurunkan ansietas dan memperbaiki kualitas tidur.

Accessible and practical, this book helps teachers incorporate executive function processes - such as planning, organizing, prioritizing, and self-checking - into the

classroom curriculum. Chapters provide effective strategies for optimizing what Ka "12 students learn by improving how they learn. Noted authority Lynn Meltzer and her research associates present a wealth of easy-to-implement assessment tools, teaching techniques and activities, and planning aids. Featuring numerous whole-class ideas and suggestions, the book also covers the nuts and bolts of differentiating instruction for students with learning or attention difficulties. Case examples illustrate individualized teaching strategies and classroom accommodations. Fifteen reproducibles are included; the large-size format facilitates photocopying and day-to-day reference. This book will be invaluable to classroom teachers and special educators in grades K-12, teacher educators, school psychologists, and neuropsychologists.

*Meditation in Judaism, Christianity and Islam* Penerbit NEM

The prospect of parenthood represents a milestone in anyone's life course and is often a period of stress and challenge. There are a number of significant mental health problems that can occur during the perinatal period, the consequences of

which can be both enduring and, occasionally, life threatening. However, irrespective of the specifics of the clinical manifestation of a disturbance, the distress and misery that accompanies it has significant ramifications for the mother or mother-to-be and her partner and family. This book is arranged in themed parts that represent key aspects of facili.

**Anxiety in Older People** OUP Oxford  
The most-popular midwifery textbook in the world! The sixteenth edition of this seminal textbook, Myles Textbook for Midwives, has been extensively revised and restructured to ensure that it reflects current midwifery practice, with an increased focus on topics that are fundamental to midwifery practice today. Well illustrated to assist visual learning Boxes highlighting significant information to aid study Introduction, Aims of the chapter and Conclusion for each chapter References, Further Reading and Useful websites to promote further learning Glossary of terms and acronyms provide simple definition of more complex terminologies Additional online resources Over 500 multiple-choice questions enable

students to test their knowledge Unlabelled illustrations help reinforce learning Full image bank of illustrations to make study more visual and assist with projects. Up-to-date guidance on professional regulation, midwifery supervision, legal and ethical issues, risk management and clinical governance Recognises that midwives increasingly care for women with complex health needs, in a multicultural society Increases confidence in empowering women to make appropriate choices Looks at the dilemmas involved in caring for women with a raised body mass index Chapter on optimising care of the perineum for women with perineal trauma, including those who have experienced female genital mutilation Additional coverage of basic neonatal resuscitation, to reflect the trend for midwives to carry out the neonatal physiological examination Streamlined chapters with similar themes and content, to facilitate learning Full colour illustrations now used throughout the book, in response to student feedback. The Medical Basis of Psychiatry John Wiley & Sons  
Buku Kupas Tuntas Hiperemesis

Gravidarum ini menjadi solusi mahasiswa kesehatan dalam mendapatkan referensi penulisan karya tulis ilmiah, dikarenakan terbatasnya buku yang membahas mengenai hiperemesis gravidarum. Selain itu, memudahkan orang awam untuk memahami kehamilan beserta komplikasi kehamilan yang berupa hiperemesis gravidarum secara mendalam. Buku ini mengupas tuntas semua hal mengenai hiperemesis gravidarum (mual muntah berlebihan dalam kehamilan) berdasarkan rujukan jurnal-jurnal nasional serta internasional terpercaya. Materi “Dampak Hiperemesis Gravidarum” disajikan penulis berdasarkan pengamatan dari beberapa sudut pandang, bukan hanya dalam hal kesehatan saja. Materi “Faktor Penyebab Hiperemesis Gravidarum” ditulis penulis berdasarkan penelitian penulis dan juga jurnal-jurnal nasional serta internasional yang penulis selipkan sehingga tingkat kebenarannya dapat dipertanggungjawabkan. Penulis juga memperkenalkan terapi komplementer penanganan hiperemesis gravidarum, yakni pemanfaatan jahe untuk mengurangi mual muntah kehamilan; bagaimana khasiat akupresur dan

akupunktur dalam meredakan mual muntah kehamilan, jenis aromaterapi yang paling cocok untuk mual muntah kehamilan dan kecemasan selama hamil trimester I, serta pengobatan Bach Flower. "Mencobalah, tanpa mencoba kamu tak akan tahu bagaimana puasnya senang

susah. Berkaryalah meski itu bukan bidangmu sekolah dan berusahalah, karena dari situ katemukan sebuah ibadah." —Rasida Ning Atiqoh
