MORA DEVIN

A Practical Guide to Primary Care Consultation Skills, Second Edition Scion Pub Limited

The Oxford Handbook of General Practice is an essential lifeline for the busy GP. It includes hands-on advice to help with any day-to-day problems which might arise in general practice. Revised and updated throughout, this new edition includes several new chapters and expanded information on the new GP contract and

training.

Clinical Skills Assessment and Case-based Discussion CRC Press

The book is based on notes written during my preparation for the MRCGP Clinical Skills Assessment (CSA) Examination. The book deals with 309 topics relevant to the CSA Examination. Acronyms used have been listed in an index in the first few pages of the book. Some of the topics are dealt with in detail while others have simple explanations only. I hope that these notes will prove useful to trainees preparing for the examination. I would encourage readers to stay updated with the latest guidelines. Best wishes to those who are preparing for the MRCGP CSA exam.

Crash Course Renal and Urinary System Updated Edition - E-Book Oxford University Press

This is the first revision book to be published specifically for candidates sitting the FRCS(Urol) examination. It presents a selection of questions arising from common clinical scenarios along with detailed model answers. The emphasis is on current concepts and topics asked in the exam. Each chapter has been written by senior urology trainees who have recently passed the examination, in conjunction with experienced consultant urological surgeons. In addition to FRCS(Urol) examination candidates, this book will also be relevant to those sitting the FEBU or MSc urology examination, or to established consultants seeking a useful refresher text in areas outside their subspecialist interest. 'The British Association of Urological Surgeons (BAUS) is a charity whose mission is to promote the highest standard in the practice of Urology. As President of BAUS, it is therefore a great privilege and pleasure to introduce this excellent book.' - from the Foreword by Derek Fawcett 'No Urology trainee should be without this important and valuable contribution to the training of future consultants.' - from the Foreword by Hashim U Ahmed

Oxford Handbook of General Practice Clinical Prep

The much anticipated practical educational manual for General Practice (GP) trainers, programme directors, and other teachers and educators in primary care has finally arrived. This extensive, full-colour guide is written by a select group of hands-on educators who are passionate and knowledgeable. The book captures their wisdom and vast experience in an accessible and practical way. Although it's aimed at GP training, there are many chapters in this book that are relevant and transferrable to

teachers and educators in areas outside of General Practice (and worldwide). We are sure that GP appraisers, Foundation Year trainers and other medical/nursing student educators will find the detailed comprehensive explorations inspirational. Beautifully presented, the chapters cover a wide educational framework employing a variety of presentational methods such as flowcharts, diagrams, conversational pieces, scenarios and anecdotes. Each chapter has a corresponding webpage containing over 300 additional resources - providing practical tools as well as additional reading material. This book was awarded the Royal College of GP's 'Paul Freeling Prize' in 2013 for meritorious work in the field of General Practice education. It is also used as the foundation textbook for the Postgraduate Certificate in Medical Education (PGCE) in at least seven UK universities. The Essential Handbook for GP Training and Education adopts a relaxed, personable approach to primary care education that won't leave you with a headache.

RCGP Insider's Guide to the CSA for the MRCGP CRC Press

Crash Course - your effective every day study companion PLUS the perfect antidote for exam stress! Save time and be assured you have all the core information you need in one place to excel on your course and achieve exam success. A winning formula now for over 15 years, each series volume has been fine tuned and fully updated, with an improved layout tailored to make your life easier. Especially written by senior medical students or recent graduates - those who have just been in the exam situation - with all information thoroughly checked and quality assured by expert faculty advisers, the result are books which exactly meet your needs and you know you can trust. Each provides an

integrated approach to the subject by linking together topics such as anatomy, development, histology, physiology and pharmacology. Diseases and complaints, clerking, clinical assessment and examination, common skills and further investigations are also covered. Commencing with clear 'Learning Objectives', every chapter guides you succinctly through the topic, giving full coverage of the curriculum whilst avoiding unnecessary and often confusing detail. A fully revised self-assessment section matching the latest exam formats is also included. More than 125 illustrations present clinical, diagnostic and practical information in an easy-to-follow manner. Friendly and accessible approach to the subject makes learning especially easy. Written by students for students - authors who understand exam pressures. Contains 'Hints and Tips' boxes, and other useful aide-mémoires. Succinct coverage of the subject enables 'sharp focus' and efficient use of time during exam preparation. Contains a fully updated self-assessment section - ideal for honing exam skills and self-testing. Self-assessment section fully updated to reflect current exam requirements. Contains 'common exam pitfalls' as advised by faculty. Crash Courses also available electronically! Online self-assessment bank also available - content edited by Dan Horton-Szar! Now celebrating over 10 years of success - Crash Course has been specially devised to help you get through your exams with ease. Completely revised throughout, the new edition of Crash Course is perfectly tailored to meet your needs by providing everything you need to know in one place. Clearly presented in a tried and trusted, easy-to-use, format, each book in the series gives complete coverage of the subject in a no-nonsense, user-friendly fashion. Commencing with

'Learning Objectives', each chapter guides you succinctly through the topic, giving full coverage of the curriculum whilst avoiding unnecessary and often confusing detail. Each chapter is also supported by a full artwork programme, and features the ever popular 'Hints and Tips' boxes as well as other useful aide-mémoires. All volumes contain an up-to-date self-assessment section which allows you to test your knowledge and hone your exam skills. Authored by students or junior doctors - working under close faculty supervision - each volume has been prepared by someone who has recently been in the exam situation and so relates closely to your needs. So whether you need to get out of a fix or aim for distinction Crash Course is for you!!

Clinical frameworks for the MRCGP CSA exam CRC Press

Covering both Medicine and Surgery, this book is the essential revision companion for all medical students and a valuable source of knowledge for junior doctors at all stages of their training. It is useful both in the early preparatory phase of revision as well as for last minute cramming, and for use on the wards. This book divides the medical and surgical curricula into over twenty key sections and concisely covers the relevant information for each, including definitions, aetiology, key clinical features, investigations, and management. Examinations for undergraduate medical students and at postgraduate level can take a number of forms, including Multiple Choice and Extended Matching Questions, Single Best Answers, Short Notes, Vivas and OSCEs. The book provides the necessary information to tackle all these exam formats successfully, as well as to manage each topic competently should it arise in clinical practice.

100 Consultations for the RCA/CSA across the NEW 2020 RCGP

Curriculum Radcliffe Publishing

The MRCGP Clinical Skills Assessment (CSA) Workbook Radcliffe Publishing

The Easy Guide to OSCEs for Final Year Medical Students John Wiley & Sons

Closely aligned to the GP curriculum and reflecting the latest format for the RCGP Membership exams, this book offers revision for the Clinical Skills Assessment (CSA) exam, which forms part of the compulsory MRCGP. Contains four practice exam 'circuits' - one of which is completely new. Each practice exam 'circuit' reflects the curriculum domains that candidates will encounter in the real CSA exam. Mirroring the CSA exam, each 'circuit' includes 13 commonly-encountered clinical consultation cases, plus a 'bonus case', offering additional preparation. Each case includes case notes, brainstorm areas, candidate and role-player instructions, and tips on what to look out for in the exam. Features unique input from Dr Peter Havelock, international consultation expert and creator of the GP Consultation model, upon which the GP curriculum is based. With editorial contribution from a successful CSA candidate, grounding the book in reality.

Succeeding in the MRCGP CSA The MRCGP Clinical Skills Assessment (CSA) Workbook

Assessment is a key method of improving standards as well as establishing competency. However, despite major developments in the assessment of clinical competence in the last two decades, there is still more bad practice and ignorance of significant issues in this area than any other aspect of medical higher education. This book comprehensively covers all aspects of assessment. It

considers current and future policy and practice, including the Modernising Medical Careers training programme; it promotes a system incorporating more meaningful assessments, rather than just 'tests' of knowledge and skill. Assessment in Medical Education and Training will be useful to everyone involved in healthcare education, including tutors, trainers, clinical supervisors and assessors in both primary and secondary care. It will also be important reading for consultants and general practitioners with responsibility for registrars, and healthcare education policy makers and shapers.

Oxford University Press

The Clinical Skills Assessment (CSA) of the new Membership of the Royal College of General Practice (nMRCGP) examinations can be a daunting test: candidates face assessment on an unknown situation by a 'patient' and assessor, however, help is at hand. This book has been written by a CSA examiner in concert with GP training programme members to help candidates approach the exam feeling prepared, calm and in control. It includes advice on preparation, consultation skills, how the assessment is marked, and 12 practice CSA cases, along with advice on how candidates can create cases with which to practise and assess each other. Clear, practical, and based on sound knowledge and proven techniques, this book will be essential reading for nMRCGP CSA candidates. 'Rhona is a passionate and compassionate educator with a strong sense of natural justice, and also a long-standing MRCGP examiner. She has developed an approach to understanding and preparing for the Clinical Skills Assessment (CSA) that is already tried, tested and proven. An approach that will enhance the candidate's ability as a GP at the same time as

preparing them for the CSA.' - Simon Gregory in his Foreword
The Mrcgp Clinical Skills Assessment (csa) Workbook Radcliffe Publishing

This classic book has been providing help for candidates of the MRCGP exam for over 20 years. Now fully updated for UK trained doctors wishing to obtain a Certificate of Completion of Training in General Practice, this new edition covers all three required components of the integrated assessment programme. It provides sample questions for the Applied Knowledge Test (AKT), practice cases for Clinical Skill Assessment (CSA) and a guide to Workplace Based Assessment (WPBA). The chapters follow the 16 sections of the RCGP curriculum and include summaries of the current evidence base with clinical guidelines, examination tips, revision tactics, and advice on where to get support – but not just at the crucial time of exams – it includes invaluable information for GPs starting their first year in practice and helps provide the “life skills” needed to be a GP, including topics relevant for the rest of a GP’s career and their “continuing professional development” – appraisal, revalidation, managing change, teamwork, burnout, and other areas of self care.

Common Scenarios and Revision Notes for the Clinical Skills Assessment PasTest Ltd

Closely aligned to the GP curriculum and reflecting the latest format for the RCGP Membership exams, this book offers revision for the Clinical Skills Assessment (CSA) exam, which forms part of the compulsory MRCGP. Includes three up-to-date practice exam 'circuits' - one of which is completely new. Mirroring the CSA exam, each 'circuit' features 13 commonly-encountered clinical consultation cases. Each case includes case notes, brainstorm

areas, candidate and role-player instructions, and tips on what to look out for in the exam. Features unique input from Dr Peter Havelock, international consultation expert and creator of the GP Consultation model, upon which the GP curriculum is based. With editorial contribution from a recently successful CSA candidate, grounding the book in reality. Provides 'Online Extras' in the form of video examples of consultation cases for the CSA, with advice and commentary.

with 250 Clinical Cases PasTest Ltd

This book helps readers pull together the knowledge and communication skills required for success in the consultation components of the MRCGP exam, namely the Clinical Skills Assessment (CSA) and the Clinical Observation Tool (COT). Rather than learning by rote, this book promotes a methodical, step-wise approach which will enable you to easily identify the type of case presenting, and to work out exactly what you need to demonstrate for a successful consultation. The book features a number of cases to test and enhance your skills, in three formats:

- 13 teaching cases- these are very detailed cases which provide you with a great deal of support and advice, including: suggested approaches to the consultation, model answers, background knowledge required, and the theoretical underpinnings of the consultation.
- 20 long cases- these build on the knowledge gained in the teaching cases and feature detailed analysis to help you develop an ordered, step-wise approach to data gathering, clinical management and interpersonal skills.
- 15 shorter practice cases- these help refine the skills you have learnt in working through the earlier cases. These cases come with marking schemes and can be used either alone or in small groups.

Once you have worked through the book and refined this methodical approach, you will be able to approach any consultation confident in the knowledge that you possess the tools to succeed. Note that this edition does not contain a DVD. The 13 video cases in the previous edition have been replaced by teaching cases.

Featuring Data-Gathering, Clinical Management and Communication Skills Elsevier Health Sciences

Don't Wait Until Something Goes Wrong to Think About Your Consultation Skills Designed specifically for busy health professionals working in primary care, *The Naked Consultation: A Practical Guide to Primary Care Consultation Skills* covers all aspects of the primary care consultation in a clear, concise, and highly readable manner. The book begins by breaking the primary care consultation into its components, making it easier to focus on particular areas and practise skills such as encouraging patients to explain what's wrong, summarising and reflecting, and giving information to patients. The book then describes how to effectively use educational tools—such as videoing, random case analysis, problem case debriefing, and feedback—to improve consultations. It also explains in detail how to demonstrate proficient consultation skills in the Membership of the Royal College of General Practitioners (MRCGP) exam and the importance of these skills in appraisal/revalidation. Certified for continuing professional development (CPD®) by The CPD Certification Service, this fully updated and revised Second Edition incorporates new thinking and consultation models, including the 6 S model and the new doctor, patient, illness model. It also provides detailed analysis of the latest Royal

College of General Practitioners (RCGP) assessment tools, such as the clinical skills assessment exam (CSA) and the consultation observation tool (COT). Complete with illuminating case studies, photocopiable forms, and a jargon-busting appendix, *The Naked Consultation: A Practical Guide to Primary Care Consultation Skills, Second Edition* offers valuable insight into the key phases of the primary care consultation, the best features of common consultation models, and the real-world application of popular consultation techniques.

Study Text Bundle Radcliffe Publishing

'Medical technology is beneficial for well researched dangerous diseases. However, most symptoms that people bring to their primary care physician have no single clearly identifiable cause: investigations and drugs do more harm than good - and also waste resources - ' - Wilfrid Treasure *Diagnosis and Risk Management in Primary Care* teaches that adopting an evidence-based approach to primary care improves patient care and treatment outcomes. It demonstrates that brief clinical assessments, repeated if necessary, allow effective diagnosis while avoiding the costs and complications associated with more advanced testing. Adopting a fresh approach, this book sets consultation skills alongside evidence-based information by both itemising the specific techniques and facts that are needed in the consulting room, and providing detailed information on odds and likelihood ratios to quantify risk and deal with uncertainty. This book provides food for thought, and helps doctors develop communication skills that support their personal styles of consulting, encouraging a more traditional, intuitive treatment. It provides a map of the consultation and a compass to navigate

through symptoms, signs and evidence - listening to their patients with one ear and, with the other, to the reflective inner voice of reason. General Practitioner Specialist Trainees and their teachers will find much of interest, as will established General Practitioners with an interest in maintaining traditional models of care. Undergraduate medical students and candidates for the MRCGP will find this an ideal reader for the clinical skills assessment. 'What a breath of fresh air to find an author capable of putting the patient back at the centre of the consultation and who is able to entertain at the same time as he informs and to stimulate critical reflection while nudging us in the direction of a rigorous approach to diagnosis, and the assessment and communication of risk.' From the foreword by Roger Jones
[MRCGP CSA Examination Notes](#) CRC Press

Completely revised and including new additional material, this second edition of the bestselling *Get Through MRCGP: Clinical Skills Assessment* provides candidates with a definitive, one-stop revision resource for the CSA part of the MRCGP examination. Fully revised in accordance with the current MRCGP and MRCGP(INT) curriculum Mock examinations cover a spread of topics and skills outlined in the RCGP curriculum Comprehensive discussion of areas that stations test and detailing points needing to be covered to achieve the best results Brand new material including six new cases and task boxes to refocus the reader's attention on the different challenges of each station Completely rewritten introductory chapter Offers valuable advice on how to approach the exam, focus time in day-to-day GP surgeries and how to develop skills required to pass the CSA Written by an experienced author team that has extensive knowledge of both

national and international primary care clinical skills assessment, *Get Through MRCGP: Clinical Skills Assessment, Second Edition* is essential reading for postgraduate candidates preparing for this challenging examination.

The Mrcgp Clinical Skills Assessment (csa) Workbook

Elsevier Health Sciences

The 3rd edition of PACES for the MRCP has been fully revised and updated throughout to retain its pole position as the textbook to accompany core medical training (CMT) and prepare candidates for success in the Practical Assessment of Clinical Examination Skills and a future specialty career. Features Fully revised for the new Station 5 and completely updated throughout. Promotes understanding and deeper learning of modern medicine applicable to PACES and the specialist registrar. Emphasis on clinical assessment - history-taking, examination and communication skills - equipping candidates with appropriate differential diagnoses from which to develop the right diagnosis. Encourages candidates to question why a diagnosis has arisen and consider its consequences. For example, 'Heat failure' is a not a diagnosis until a candidate has considered the differential diagnoses of breathlessness and decided why heart failure is most likely, and then considered its cause (not always ischaemic heart disease), its presentation (acute, chronic, left or right ventricular or both) and, most importantly, the effects of it and its treatments on a patient's life. This 3rd edition of PACES for the MRCP continues to provide fully revised, up-to-date, evidence-based coverage of investigations and treatments. Whilst the emphasis of PACES is on clinical skills, candidates who understand when, for example, a patient with rheumatoid

arthritis might benefit from a biologic agent and how this will influence inflammatory disease, is better equipped for success. A one-volume text giving candidates complete preparation for the PACES exam within one portable volume 250 cases organised into the 5 stations of the PACES exam - respiratory and abdominal system, history taking, cardiovascular and nervous system, communication and ethics and skin, locomotion, eyes and endocrine systems Engaging question-and-answer approach at the end of each case - excellent preparation for the exam Boxed tips highlight vital information - helps identify what is most important to remember Produced in full colour throughout Colour coding for each station Many more illustrations added - now over 300 clinical photographs and line drawings in colour Many more cases added, bringing the number up to 250 - 50 per station History-taking and communication skills stations now revised so that they exactly mimic the requirements of the exam Assessment in Medical Education and Training CRC Press Includes a range of scenarios representative of those MRCGP CSA candidates will encounter, each created with direct input from an MRCGP examiner
