*A Compilation of Prayers* John Wiley & Sons  
 "Rest in Christ reviews the principles of finding rest in Jesus Christ. It shows how sitting at the feet of Jesus can bring genuine spiritual, mental, relational, and physical rest"--  
*Qur'anic Pictures of the Universe* Islamic Book Trust  
 Daily Manna is a compendium of daily devotional readings designed to draw the sincere seeker closer to God on a daily basis, through an insightful exposition and compelling analysis of the scriptures.  
*Collective Wisdom from the Experts* African Books Collective  
 Demonstrates the power of the programming language while explaining how to use Java to spice up a Web page with games, animation, and special effects  
*The Great Controversy Between Christ and Satan* Apress  
 After 24 years, Special Forces legend Josh Kavanagh has retired from the military. But now that he's home, he's finding that everyone has a different understanding of his motivations, and realizes there are some wounds no amount of time can heal. Josh's traumatized sister Suki, thinks her big brother is a hero and has come home to punish her rapist, the youngest son of a ruthless, crooked billionaire who lives to get revenge on anyone he sees as a threat to his family, wealth, and power. Josh's childhood sweetheart, Rachel, hopes he's returning for her-the fierce girl he left behind when he joined the military. But Rachel doesn't know about Mia, the woman in France ... And Josh isn't coming home alone. The Oath Group, an elite force of private military contractors, is already in Montana waiting for their commander to arrive. The DOD and CIA don't want President Trump to know they hired Josh's Oath Group to examine dangerous white supremacist militias that are threatening the U.S. Constitution. That covert black-ops military operation is starting in Idaho and Montana. Josh and his teams have to get the job done while preserving their anonymity-and their lives.  
*Quranic Sunnah* Seventh-day Adventist Church Manual.  
*Advanced Do-It-Yourself Java Games: An Introduction to Java Threads and Animated Video Games* is the third book of the Do-It-Yourself Java Games series. The previous book in the series, *More Do-It-Yourself Java Games*, taught event-driven programming. Those games started with an initial window, then waited for the program user to take an action. The games in this book require the same kind of event-driven user interfaces, but add threads to perform automated, simultaneous activity, whether the user takes an action or not. You'll learn more advanced programming techniques as you create 8 new games with sound and animation.

You'll learn to use abstract classes, interfaces, state-driven programming, and the model/view/controller design. This book assumes you either have experience creating event-driven user interfaces with Java Swing or you have read the second book, *More Do-It-Yourself Java Games: An Introduction to Java Graphics and Event-Driven Programming*. The *Do-It-Yourself Java Games* series of books uses a unique "discovery learning" approach to teach computer programming: learn Java programming techniques more by doing Java programming than by reading about them. Through extensive use of fill-in blanks, with easy one-click access to answers, you will be guided to write complete programs yourself, starting with the first lesson. You'll create puzzle and game programs and discover how, when, and why Java programs are written the way they are.  
*Basher Science: Extreme Biology* Unbridled Books  
 Alphabetically arranged entries include information about the physical characteristics, habitat, and behavior of over 2000 animals from all parts of the earth.  
*The Haunters and the Haunted* Createspace Independent Publishing Platform  
 The fundamental outlines of the physical world, from its tiniest particles to massive galaxy clusters, have been apparent for decades. Does this mean physicists are about to tie it all up into a neat package? Not at all. Just when you think you're figuring it out, the universe begins to look its strangest. This eBook, "Ultimate Physics: From Quarks to the Cosmos," illustrates clearly how answers often lead to more questions and open up new paths to insight. We open with "The Higgs at Last," which looks behind the scenes of one of the most anticipated discoveries in physics and examines how this "Higgs-like" particle both confirmed and confounded expectations. In "The Inner Life of Quarks," author Don Lincoln discusses evidence that quarks and leptons may not be the smallest building blocks of matter. Section Two switches from the smallest to the largest of scales, and in "Origin of the Universe," Michael Turner analyzes a number of speculative scenarios about how it all began. Another two articles examine the mystery of dark energy and some doubts as to whether it exists at all. In the last section, we look at one of the most compelling problems in physics: how to tie together the very small and the very large - quantum mechanics and general relativity. In one article, Stephen Hawking and Leonard Mlodinow argue that a so-called "theory of everything" may be out of reach, and in another, David Deutsch and Artur Ekert question the view that quantum mechanics imposes limits on knowledge, arguing instead that the theory has an intricacy that allows for new, practical technologies, including powerful computers that can reach their true potential.

Do-It-Yourself Multiplayer Java Games: An Introduction to Java Sockets and Internet-Based Games is the fourth book of the Do-It-Yourself Java Games series. The previous books introduced games you could play by yourself or against the computer. This book will teach you to use Java sockets and TCP/IP to create games to play with your friends within a home network or over the internet. You'll learn to create games for any number of players, games that will pair up any two players, and games that restrict who is allowed to play. This book will guide you to create seven complete games: a turn-based strategy game, a timed competition, a continuous motion game, a fast-paced action game, and more. This book assumes you already have strong Java programming skills. This book assumes you either have experience creating event-driven user interfaces with Java Swing or you have read the second book, More Do-It-Yourself Java Games: An Introduction to Java Graphics and Event-Driven Programming. This book also assumes you either have experience with Java Threads and abstract classes or that you have read the third book, Advanced Do-It-Yourself Java Games: An Introduction to Java Threads and Animated Video Games. The Do-It-Yourself Java Games series of books uses a unique "discovery learning" approach to teach computer programming: learn Java

programming techniques more by doing Java programming than by reading about them. Through extensive use of fill-in blanks with answers at the back of the book, you will be guided to write complete programs yourself, starting with the first lesson. You'll create puzzle and game programs and discover how, when, and why Java programs are written the way they are.

This book presents a new study of one of the major themes of the Qur'an. The theme of Qur'anic pictures of the universe treated here pertains to as yet a little explored facet of Islamic cosmology. Through this particular thematic study of the Qur'an the author has made a significant contribution to the contemporary understanding of the scriptural foundation of Islamic cosmology and the present discourse on epistemology of scientific exegesis (tafsir 'ilmy) of the Qur'an. The book offers many new insights that will prove particularly helpful to those interested in deepening their understanding of Qur'anic perspectives on cosmology, the natural sciences, and religion and science. Osman Bakar, who earned a doctorate in Islamic philosophy from Temple University, Philadelphia, is currently Distinguished Professor and Director of Sultan Omar Ali Saifuddin Centre for Islamic Studies (SOASCIS) at Universiti Brunei Darussalam. He was formerly Deputy Vice Chancellor (Academic & Research) of University of Malaya, Malaysia Chair of Southeast Asian Islam at the Prince Talal al-Waleed Center for Muslim-Christian Understanding, Georgetown University, Washington DC, and Deputy Chief Executive Officer (CEO), International Institute of Advanced Islamic Studies, Malaysia (IAIS). An Emeritus Professor of Philosophy of Science at the Department of Science and Technology Studies, University of Malaya, he was also the founder of the university's Center for Civilizational Dialogue (1996). Dr Bakar is an author of 20 books and more than 300 articles on various aspects of Islamic thought and civilization, particularly Islamic science and philosophy and Islam in Southeast Asia. He was a member of the Council of 100 Leaders of the West-Islamic World Initiative for Dialogue founded by the World Economic Forum, Davos, Switzerland. He has been named several times among the 500 most influential Muslims in the world (including the latest 2016 edition). In 1994 he was made a Dato' by HH the Sultan of Pahang and in 2000 a Datuk by the Malaysian King. His two most well-known books, Classification of Knowledge in Islam and Tawhid and Science, have been translated into numerous languages. His latest books are Islamic Civilization and the Modern World: Thematic Essays (2014) and Islamic Perspectives on Science and Technology (co-editor, 2016). *A Dictionary of Computer Science* Kazi Publications Settle in for a series of spooky tales that will delight even the most discerning reader. *Sacred songs & solos nos. 1 and 2 combined. Compiled and sung by I.D. Sankey* Createspace Independent Publishing Platform

On July 26, 2003, the 50th anniversary of the Moncada Army Barracks raid in Santiago de Cuba, something unexpected happens. When Fidel Pérez and his brother accidentally tumble to their deaths from their Havana balcony, the neighbors' outcry, "Fidel has fallen," is misinterpreted by those who hear it. The misinformation quickly ripples outward, and it reawakens the city. Three Cubans in particular are affected by the news—an elderly vagrant Saturnina, Professor Pedro Valle, and his student Camilo—all haunted by the past and now forced to confront a new future, perhaps another revolution. Their stories are beautifully intertwined as they converge in the frantic crowd that gathers in La Plaza de la Revolución. By turns humorous and deeply poignant, *The Death of Fidel Pérez* reflects on the broken promises of the Cuban Revolution and reveals the heart of a people with a long collective memory.

*Song of Lawino and Song of Ocol* are among the most successful African literary works. *Song of Lawino* is an African woman's lamentation over the cultural death of her western educated husband - Ocol. In *Song of Ocol* the husband tries to justify his cultural apostasy. These songs were translated from Acholi by the author. They evince a fascinating flavour of the African rhythmical idiom.
