'The Road to Results:
Designing and Conducting Effective Development Evaluations'
presents concepts and procedures for evaluation in a development context. It provides procedures and examples on how to set up a monitoring and evaluation system, how to conduct participatory evaluations and do social mapping, and

how to construct a "rigorous" quasi-experimental design to answer an impact question. The text begins with the context of development evaluation and how it arrived where it is today. It then discusses current issues driving development evaluation, such as the Millennium Development Goals and the move from simple project evaluations to the broader understanding of complex

evaluations. The topics of implementing 'Results-based Measurement and Evaluation' and constructing a 'Theory of Change' are emphasized throughout the text. Next, the authors take the reader down 'the road to results,' presenting procedures for evaluating projects, programs, and policies by using a 'Design Matrix' to help map the process. This road includes: determining

the overall approach, formulating questions, selecting designs, developing data collection instruments, choosing a sampling strategy, and planning data analysis for qualitative, quantitative, and mixed method evaluations. The book also includes discussions on conducting complex evaluations, how to manage evaluations, how to present results, and ethical

behavior--including principles, standards, and guidelines. The final chapter discusses the future of development evaluation. This comprehensive text is an essential tool for those involved in development evaluation.

The World of the Hunger Games
Hachette UK
This book explores the current state of society in Europe in general and the regimes and societies

of the Western Balkans in particular. The pandemic and near-universal lockdown have provided an ideal cut-off date for the collection of indices from reputable academic sources that cover the nature of these regimes, individual human freedoms, economic freedoms, the rule of law, human rights and media freedoms. The aggregated findings from the 20 individual

indices provide comprehensive data to support original findings and the characterisation of societies in 45 European states. Admittedly, there are differences in the methodologies and samples among the indices consulted. Nonetheless, taken together they offer a solid basis for developing arguments concerning the diversity of regimes,

governance and societies in Europe and drawing well-founded conclusions on the nature of society in various parts of Europe. Though the book's main focus is on the Western Balkans, the region is put in a pan-European context. The issues of migration, minorities, global geopolitics, the crisis of liberal democracy – they all play into developments that are specific to the

Western Balkans. The book answers the question of whether the pandemic has allowed local regimes to strengthen their power and exert greater control over society, making it possible to formulate arguments regarding the future of Europe and its integrative processes. In closing, the book investigates Western Balkan regimes' reactions to the pandemic in the context

of governance, society and state power, before addressing the question of whether the future of the Western Balkans lies in the "liberal club", or whether local hybrid regimes will become even more influential in the near future.

who just can't understand what the fuss is about. Find out just how Hedgemond proves to the grumpy bear and the greedy boar that there is no place like home. Hedgemond's Home is a story about caring for the place you call home.
