Food Regimes re-
examines the agrarian
question historically and
its present-day

implications, introducing
regional interpretations of
the food regime,
incorporating gender,
labour, financial,
ecological and nutritional
dimensions into the
analysis.

Contested Mountains

ASCE Publications
In this collection of
studies, the
environmental,

institutional, social and
cultural aspects of
sustainability are
considered in a variety of
towns and cities in Asia,
Africa, the Middle East
and Central and South
America.

To do this urban agriculture must be cross-cutting and multi-functional, So how can policy be developed to include all the relevant sectors and disciplines, including agriculture, urban land use planning, health; waste management, social housing and slum upgrading, and parks and nature management? --

Infants and Children

DIANE Publishing

The Rapid Visual Screening (RVS) handbook can be used by trained personnel to identify, inventory, and screen buildings that are potentially seismically vulnerable. The RVS procedure comprises a method and several forms that help users to quickly identify, inventory, and score buildings according to their risk of collapse if hit by major earthquakes. The RVS handbook describes how to identify the structural type and key weakness characteristics, how to

complete the screening forms, and how to manage a successful RVS program.

Designing for Tsunamis

Itdg Working Papers

Illustrated in full color throughout. The primary purpose of this document is to provide a selected compilation of seismic rehabilitation techniques that are practical and effective. The descriptions of techniques include detailing and constructability tips that might not be otherwise available to engineering offices or individual

structural engineers who have limited experience in seismic rehabilitation of existing buildings. A secondary purpose is to provide guidance on which techniques are commonly used to mitigate specific seismic deficiencies in various model building types. *Hands on Food, Water and Finance* Practical Action Farmers' Choice outlines the RIPAT intervention, and examines how effective it has been. This evaluation of RIPAT brings together the analyses of economists, agricultural

scientists, and anthropologists who studied the impact, implementation, adoption, and spread of the programme approaches. Food Sovereignty Urban Management Analyses the roles of women and men in urban food production, and through case studies from three developing regions suggests how women's contribution might be maximized. *Food Regimes and Agrarian Questions* ITDG Publishing Provides design

professionals & local building officials with a standard methodology to evaluate buildings of different types & occupancies in areas of different seismicity throughout the U.S. Negotiating the Seed Treaty Practical Action Agriculture is an urgent global priority and farmers find themselves in the front line of some of the world's most pressing issues- climate change, globalization and food security. Twenty years ago, the Farmer First workshop held at the

Institute of Development Studies, University of Sussex, UK, launched a movement to encourage farmer participation in agricultural research and development (R & D), responding to farmers' needs in complex, diverse, risk-prone environments, and promoting sustainable livelihoods and agriculture. Since that time, methodological, institutional and policy experiments have unfolded around the world. Farmer First Revisited returns to the

debates about farmer participation in agricultural R & D and looks to the future. The book presents a range of experiences that highlight the importance of going beyond a focus on the farm to a wider innovation system, including market interactions as well as the wider institutional and policy environment. If, however, farmers are really to be put first, a politics of demand is required in order to shape the direction of these innovative systems.

Urban Settlements

ITDG Publishing

This volume contains some 700 abstracts from around the world relating to peoples animal healthcare, otherwise known as ethnoveterinary medicine. Each abstract, many of the substantial, contains where possible detail of the livestock's disease, the name of the treatment, its method of preparation and administration. The abstracts cover the treatment of animals in 115 countries. The bibliography is aimed at

all involved or interested in ethnoveterinary medicine: botanists, animal production professionals, veterinarians, anthropologists, social scientists, rural development professionals and anyone interested in Indigenous Knowledge. This book replaces ethnoveterinary medicine: An annotated bibliography, which was originally published in 1989 as the premier sourcebook in its field and will be of great use and interest to many active in

the Indigenous Knowledge field.

Flood Resistant Design and Construction

Studies in Indigenous Knowledge

Introduction : why agroecology? -- The scientific principles of agroecology -- The scientific evidence for agroecology : can it feed the world? -- Scaling up agroecology : social process and organization -
- The politics of agroecology --
Conclusions : conform or transform?

Farmers' Choice Practical

Drawing upon case studies from some twenty different countries, Making Planning Work shows why new urban development and planning skills are needed so urgently, and what can be done to grow such skills and enhance capacities. The guide will focus international attention on the urgent need to increase global understanding of sustainable urban development processes and pro-poor planning practices. It is for all those

engaged in the processes of planning and managing towns, cities and settlements: political leaders, professional planners, engineers, architects, lawyers, and many others in national, regional, and local government, non-governmental organizations, community-based organizations, and private sector consultancies and enterprises, all of whom have a vital contribution to making and maintaining sustainable settlements. Making

Planning Work demonstrates ways in which professionals and NGOs are creating and delivering innovative responses, often in situations of extremely scarce and conflictive competition for access to resources. Its tone is optimistic, but not utopian. The global challenge of urbanization is daunting, but it shows that imagination and skills can make an impact. In addition to being a stand-alone book, Making Planning Work is also an introduction to an

interactive website www.communityplanning.net that enables readers to contribute and discuss their own experiences and ideas.

and-washer Pump

Government Printing Office

This full color manual is intended to explain the principles of seismic design for those without a technical background in engineering and seismology. The primary intended audience is that of architects, and includes practicing architects, architectural students and faculty in architectural schools who teach structures and seismic design. For this reason the text and graphics are focused on those aspects

of seismic design that are important for the architect to know.

Making Planning Work

* The lime "bible" * Essential for restorers of historic buildings and anyone working with traditional materials Lime has been used in building for thousands of years and, used well, it continues to be the best and most versatile binder in the world. "Building with Lime" is an invaluable source of practical advice for those

considering lime as a building material, and a general reference to the broad range of uses for lime in construction. It shows how to make the best use of different types of lime, whether extracted locally or transported from further afield. * Designed for builders, architects, surveyors, engineers and manufacturers around the world and for those maintaining old buildings * Clear explanation of all the major uses of lime in building, including mortars and plasters,

painting and finishes, ceiling and foundations, repair, maintenance and conservation * How to recognize limestone, carry out field tests and meet national standards * Numerous examples, line illustrations and photographs * Other sources of information and help, including an extensive glossary, bibliography, helpful appendices and index * The new larger page size, improved layout and essential updating of this revised edition make "Building with Lime" the

'lime bible.'

 This report analyses the findings of an extensive research project conducted by Oxfam in Ethiopia in the context rising external debt communities, both rural and urban, were interviewed about their problems in gaining access to basic health care, reproductive-health services and primary education.
Seismic Evaluation of Existing Buildings ITDG Publishing

Analytical perspectives on the major peasant and agrarian development debates, provide insight into peasant studies and the western biases that have permeated it. Case studies illustrate the pressures and opportunities that have befallen peasants, leading

them to diversify into a number of occupations and non-agricultural income-earning avenues. **Farmer First Revisited** Practical Action Publishing Accompanying CD-ROM contains ... "reviews of the literature and state of the art of participatory urban planning; case

study reports; projects reports and the international workshop report; ... [and] an interactive version of the 'introduction' to the publication as well as an interactive 'introduction and summary' of the contents."--Page 3 of cover.
