Clinical Cases and OSCEs in Surgery E-Book CRC Press

A 64-year-old woman has been referred to the on-call general surgical team by her GP. She has been complaining of pain in the upper part of her abdomen and generalized itching. Her daughter has also noticed a yellowish discolouration of her skin. The symptoms started a week ago and are gradually getting worse. You have been assigned her initial assessment.

Essential Revision Notes for Intercollegiate MRCS CRC Press

100 Cases in Clinical Medicine is an indispensable revision tool for medical students preparing for clinical examinations or OSCEs.

Using scenarios which mimic daily life, the cases will interest students in clinical problems and help them develop their clinical reasoning skills, with each case presenting details of a patient's medical history and the key findings of a clinical examination, together with initial investigation results for evaluation. Key questions then prompt the student to evaluate the patient, and reach a decision regarding their condition and the possible management plan, while the answer pages will help the student to understand the processes that a clinician goes through in dealing with the problems presented. Contents are organised to provide a quick review of each body system, with a selection of cases relevant to that specific system, then the majority are presented randomly to mimic real life in a GP surgery or emergency department. New to this edition: a review of each

body system as well as random cases; new page design with a second colour used throughout; and brought up-to-date with 25% new cases.

Book 2 Churchill Livingstone

Offers comprehensive lists in subjects that appear frequently in the MRCS Written, Viva and Clinical examinations. This book covers a spectrum of surgery from basic sciences through to the clinical aspects. It provides a last minute refreshment of the important and common topics in the days leading up to each examination.

MRCPCH Clinical Elsevier Health Sciences

A new, fully updated edition of Baliga's very popular collection of short cases arranged by clinical area, emphasising the key diagnostic features of clinical conditions as commonly presented in the short-case part of the Final MB and MRCP examinations. Also included are likely instructions or commands expected from the examiner for each condition, and the key points which the candidate must tell the examiner. A must-have for the final-year undergraduate and trainee doctor. From customer reviews of the previous edition: 'This book is the most useful guide that money can buy for the final exams in the current MBChB undergraduate course. It covers important areas of clinical medicine in a question based format and highlights classical scenarios. The questions raised are classical of examiners in the long and short case examinations. This is a must buy for any undergraduate medical student!!!!' 'The book is a must during the period that the young doctor or student is on the wards. It allows one to focus on the important physical findings and the relevant clinical pearls associated with the different medical conditions met... It

discusses important physical findings and their diagnostic importance. I have found it useful in preparing for attending ward rounds and also for sharpening my clinical skills. The discussion section is well organised such that undergraduates as well as postgraduates can benefit and the material is up to date with good references for further reading.' 'Excellent preparation for finals as well the MRCP ...MUST HAVE before MRCP PACES.' Features Ideal for use in the ward. Each of the 250 cases presents a disease or topic which is covered consistently to address: ● salient features ● history ● examination ● diagnosis ● questions covering investigations and differentiations ● advanced-level questions ● management. New to this edition: Over 350 new images Enhanced advanced-level questions Many more tables

Macleod's Clinical Examination E-Book CRC Press

'The MRCS Clinical Examination is the final requirement to obtain the professional qualification for the Intercollegiate Membership of the Royal College of Surgeons. This Membership allows the transition from doctor to surgeon and a career in higher surgical training. This standardised clinical examination requires candidates to demonstrate their ability in examining patients, with effective and clear communication. 'The authors should be commended on producing a book that covers all clinical sections of the Examination, in such a concise, comprehensive and structured manner. This study guide will serve as your personal tutor working closely with you, prompting and providing pointers to improve your examination technique. It includes dozens of clinical scenarios, demonstrating how to examine the system and avoid common mistakes. In addition, the candidates can improve

their communication skills, which is an integral part of this Examination. This book complements the "Insider Medical MRCS Clinical Course". It simulates the actual test conditions by providing sample cases and answers, coupling identification of weaknesses and strengths. This book will also prove to be extremely valuable for the new-style MRCS OSCE' - Nigel Mendoza in his Foreword.

The Candidate's Guide JP Medical Ltd

This practical ENT reference guide includes over 100 clinical case scenarios, ranging from basic ENT issues to more challenging clinical cases, presented randomly as they would occur in real life. Each scenario includes thought-provoking questions followed by reasoned answers and is superbly illustrated with diagrams and high quality photographs. This is an invaluable text for otorhinolaryngologists in practice and in training, from hospital-based surgeons preparing for higher examinations to established physicians for their continuing professional development.

Clinical Cases and Osces in Surgery JP Medical

This book is highly regarded as an authoritative and comprehensive text for higher surgical examinations, and an excellent practical guide for surgical trainees. It has been extensively revised and updated to conform with the new regulations of the FRCS and includes the latest advances in surgery. Reviews of first edition: 'This enterprising new book is unashamedly designed to assist the candidate to pass the Final FRCS....' Annuals of the Royal College of Surgeons of England. This book is an outstanding companion for all Specialty Registrars in their journey to specialisation and Intercollegiate FRCS Examinations, the main practical guide for all Surgeons-in-

Training and principal mini-textbook for all Basic Surgical Trainees in their preparation for MRCS/AFRCS examinations.

*New exam regulations for British Colleges of Surgeons (includes requirements of international boards) * Many new topics

included, e.g. metabolic response to trauma, minimally invasive surgery, day surgery, audit, high risk patients and risk scoring

*Full section on current surgical training and accreditation in general surgery and its sub-specialties

Reviews of first edition: 'This enterprising new book is unashamedly designed to assist the candidate to pass the Final FRCS....' Annuals of the Royal College of Surgeons of England. '....a well researched and comprehensive guide to the final fellowship examinations...facts mixed with a good common sense guidance...' British Journal of Surgery.

The Essential Guide to the Oral and Clinical Neurosurgical Exam CRC Press

Surgical Short Cases for the MRCS Clinical Examination

250 Cases in Clinical Medicine Cambridge University Press

Updated focusing on the learning needs of the new format MRCPCH Clinical examination. To maximise revision time, 3 parts represent the Clinical exam stations: Part 1 History Taking & Management Planning; Part 2 Communication Skills; Part 3 Clinical Stations. Written by paediatricians with experience of teaching and helping to run previous exams.

FRCS (Oral & Maxillofacial Surgery) Part 2 PasTest Ltd

The FRCS Oral and Maxillofacial Surgery (OMFS) exam is split into three parts: written, viva and mock clinical consultations with an

examiner and an actor in the role of a patient. These consultations fall into two formats: 'short case', where the examiner poses questions specific to the patient's case, and 'long case' where the candidate must diagnose the patient's presenting problem and suggest an appropriate course of treatment. *FRCS (Oral & Maxillofacial Surgery) Part 2: 100 Clinical Cases* focuses on the clinical component of the exam and is structured according to the FRCS OMFS syllabus. Each chapter starts with cases devoted to examination of the patient, history taking and investigations. Subsequent cases feature 'short case' clinical scenarios commonly encountered in the exam. Where relevant to exam practice, a 'long case' is included at the end of each chapter. The 'short cases' feature mock questions, while the 'long cases' also include an examiner's mark sheet listing the answers and actions candidates must perform to achieve full marks. First book to cater specifically for the clinical component of the FRCS OMFS exam. Ideal for practising scenarios with colleagues and taking turns to play role of either candidate or examiner.

Examination Surgery CRC Press

Focuses on the learning needs of the MRCPCH clinical exam. This book features the most common short cases with notes on examination technique, useful background information and summaries of cases seen in exams focussing on practical approach.

Short Cases in Clinical Medicine Elsevier Health Sciences

Offers an introduction covering the MRCS exam with particular reference to OSCEs; an overview of clinical skills in history taking and physical examination; chapters covering sections of the

exam with popular cases in the OSCE format at the end of each chapter; and, a layout with colour images.

A Bailey & Love Revision Guide, Second Edition CRC Press
Surgical diagnoses are often made on the basis of clinical assessment alone and thus achieving competence in clinical skills remains imperative to good practice in surgery. This book of over 140 cases is designed for candidates preparing for all surgical examinations, whether at undergraduate, postgraduate or exit examination level. It will demystify and simplify the clinical assessment of surgical cases and provides invaluable advice on how to achieve success. The text includes top tips, acronyms and up-to-date summaries of current practice based on the authors' personal experience of surgical examinations. All the cases are graded in terms of likely appearance in the examinations. Top tips emphasize specific subjects which often cause confusion. The text includes both commonly asked and advanced questions relating to each case. Examples of the common procedures and props that come up in the skill-based examination format are included. This fully revised Third Edition now includes 175 photographs of clinical cases and signs as well as key manoeuvres performed during specific surgical examination routines.

Birmingham Medical Review World Scientific

This book of over 140 cases is designed for candidates preparing for all surgical examinations, whether at undergraduate, postgraduate or exit examination level. It will demystify and simplify the clinical assessment of surgical cases and provides invaluable advice on how to achieve success. The text includes top tips, acronyms and up-to-date summaries of current practice

based on the authors' personal experience of surgical examinations. Cases are graded in terms of likely appearance in the examinations. Top tips emphasize specific subjects which cause confusion. The text provides advice on the most appropriate time to finish an examination. Examples of the common procedures and props that come up in the skill-based examination format are included. This fully revised Second Edition is now in colour and includes photographs of key manoeuvres performed during specific surgical examination routines. Includes a new section on communication skills. A new co-author in academic surgery joins the project.

Medical Press and Circular Elsevier Health Sciences

With over 1000 questions, MCQs and EMQs in Surgery is the ideal self-assessment companion guide to Bailey & Love's Short Practice in Surgery. The book assists readers in their preparation for examinations and to test their knowledge of the principles and practice of surgery as outlined within Bailey & Love. Sub-divided into 13 subject-specific sections, both MCQs and EMQs provide a comprehensive coverage of the surgical curriculum as well as the core learning points as set out in Bailey & Love: Each section emphasises the importance of self-assessment within effective clinical examination and soundly based surgical principles, while taking into account the latest developments in surgical practice. MCQs and EMQs in Surgery is an excellent companion to Bailey & Love and provides a valuable revision tool for those studying for MRCS.

The Journal of Mental Science JP Medical Ltd

This new addition to the popular 100 cases series explores common clinical scenarios that will be encountered by the

medical student and junior doctor during practical training in the emergency department, in the community and in intensive and critical care settings, and which are likely to feature in qualifying examinations. The book covers a broad range of presentations, organized by sub-specialty area for ease of reference.

Comprehensive answers highlight key take home points from each case and provide practical advice on how to deal with the challenges that occur when practising emergency and critical care medicine at all levels.

History Taking and Communication Skill Stations for Internal Medicine Examinations Pastest

Macleod's Clinical Diagnosis is an innovative new book

complementing its companion sister textbook, the internationally-respected Macleod's Clinical Examination. It is a practical manual of clinical assessment that describes how common presenting problems are evaluated and diagnosed in modern clinical practice. This book will be an invaluable resource for senior medical students and junior doctors as they attempt to make the difficult transition from mastering basic clinical skills to assessing patients in the real world of clinical medicine. The format of the book is as follows: Part 1: The principles of clinical assessment: in addition to defining the scope and remit of the book this initial group of chapters invites readers to reconsider the overall aims of clinical assessment, the contribution that each element of the assessment can make to these aims and how the approach must be adapted to fit the clinical context. It also touches on diagnostic theory and explains some different approaches to diagnosis. Part 2: How to assess common presenting problems: this section forms the core of the book and consists of a series of 'diagnostic

guides' covering the major presenting problems in medicine and surgery; these provide the reader with a system for how to use the tools of history-taking, physical examination and routine tests to arrive at a logical differential diagnosis. The guides also cover some limited 'post-diagnosis information' in the form of severity/prognostic indicators. A unique book allowing a reader to apply the skills of clinical examination in the formulation of a differential diagnosis and placing a patient's symptoms in context. Takes a problem-based approach to diagnostic reasoning, reflecting both modern medical and current educational practices. Builds on the clinical skills outlined in the companion Macleod's Clinical Examination textbook.

Essential Revision Notes Elsevier

This second edition presents medical students and trainees with step by step long cases in general surgery. Thoroughly revised, the second edition covers inguinal hernia, thyroid gland, breast cancer, stomach, jaundice, varicose veins and more. More than 270 full colour images and illustrations enhance learning - the previous edition published in 2008. Key points New, revised edition presenting medical students and trainees with long cases

in general surgery Includes more than 270 full colour images and illustrations Previous edition published in 2008

Long Cases in General Surgery CRC Press

A helpful learning manual for undergraduates and PG students preparing for FCPS, MD, MRCP, FRACP or any other equivalent exam in Internal Medicine. A completely new section (Section B) is included. The first section (Section A) contains short clinical cases, followed by relevant questions, their answers and brief discussions. Section B contains Data Interpretation, ECG, X-ray, coloured photograph of common diseases and few instruments, which are helpful for undergraduate students. An easy book to learn the approach to diagnosis and management of common short cases. Cases have been described in the way a student is expected to approach a medical situation in examinations as well as in day-to-day practice. Provides short notes on various common diseases, which will help the students to get a comprehensive knowledge without going through extensive textbooks. Have about 700 colored photographs and a few X-rays, CT scans, etc. to help students to develop a good clinical eye. Easy to understand, concise, yet full of necessary information.
