Critical Reading and Writing is a fully introductory, interactive textbook that explores the power relations at work in and behind the texts we encounter in our everyday lives. Using examples from numerous genres - such as popular fiction, advertisements and newspapers - this textbook examines the language choices a writer must make in structuring texts, representing the world and positioning the reader. Assuming no prior knowledge of linguistics, Critical Reading and Writing offers guidance on how to read texts critically and how to develop effective writing skills. Features include: * activities in analysis, writing and rewriting * an appendix of comments on activities * further reading sections at the end of each unit * a glossary of linguistics terms * suggestions for five extended writing projects. Written by an experienced teacher, Critical Reading and Writing has multidisciplinary appeal but will be particularly relevant for use on introductory English and Communications courses.

The study of corporate governance is a relatively modern development, with significant attention devoted to the subject only during the last fifty years. The topics covered in this volume include the purpose of the corporation, the board of directors, the role of shareholders, and more contemporary developments like hedge fund activism, the role of sovereign wealth funds, and the development of corporate governance law in what

perhaps will become the dominant world economy over the next century, China. The editor has written an introductory essay which briefly describes the intellectual history of the field and analyses the material selected for the volume. The papers which have been selected present what the editor believes to be some of the best and most representative studies of the subjects covered. As a result the volume offers a rounded view of the contemporary state of the some of the dominant issues in corporate governance.

This text provides students with a solid understanding of the relationship between the structure, processing, and properties of materials. Authors Donald Askeland and Pradeep Fulay teach the fundamental concepts of atomic structure and materials behaviors and clearly link them to the materials issues that students will have to deal with when they enter the industry or graduate school (e.g. design of structures, selection of materials, or materials failures). While presenting fundamental concepts and linking them to practical applications, the authors emphasize the necessary basics without overwhelming the students with too much of the underlying chemistry or physics. The book covers fundamentals in an integrated approach that emphasizes applications of new technologies that engineered materials enable. New and interdisciplinary developments in materials field such as nanomaterials, smart materials, micro-electro-mechanical (MEMS) systems, and biomaterials are also discussed. This book was conceptualized and published in a very short period. Time was of essence given the situation of Corona pandemic across the world and the way it is affecting education. I am extremely grateful to all my friends and colleagues who have supported me with sharing their experiences of the transformational process being used at their work places. The support of my wife Dr. Savita Singh who is a government school teacher in K12 education was of immense value. Experience shared by my two sons, Shikhar and Uddhav, who are right now experiencing the shift from regular classes to online classes was of great help. My colleague Dr. Sunita Shukla who is Head of Management Department at ITS Engineering College shared some very important experiences of students as well as faculty members during the transition period to online teaching. My younger brother Dr. Ashish Kumar who is teaching at Amity University Jaipur helped me with his thoughts and ideas for student engagement chapter. My dear friend Dr. .Farhat Mohsin from Manav Rachna University helped me with her ideas about role that academic administrators should play to ensure effective teaching-learning process during the lockdown periods. Dr. Animesh from Sharda University was very supportive and brought out the experiences faced by their students and teachers in using Zoom for conducting lectures. I received amazing help from my father Sh. S. P. Singh in editing the manuscript in a very insightful way. This book would have been something very different without the support of these lovely people. Thanks to everyone who helped and encouraged me. I also received insights and inspiration from some relevant blogs on the subject. I am deeply grateful to colleagues from all over the country who shared their online experiences and how their students are coping with this sudden disruption in normal regular classroom education.
