 A deeply moving family story of happiness and heartbreak,
 Behind the Scenes at the Museum is bestselling author Kate
 Atkinson's award-winning literary debut. National Bestseller
 Winner of the Whitbread Book of the Year Ruby Lennox begins
 narrating her life at the moment of conception, and from there
 takes us on a whirlwind tour of the twentieth century as seen
 through the eyes of an English girl determined to learn about her
 family and its secrets. Kate Atkinson's first novel is "a
 multigenerational tale of a spectacularly dysfunctional Yorkshire
 family and one of the funniest works of fiction to come out of
 Britain in years" (The New York Times Book Review).

The Grand Design, by eminent scientist Stephen Hawking, is the
 latest blockbusting contribution to the so-called New Atheist
 debate, and claims that the laws of physics themselves brought
 the Universe into being, rather than God. In this swift and
 forthright reply, John Lennox, Oxford mathematician and author
 of God's Undertaker, exposes the flaws in Hawking's logic. In
 lively, layman's terms, Lennox guides us through the key points
 in Hawking's arguments - with clear explanations of the latest

scientific and philosophical methods and theories - and demonstrates that far from disproving a Creator God, they make his existence seem all the more probable.

This book is the first to give a comprehensive account of subnormal subgroups of both finite and infinite groups. The authors trace the historical development of the subject from the early work of Wielandt, including the celebrated join problem, to very recent results relating to the elusive subnormalizer of a subgroup. The book explains how the study of group rings can give a powerful and unified approach to major problems and encourages postgraduates and researchers in group theory and ring theory to further explore problems whose solutions remain incomplete.

A Novel (Booker Prize Winner) Zondervan

Absence is as crucial as presence. The decision to stop dating has made Vaughn Hargrave's life infinitely simpler: he has friends, an excellent wardrobe, and a job in the industry he loves. That's all he really needs, especially since sex isn't his forte anyway and no one else seems interested in a purely romantic connection. But when a piece is stolen from his art gallery and insurance investigator Jonah Sondern shows up, Vaughn finds himself struggling with that decision. Jonah wants his men like his coffee: hot, intense, and daily. But Vaughn seems to be the one gay guy in Toronto who doesn't do hookups, which is all Jonah can offer. No way can Jonah give Vaughn what he really wants, not when Jonah barely understands what love is. When another painting goes missing, tension ramps up both on and off the clock. Vaughn and Jonah find themselves grappling not just with stolen art, but with their own differences. Because a guy who wants nothing but romance and a guy who wants nothing but sex will never work--right? Not unless they find a way to fill in the spaces between them.

God's Story Revealed Routledge

A pioneer in the tradition of English women's fiction, Charlotte Lennox was valued friend to both Samuel Richardson and Samuel Johnson and a major influence on Jane Austen. The heroine of Charlotte Lennox's *Henrietta* is a young Englishwoman who resists her aunt's pressure to convert to Catholicism and is set adrift in London society. But unlike many of her passive, vulnerable contemporaries in fiction, the admirable *Henrietta* makes her way in the world relying on her own cleverness, conviction, and wit. This groundbreaking work of satire and human folly is republished here in a fully annotated modern edition.

NATIONAL BESTSELLER WINNER OF THE BOOKER PRIZE "A must-read about modern Britain and womanhood . . . An impressive, fierce novel about the lives of black British families, their struggles, pains, laughter, longings and loves . . . Her style is passionate, razor-sharp, brimming with energy and humor. There is never a single moment of dullness in this book and the pace does not allow you to turn away from its momentum." —Booker Prize Judges Bernardine Evaristo is the winner of the 2019 Booker Prize and the first black woman to receive this highest literary honor in the English language. *Girl, Woman, Other* is a magnificent portrayal of the intersections of identity and a moving and hopeful story of an interconnected group of Black British women that paints a vivid portrait of the state of contemporary Britain and looks back to the legacy of Britain's colonial history in Africa and the Caribbean. The twelve central characters of this multi-voiced novel lead vastly different lives: Amma is a newly acclaimed playwright whose work often explores her Black lesbian identity; her old friend Shirley is a teacher, jaded after decades of work in London's funding-deprived schools; Carole, one of Shirley's former students, is a successful investment banker; Carole's mother Bummi works as a cleaner and worries about her daughter's lack of rootedness despite her obvious achievements. From a nonbinary social media influencer to a 93-year-old woman living on a farm in Northern England, these unforgettable characters also intersect in shared aspects of their identities, from age to race to sexuality to class. Sparklingly witty and filled with emotion, centering voices we often see othered, and written in an innovative fast-moving form that borrows technique from poetry, *Girl, Woman, Other* is a polyphonic and richly textured social novel that shows a side of Britain we rarely see, one that reminds us of all that connects us to our neighbors, even in times when we are encouraged to be split apart.

Atheism is on the march in the western world, and its enemy is God. Religion, the "New Atheists" claim, "is dangerous", it "kills" or "poisons everything". And if religion is the problem with the world, their answer is simple: get rid of it. But are things really so straightforward? Tackling the likes of Richard Dawkins, Stephen Hawking, Christopher Hitchens, and Daniel Dennett head on, John Lennox highlights the fallacies in their approach, arguing that their irrational and unscientific methodology leaves them guilty of the same obstinate foolishness of which they accuse dogmatic religious folks. Erudite and wide-ranging, Gunning for God packs some debilitating punches. It also puts forward new ideas about the nature of God and Christianity that will give the New Atheists' best friends and worst enemies alike some stimulating food for thought.

Colouring the Caribbean offers the first comprehensive study of Agostino Brunias's intriguing pictures of colonial West Indians of colour - so called 'Red' and 'Black' Caribs, dark-skinned Africans and Afro-Creoles, and people of mixed race - made for colonial officials and plantocratic elites during the late-eighteenth century. Although Brunias's paintings have often been understood as straightforward documents of visual ethnography that functioned as field guides for reading race, this book investigates how the images both reflected and refracted ideas about race commonly held by eighteenth-century Britons, helping to construct racial categories while simultaneously exposing their constructedness and underscoring their contradictions. The book

offers provocative new insights about Brunias's work gleaned from a broad survey of his paintings, many of which are reproduced here for the first time.

Dream Sight Manchester University Press

What did the writer of Genesis mean by "the first day"? Is it a literal week or a series of time periods? If I believe that the earth is 4.5 billion years old, am I denying the authority of Scripture? In response to the continuing controversy over the interpretation of the creation narrative in Genesis, John Lennox proposes a succinct method of reading and interpreting the first chapters of Genesis without discounting either science or Scripture. With examples from history, a brief but thorough exploration of the major interpretations, and a look into the particular significance of the creation of human beings, Lennox suggests that Christians can heed modern scientific knowledge while staying faithful to the biblical narrative. He moves beyond a simple response to the controversy, insisting that Genesis teaches us far more about the God of Jesus Christ and about God's intention for creation than it does about the age of the earth. With this book, Lennox offers a careful yet accessible introduction to a scientifically-savvy, theologically-astute, and Scripturally faithful interpretation of Genesis.
