These nine essays consider for the first time the day-to-day performing practice of English composers of choral music of the period 1440-1650.

*Letter to Artists* The Church of Jesus Christ of Latter-day Saints

Christian Congregational Music explores the role of congregational music in Christian religious experience, examining how musicians and worshippers perform, identify with and experience belief through musical praxis. Contributors from a broad range of fields, including music studies, theology, literature, and cultural anthropology, present interdisciplinary perspectives on a variety of congregational musical styles - from African American gospel music, to evangelical praise and worship music, to Mennonite hymnody - within contemporary Europe and North America. In addressing the themes of performance, identity and experience, the volume explores several topics of interest to a broader humanities and social sciences readership, including the influence of globalization and mass mediation on congregational music style and performance; the use of congregational music to shape multifaceted identities; the role of mass mediated congregational music in shaping transnational communities; and the function of music in embodying and imparting religious belief and knowledge. In demonstrating the complex relationship between 'traditional' and 'contemporary' sounds and local and global identifications within the practice of congregational music, the plurality of approaches represented in this

book, as well as the range of musical repertoires explored, aims to serve as a model for future congregational music scholarship.

Congregational Connections challenges both clergy and lay leaders to become deeply sensitized to the demographic reality of six separate generational cohorts being alive at once. This is the first time in the world's history that such a thing has happened to humans, and none of us has the reality clear in our minds yet. It takes work to analyze consciously what we are seeing when multiple generations are present. We discover that we are quite happy when we see the expected three Elders, Parents raising kids, and the children themselves-- and we often fail to ask: Who isn't here? Demographers and marketers have created names for these six cohorts (a cohort is a group of people born within a 20 or 25 year span who have some distinctive characteristics). In America today we have Builders (approximately ages 110-87); Silents (86-68); Boomers (67- 51/48); GenXers (51/48 27); Millennials (27- 11) and GenZ (10 and under). The first three Builders, Silents and Boomers are referred to in Congregational Connections as Olders; and the second three (GenX, Millennials and GenZ) are referred to as Youngers. A great shift in worldview and preferred technologies separates Olders and Youngers. Today five of these cohorts (the youngest Builders, Silents, Boomers, GenX and the oldest Millennials) are playing adult roles in a world that recently seemed to be populated by Elders and Parents raising Children. It is making everyone grumpy. There does not seem to be psychological room for all these players. The March 2011 cover of Philadelphia Magazine pictured a generic texting device with the following text: Dear Baby Boomers, just die already. (Well take Philly from here. Thanks) XOXO, Generation X In congregation after congregation, Olders are wondering why the Youngers don't seem to be attending worship regularly. Yet when they do come, the Olders wish they would make their children stop texting and the parents would stop checking their cell phones. Youngers are wondering why Olders want to have all these time-wasting repetitive meetings and won't use e-technologies to avoid them. And why aren't they being respected? Congregational Connections offers a discussion of who these cohorts are, and why they act the way they do. Its nine chapters cover: How We Got Here; Six Different Cohort Experiences; The Generational Divide; Realities for Congregational Life; Worship; Christian Formation; Programs and Space; Community is Congregation, and The Way Forward: Hope. The book's aim is not only to have readers become aware of the six cohorts and their different attitudes and needs, but also to offer insights through Congregational Moments (case studies) that let readers see how these realities play out in church life, and suggest questions for discussion. Why is it happening now? In her book, *The Great Emergence*, Phyllis Tickle offers us a thesis that we are in the middle of the next Reformation. These happen every five hundred years, and take about 150 years to roll their paradigm shift of technology and worldview through society. The last Reformation was fueled by printing technology that promoted widespread literacy and a worldview shift that supported increasing political democracy and social leveling. The one that we are living through now is about electronic technology (radio, phone, television, computers, internet, and who knows?) and an even flatter social environment. Those changes by themselves seem sufficient to make the Second Reformation happen. Yet added to their pressures is the arrival of six generational cohorts on the world's playing field. Each cohort has its own identity, but Olders and Youngers break into two different sides of the game. What's more, by the time the Second Reformation finishes rolling through, medical advances may add several decades to the average lifespan. Perhaps eight, nine or even more generational cohorts will be alive together at its end. Right now, congre

Focusing on the reception of Palestrina, this bold interdisciplinary study explains how and why the works of a sixteenth-century composer came to be viewed as a paradigm for modern church music. It explores the diverse ways in which later composers responded to his works and style, and expounds a provocative model for interpreting compositional historicism. In addition to presenting insights into the works of Bruckner, Mendelssohn and Liszt, the book offers fresh perspectives on the institutional, aesthetic and ideological frameworks sustaining the cultivation of choral music in this period. This publication provides an overview and analysis of the relation between the Palestrina revival and nineteenth-century composition and it demonstrates that the Palestrina revival was just as significant for nineteenth-century culture as parallel movements in the other arts, such as the Gothic revival.

*Walk Together Children: Black and Womanist Theologies, Church, and Theological Education* draws on the long religious, cultural, and singing history of blacks in the U.S.A. Through the slavery and emancipation days until now, black song has both nurtured and enhanced African American life as a collective whole. Communality has always included a variety of existential experiences. What has kept this enduring people in a corporate process is their walking together through good times and bad, relying on what W. E. B. DuBois called their "dogged strength" to keep "from being torn asunder." Somehow and somehow they intuited from historical memory or received from transcendental revelation that keeping on long enough on the road would yield ultimate fruit for the journey.

Singing the same song is a central part of the worship practice for members for the Cherubim and Seraphim Christian Church in Lagos, Nigeria. Vicki L. Brennan reveals that by singing together, church members create one spiritual mind and become unified around a shared set of values. She follows parishioners as they attend choir rehearsals, use musical media—hymn books and cassette tapes—and perform the music and rituals that connect them through religious experience. Brennan asserts that church members believe that singing together makes them part of a larger imagined social collective, one that allows them to achieve health, joy, happiness, wealth, and success in an ethical way. Brennan discovers how this particular Yoruba church articulates and embodies the moral attitudes necessary to be a good Christian in Nigeria today.

Robert Berglund says a worship service is not a concert time. It is not an hour of entertainment. It is a time to worship God in spirit and in truth. In the Christian realm, however, the worship service seems to be a musical battleground. On one hand, church music is seen as utilitarian. Its only purpose is to allow worship to begin or continue throughout a church service. On the other hand, music can exist purely for entertainment. But is a worship service the place for entertainment? Shouldn't a worship service be designed only to worship God? A Philosophy of Church Music presents an integrated look at church music. Theological, philosophical, and psychological responses to the question of appropriate and consistent church music are considered to assist you in developing your personal church music philosophy. - Jacket.
