 Question  
 Integrated circuit -  
 Integrated circuit -

Microprocessor circuits:  
Microprocessors are the  
most-complicated ICs.  
They are composed of  
billions of transistors that

have been configured as  
thousands of individual  
digital circuits, each of  
which performs some

specific logic function. A  
microprocessor is built  
entirely of these logic  
circuits synchronized to  
each other.
