New Perspectives in
Biblical and Rabbinic
Hebrew UCL Press

This volume aims to
broaden the focus of

existing loanword
research, which has
mainly been conducted
from a systemic and
structuralist
perspective. The eight
studies in this volume
introduce
onomasiological,
phraseological, and
methodological
innovations to the
study of lexical
borrowing. These new
perspectives
significantly enhance
our understanding of
lexical borrowing and
provide new insights
into contact-induced
variation and change.

New Perspectives on
Willingness to
Communicate in a
Second Language

UCL Press

This edited collection explores the immense potential of translanguage in educational settings and highlights teachers and students negotiating language ideologies in their everyday communicative practices. It makes a significant contribution to scholarship on translanguage and considers the need for pedagogy to reflect and embrace diversity. The chapters provide rich empirical research and document translanguage in varied educational contexts, with studies from pre-school to adult education in different, mainly European, countries, where English is not the dominant language. Together

they expand our understanding of translanguage and how it can be applied to a variety of settings. This book will be of interest to students and researchers, especially in education, language education and applied linguistics, as well as to professionals and policymakers.

McGraw Hill

Professional

Hebrew manuscripts are considered to be invaluable documents and artefacts of Jewish culture and history. Research on Hebrew manuscript culture is progressing rapidly and therefore its topics, methods and questions need to be enunciated and reflected upon. The case studies

assembled in this volume explore various fields of research on Hebrew manuscripts. They show paradigmatically the current developments concerning codicology and palaeography, book forms like the scroll and codex, scribes and their writing material, patrons, collectors and censors, manuscript and book collections, illuminations and fragments, and, last but not least, new methods of material analysis applied to manuscripts. The principal focus of this volume is the material and intellectual history of Hebrew book cultures from antiquity to the Middle Ages and Early Modern Period, its intention being to heighten and sharpen the reader's

understanding of Jewish social and cultural history in general.

Ginseng and Borderland "O'Reilly Media, Inc."

A growing number of language varieties with diverse backgrounds and structural typologies have been identified as mixed. However, the debate on the status of many varieties and even on the existence of the category of "mixed languages" continues still today. This volume examines the current state of the theoretical and empirical debate on mixed languages and presents new advances from a diverse set of mixed language varieties. These cover well-known mixed languages, such as Media Lengua, Michif,

Gurindji Kriol, and Kallawaya, and varieties whose classification is still debated, such as Reo Rapa, Kumzari, Jopará, and Wutun. The contributions deal with different aspects of mixed languages, including descriptive approaches to their current status and origins, theoretical discussions on the language contact processes in them, and analysis of different types of language mixing practices. This book contributes to the current debate on the existence of the mixed language category, shedding more light onto this fascinating group of languages and the contact processes that shape them.

New Perspectives on Type Identity Cengage

Learning Comparative Approaches to Informal Housing Around the Globe brings together historians, anthropologists, political scientists, sociologists, urban planners and political activists to break new ground in the globalisation of knowledge about informal housing. Providing both methodological reflections and practical examples, they compare informal settlements, unauthorised occupation of flats, illegal housing construction and political squatting in different regions of the world. Subjects covered include squatter settlements in Kyrgyzstan and Kazakhstan, squatting

activism in Brazil and Spain, right-wing squatting in Germany, planning laws and informality across countries in the Global North, and squatting in post-Second World War UK and Australia.

New Perspectives on Lexical Borrowing Intl Food Policy Res Inst HTML and CSS are the workhorses of web design, and using them together to build consistent, reliable web pages requires both skill and knowledge. The task is more difficult if you're relying on outdated, confusing, and unnecessary HTML hacks and workarounds. Author Ben Henick shows you how to avoid those traps by going beyond the standard tips, tricks, and techniques to connect the

underlying theory and design of HTML and CSS to your everyday work habits. With this practical book, you'll learn how to work with these tools far more effectively than is standard practice for most web developers. Whether you handcraft individual pages or build templates, HTML & CSS: The Good Parts will help you get the most out of these tools in all aspects of web page design—from layout to typography and to color. Structure HTML markup to maximize the power of CSS Implement complex multi-column layouts from scratch Improve site production values with advanced CSS techniques Support formal usability and accessibility requirements with

tools built into HTML and CSS Avoid the most annoying browser and platform limitations

New Perspectives on HTML and XHTML The Tobin Project

The 'new perspectives' series provides a critical thinking, problem solving approach to learning and applying computer skills in a real environment.

New Perspectives on Creating Web Pages with HTML Springer Science & Business Media

This best-selling text by Patrick Carey uses the New Perspectives Series signature case-based, problem-solving approach to teach students how to create simple to advanced Web sites using HTML and XHTML. Important Notice: Media content

Agricultural

Development: New

Perspectives in a

Changing World is the

first comprehensive

exploration of key

emerging issues facing

developing-country

agriculture today, from

rapid urbanization to

rural transformation to

climate change. In this

four-part volume, top

experts offer the latest

research in the field of

agricultural

development. Using

new lenses to examine

today's biggest

challenges,

contributors address

topics such as nutrition

and health, gender and household decision-making, agrifood value chains, natural resource management, and political economy. The book also covers most developing regions, providing a critical global perspective at a time when many pressing challenges extend beyond national borders. Tying all this together, *Agricultural Development* explores policy options and strategies for developing sustainable agriculture and reducing food insecurity and malnutrition. The changing global landscape combined with new and better data, technologies, and understanding means that agriculture can and must contribute to a wider range of

development outcomes than ever before, including reducing poverty, ensuring adequate nutrition, creating strong food value chains, improving environmental sustainability, and promoting gender equity and equality. *Agricultural Development: New Perspectives in a Changing World*, with its unprecedented breadth and scope, will be an indispensable resource for the next generation of policymakers, researchers, and students dedicated to improving agriculture for global wellbeing. **New Perspectives on Affect and Learning Technologies**
Cambridge University Press
Part of our New

Perspectives Series, this text offers a case-oriented, problem-solving approach for learning the basic features of the Internet -- from using email and different types of browsers, to searching the Web and downloading information.

Agricultural development: New perspectives in a changing world John

Wiley & Sons
A free ebook version of this title will be available through Luminos, University of California Press's Open Access publishing program. Visit www.luminosoa.org to learn more. Ginseng and Borderland explores the territorial boundaries and political relations between Qing China and Choson Korea

during the period from the early seventeenth to the late nineteenth centuries. By examining a unique body of materials written in Chinese, Manchu, and Korean, and building on recent studies in New Qing History, Seonmin Kim adds new perspectives to current understandings of the remarkable transformation of the Manchu Qing dynasty (1636–1912) from a tribal state to a universal empire. This book discusses early Manchu history and explores the Qing Empire's policy of controlling Manchuria and Choson Korea. Kim also contributes to the Korean history of the Choson dynasty (1392–1910) by challenging conventional accounts

that embrace a China-centered interpretation of the tributary relationship between the two polities, stressing instead the agency of Choson Korea in the formation of the Qing Empire. This study demonstrates how Koreans interpreted and employed this relationship in order to preserve the boundary—and peace—with the suzerain power. By focusing on the historical significance of the China-Korea boundary, this book defines the nature of the Qing Empire through the dynamics of contacts and conflicts under both the cultural and material frameworks of its tributary relationship with Choson Korea.

HTML and CSS Walter de Gruyter GmbH & Co KG
The Definitive Guide to HTML & CSS--Fully Updated Written by a Web development expert, the fifth edition of this trusted resource has been thoroughly revised and reorganized to address HTML5, the revolutionary new Web standard. The book covers all the elements supported in today's Web browsers--from the standard (X)HTML tags to the archaic and proprietary tags that may be encountered. HTML & CSS: The Complete Reference, Fifth Edition contains full details on CSS 2.1 as well as every proprietary and emerging CSS3 property currently supported. Annotated examples of correct

markup and style show you how to use all of these technologies to build impressive Web pages. Helpful appendixes cover the syntax of character entities, fonts, colors, and URLs. This comprehensive reference is an essential tool for professional Web developers. Master transitional HTML 4.01 and XHTML 1.0 markup Write emerging standards-based markup with HTML5 Enhance presentation with Cascading Style Sheets (CSS1 and CSS 2.1) Learn proprietary and emerging CSS3 features Learn how to read (X)HTML document type definitions (DTDs) Apply everything in an open standards-focused fashion Thomas A. Powell is

president of PINT, Inc. (pint.com), a nationally recognized Web agency. He developed the Web Publishing Certificate program for the University of California, San Diego Extension and is an instructor for the Computer Science Department at UCSD. He is the author of the previous bestselling editions of this book and *Ajax: The Complete Reference*, and co-author of *JavaScript: The Complete Reference*. New Perspectives on Mixed Languages Council of Europe This book address fundamental questions of human development, revisiting old questions and applying original empirical findings. Seleucid Empire. The
reader will gain an
international
perspective on current
research.

HTML & CSS: The Good
Parts Rowman &
Littlefield

On November 9 and
10, 1938, Nazi
leadership unleashed
an unprecedented
orchestrated wave of
violence against Jews
in Germany, Austria,
and the Sudetenland,
supposedly in response
to the assassination of
a Nazi diplomat by a
young Polish Jew, but
in reality to force the
remaining Jews out of
the country. During the
pogrom,
Stormtroopers, Hitler
Youth, and ordinary

Germans murdered more than a hundred Jews (many more committed suicide) and ransacked and destroyed thousands of Jewish institutions, synagogues, shops, and homes. Thirty thousand Jews were arrested and sent to Nazi concentration camps. Volume 17 of the Casden Annual Review includes a series of articles presented at an international conference titled "New Perspectives on Kristallnacht: After 80 Years, the Nazi Pogrom in Global Comparison." Assessing events 80 years after the violent anti-Jewish pogrom of 1938, contributors to this volume offer new cutting-edge scholarship on the event and its repercussions.

Contributors include scholars from the United States, Germany, Israel, and the United Kingdom who represent a wide variety of disciplines, including history, political science, and Jewish and media studies. Their essays discuss reactions to the pogrom by victims and witnesses inside Nazi Germany as well as by foreign journalists, diplomats, Jewish organizations, and Jewish print media. Several contributors to the volume analyze postwar narratives of and global comparisons to Kristallnacht, with the aim of situating this anti-Jewish pogrom in its historical context, as well as its place in world history.

New Perspectives in Seleucid History,

Archaeology and Numismatics Univ of California Press

Distributive justice is one of the most discussed topics in political philosophy. Focusing on the plurality of irreconcilable conceptions of social and political justice, this book presents an array of new perspectives on the topic. Bringing together 30 original essays of well-established and young international scholars, the volume is essential reading for anyone interested in social and political justice.

[New Perspectives on Translanguaging and Education](#) Springer Science & Business Media

Thomas Robert Malthus (1766–1834) was a pioneer in

demography, economics and social science more generally whose ideas prompted a new 'Malthusian' way of thinking about population and the poor. On the occasion of the two hundred and fiftieth anniversary of his birth, *New Perspectives on Malthus* offers an up-to-date collection of interdisciplinary essays from leading Malthus experts who reassess his work. Part one looks at Malthus's achievements in historical context, addressing not only perennial questions such as his attitude to the Poor Laws, but also new topics including his response to environmental themes and his use of information about the New World. Part two then looks at the

complex reception of his ideas by writers, scientists, politicians and philanthropists from the period of his own lifetime to the present day, from Charles Darwin and H. G. Wells to David Attenborough, Al Gore and Amartya Sen.

New Perspectives on Html, Xhtml and Dynamic Html Walter de Gruyter GmbH & Co KG

New technologies are changing our reading habits. Laptops, e-readers, tablets and other handheld devices supply new platforms for reading, and we must learn to manage them by scrolling, clicking or tapping. Reading Today places reading in current literary and cultural contexts in order to analyse how these contexts challenge our

conceptions of who reads, what reading is, how we read, where we read, and for what purposes – and then responds to the questions this analysis raises. Is our reading experience becoming a ‘flat’ one? And does reading in a media environment favour quick reading? Alongside these questions, the contributors unpack emerging strategies of reading. They consider, for example, how paying attention to readers’ emotional reactions as an indispensable component of reading affects our conception of the reading process. Other chapters consider how reading can be explored through such topics as experimental literature, the

contemporary the healing power of
encyclopedic novel and books.
