Methodology, Context, and Issues Rowman & Littlefield

"High praise to Hodgson, Lamson, Mendenhall, and Crane and in creating a seminal work for

systemic researchers, educators, supervisors, policy makers and financial experts in health care. The comprehensiveness and innovation explored by every author reflects an in depth understanding that reveals true pioneers of integrated health care. *Medical Family Therapy: Advances in Application* will lead the way for Medical Family Therapists in areas just now being acknowledged and explored." - Tracy Todd, PhD, LMFT, Executive Director of the American Association for Marriage and Family Therapy Integrated, interdisciplinary health care is growing in stature and gaining in numbers. Systems and payers are facilitating it. Patients and providers are benefitting from it. Research is supporting it, and policymakers are demanding it. The emerging field of Medical Family Therapy (MedFT) is contributing greatly to these developments and *Medical Family Therapy: Advanced Applications* examines its implementation in depth. Leading experts describe MedFT as it is practiced today, the continuum of services provided, the necessary competencies for practitioners, and the biological, psychological, social, and spiritual aspects of health that the specialty works to integrate. Data-rich chapters model core concepts such as the practitioner as scientist, the importance of context in health care settings, collaboration with families and communities, and the centrality of the relational perspective in treatment. And the book's wide-spectrum coverage takes in research, training, financial, and policy issues, among them: Preparing MedFTs for the multiple worlds of health care Extending platforms on how to build relationships in integrated care Offering a primer in program evaluation for MedFTs Ensuring health equity in MedFT research Identifying where policy and practice collide with ethics and integrated care Recognizing the cost-effectiveness of family therapy in health care With its sophisticated insights into the current state - and the future - of healthcare reform, *Medical Family Therapy: Advanced Applications* is essential reading for researchers and practitioners in the fields of clinical psychology, counseling, family therapy, healthcare policy, psychiatric nursing, psychiatry, public health, and social work.

Practice Tests for Use with Psychology : an Introduction, 8th Ed Wipf and Stock Publishers

Assessing Family Relationships shows mental health professionals how to utilize the Family Life Space Drawing (the FLSD), a family assessment tool that incorporates information from multiple family members while building connections between the clinician and the client. In this manual, Theresa A. Beeton and Ronald A. Clark demonstrate the usefulness of the FLSD in both family and couple counseling. As a task-centered assessment tool, the FLSD enables an interactive and personalized process of counseling, which helps individuals to express concerns and information about themselves in an indirect and nonthreatening manner. Chapters are illustrated throughout with case studies and drawings adapted from the authors' own clinical experience, and the manual offers an overview of the history of the FLSD, as well as where future research is headed. Providing a practical explanation of how to complete the FLSD process, *Assessing Family Relationships* will be highly relevant to couple and family therapists, as well as clinical social workers, who are interested in updating their practice with innovative family assessment research and techniques.

This Brief from the American Family Therapy Academy (AFTA) is a collection of chapters from the AFTA Monograph Series. Chapters are grounded in family systems concepts and informed by postmodern perspectives including social justice. The collection provides cutting edge thinking and practices for a variety of experiences that strongly impact individuals and families. Authors address the treatment of couples and families oppressed by socio-contextual phenomena such as war and poverty, and of those marginalized by the insidious impact of dominant discourse on relationships and on the therapeutic context, for example, sexual/gender identity and sexual practices.
