This textbook provides an accessible  
introduction to the study of word-  
formation, that is, the ways in which new  
words are built on the bases of other  
words (e.g. happy - happy-ness),  
focusing on English. The book's didactic  
aim is to enable students with little or no  
prior linguistic knowledge to do their  
own practical analyses of complex  
words. Readers are familiarized with the  
necessary methodological tools to obtain  
and analyze relevant data and are  
shown how to relate their findings to  
theoretical problems and debates. The  
book is not written in the perspective of  
a particular theoretical framework and  
draws on insights from various research

traditions, reflecting important  
methodological and theoretical  
developments in the field. It is a  
textbook directed towards university  
students of English at all levels. It can  
also serve as a source book for teachers  
and advanced students, and as an up-to-  
date reference concerning many word-  
formation processes in English.
