This book extends the existing demand fulfillment research by considering multi-stage customer hierarchies. Basis is a two-step allocation and consumption planning procedure. In the existing literature, it is assumed that the customer segments are 'flat'. This means they can be sorted easily during the allocation planning step by a single central planner in decreasing order of profitability. In the subsequent consumption planning phase, if order requests differ in terms of profit margins, companies can render prioritized service in real time to their most profitable customers by consuming the reserved quotas.

IT's Going Global... From Shanghai to San Francisco, IT is playing an increasingly vital role in helping organizations gain the competitive advantage around the globe. That's why the Fifth Edition of "Information Technology for Management" offers a global perspective on how IT is transforming

business. In this comprehensive, up-to-date Fifth Edition, Efraim Turban, Ephraim McLean, James Wetherbe, and new coauthor Dorothy Leidner present late-breaking developments in the field, as well as a new chapter on Global Interorganizational Systems. IT's About Transformation: The text focuses on how organizations operate and compete in the digital economy, and how IT can assist this transformation. The new edition also features increased strategy coverage. IT's Current: The Fifth Edition introduces new research, current examples and case studies, and updated reference materials. IT's Managerial: The text's strong managerial orientation makes IT relevant and interesting to business students. Technological topics are conveniently covered in six technology guides at the end of the text. IT's Wireless: A special chapter covers innovations and opportunities in mobile computing and the wireless revolution. IT's Hands-on: Students solve realistic IT problems when they are "hired" as interns at The Wireless Cafe, a simulated high-tech restaurant in Shanghai.
