Financial Expert Witness Communication John Wiley & Sons
Featuring in-depth interviews of attorneys, judges, and seasoned forensic experts from multiple disciplines including psychology, medicine, economics, history, and neuropsychology, *The Art and Science of Expert Witness Testimony* highlights and offers bridges for the areas where the needs and expectations of the courtroom collide with experts' communication habits developed over years of academic and professional training. Rather than seeing testimony as a one-way download from expert to jurors, *The Art and Science of Expert Witness Testimony* focuses on the direct, dynamic, unique communication relationship that develops as

each juror's lived experience interacts with the words of experts on the stand. This book expands the academic tradition of "methods-centered credibility" to also include "person-centered credibility," where warmth, confidence, and relentless attention to detail build trust with jurors. Seasoned forensic experts share what they actually say on the stand: their best strategies and techniques for disrupting traditional academic communication and creating access to science and professional opinions with vivid, clear language and strong visuals. The difficult but necessary emotional work of the courtroom is addressed with specific techniques to regulate emotions in order to maintain person-centered credibility and keep the needs of jurors front and center through cross-examination. This innovative compilation of research is essential reading for professionals and practitioners, such as physicians, engineers, accountants, and scientists, that may find themselves experts in a courtroom. *The Art and Science of Expert Witness Testimony* provides a unique experience for readers, akin to being personally mentored by over eighty-five attorneys, judges, and seasoned experts as they share their observations, insights, and strategies—not to "win" as a defense, prosecution, or plaintiff expert, but to be productive in helping jurors and other triers of fact do their difficult intellectual job in deciding a case.

Financial Expert Witness Communication A Practical Guide to Reporting and Testimony

In the last 20 years, the need for a financial expert to act as a witness and consultant to litigating attorneys has grown even more than litigation itself. Twenty years ago, few certified public accountants or economists offered litigation-related services; now, a large number devote much of their practice to this area. To be litigation service practitioners and accountants need to learn or enhance their litigation skills, including the fine points of their roles in trial preparation and testimony presentation, testimony presentation, deposition, direct examination, cross examination, understanding Sarbanes-Oxley rulings, and fraud investigations.

The *Forensic and Investigative Accounting Casebook* is a collection of Problem-Based Learning cases designed to reinforce

principles taught in forensic accounting/auditing courses throughout the United States. Each case: (1) lays out the basic principles and parameters of analysis to be applied in uncovering and proving fraudulent activity in domestic and/or international operations; (2) provides a fact pattern and supporting documentation that allow students to not only uncover illegal activity, but also to prove such fraud in a court of law under American rules of evidence and courtroom procedure; (3) is designed for students to perform forensic investigation, alone or in teams, with the instructor serving as a facilitator; and (4) includes secondary documents that either corroborate the superficial accounting information initially provided or reveal anomalies and discrepancies pointing to who, what, when, where, how, and why.
