Sharpen advising expertise by exploring critical issues affecting the field Beyond Foundations, a core

resource for experienced academic advisors, gives practitioners insight into important issues affecting academic advising. In addition to gaining understanding of foundational concepts and pressing concerns, master advisors engage with case studies to clarify their roles as educators of students, as thought leaders in institutions, and as advocates for the profession. Pillar documents—the NACADA Core Values, NACADA Concept of Academic Advising, and CAS Standards—serve as sources of both information and inspiration for those seeking to improve advising. New strategies inform advisors helping a diverse student population delineate meaningful educational goals. Each chapter prompts productive discussions with fellow advisors interested in cultivating advising excellence. To promote advisor influence in higher education, experienced contributors explain new trends—including the impact of external forces and legal issues on postsecondary institutions—and the evolution of advising as a profession and a field of inquiry. Expert insight and practical focus contribute to the development of experienced advisors. Use existing resources in new ways to master advising roles and encourage student success Apply theory to advance advising practice Create and optimize professional development opportunities Establish recognition for the contributions of academic advisors to the institution and higher education Face challenges created by the changing higher education landscape Advisors must meet the expectations of students, parents, faculty members, administrators, and outside agencies, all while navigating an increasingly complex range of issues presented by a student population unlike any that has come before. Beyond Foundations provides the insight and clarity advisors need to help students achieve their educational goals and to advance the field.

ICD-10-CM 2020: The Complete Official Codebook provides the entire updated code set for diagnostic coding, organized to make the challenge of accurate coding easier. This codebook is the cornerstone for establishing medical necessity, determining coverage and ensuring appropriate reimbursement. Each of the 21 chapters in the Tabular List of Diseases and Injuries is organized to provide quick and simple navigation to facilitate accurate coding. The book also contains supplementary appendixes including a coding tutorial, pharmacology listings, a list of valid three-character codes and additional information on Z-codes for long-term drug use and Z-codes that can only be used as a principal diagnosis. Official coding guidelines for 2020 are bound into this codebook. FEATURES AND BENEFITS: Full list of code changes. Quickly see the complete list of new, revised, and deleted codes affecting the FY 2020 codes; QPP symbol in the tabular section. The symbol identifies diagnosis codes associated with Quality Payment Program (QPP) measures under MARCA; The addition of more than 100 coding tips. Obtain insight into coding for physician and outpatient settings; The addition of more than 300 new definitions in the tabular listing. Assign codes with confidence based on illustrations and definitions designed to highlight key components of the disease process or injury; Intuitive features and format. This edition includes full-color illustrations and visual alerts, including color-coding and symbols that identify coding notes and instructions, additional character requirements, codes associated with CMS hierarchical condition categories (HCC), Medicare Code Edits (MCEs), manifestation codes, other specified codes, and unspecified codes; Placeholder X. This icon alerts the coder to an important ICD-10-CM convention--the use of a "placeholder X" for three-, four- and five-character codes requiring a seventh character extension; Coding guideline explanations and examples. Detailed explanations and examples related to application of the ICD-10-CM chapter guidelines are provided at the beginning of each chapter in the tabular section; Muscle/tendon translation table. This table is used to determine muscle/tendon action (flexor, extensor, other), which is a component of codes for acquired conditions and injuries affecting the muscles and tendons; Appendices. Supplement your coding knowledge with information on proper coding practices, risk adjustment coding, pharmacology, and Z codes.
