List of Educational Research Projects Supported by the Department of Education and Science

IGI Global
 Cost models underlie all the techniques used in construction cost and price forecasting, yet until relatively recently industry has been unfamiliar with their characteristics and properties. An understanding of the various types of cost model is vital to enable effective cost control and the development of future forecasting techniques. This volume brings together more than 20 seminal contributions to building cost modelling and introduces the major landmarks in progress and thinking in this field: * strategies and directions * explorations in cost modelling * cost-product/process modelling * dealing with uncertainty The strong techniques bias of this book will appeal to construction professionals involved in estimating, as well as researchers and students of building economics.

[Hearings Before a Subcommittee of the Committee on Appropriations, House of Representatives, One Hundred Fifth Congress, Second Session](#) IGI Global

Project Management is designed to appeal to undergraduate and postgraduate students studying project management on a business degree. It provides a comprehensive overview of project management practice, while carefully balancing the unique aspects of project management curricula with the more general business skills, including quality, risk, teams, and leadership. The text includes a wide range of cases to connect the academic principles and the complexity of real-life projects. The text is also supported by web-based multiple choice questions, as well as in-text exercises and examples to illustrate the concepts and ideas throughout the book. Also available is a companion website with extra features to accompany the text, please take a look by clicking below -

 Information Modeling for Internet Applications considers the fundamentals of web site modeling. It gives theoretical background as well as practical modeling techniques, which assist in the planning and development of web sites, other collections of hyperdocument and web-based information systems in general. Besides the modeling of page structures, navigation paths, and presentation functions, this will help to perform a variety of additional tasks, such as adaptation to user groups.

Agriculture, Rural Development, and Related Agencies Appropriations for Fiscal Year 1999 Cengage Learning
 STUDENT SUCCESS IN COLLEGE: DOING WHAT WORKS!, 3rd Edition, will help you choose or confirm a career path and develop

the skills needed to be successful in college and in your career. You'll get to see what the research says about which strategies work best so you can do what works to reach your goals. A unique feature of this textbook is that it includes actual research studies, so you'll get the opportunity to learn how to read and use research, building your information literacy and critical-thinking skills. These skills will serve you well in your other courses and in your career. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

Handbook of Research on Leveraging Risk and Uncertainties for Effective Project Management IGI Global
 Bachelor Thesis from the year 2020 in the subject Computer Science - Software, grade: 87.2, , language: English, abstract: This final year project is the central part of the educational administration system for Nanjing University of Information Science and Technology (NUIST), which allows students to select courses and gives students access to course offerings via online as well as the ability to complete various administrative functions allowing for a better management of curriculum decisions in the context of academic objectives. The objective of these systems is to make this process more convenient and easier to achieve which has been met with varying levels of success. This Course Selection Portal will be operated by three users, the administrator, students and lecturers. This system will be developed using PHP, MySQL, jQuery, HTML, JavaScript, CSS and Bootstrap. The front-end is designed using PHP with excerpts of code written using jQuery, HTML, JavaScript, CSS and Bootstrap. The back-end is designed and managed through MySQL using a software called WAMP Server. This system software is more secured, user-friendly and less time-consuming.

Concepts, Methodologies, Tools, and Applications IGI Global
 Contains an inventory of evaluation reports produced by and for selected Federal agencies, including GAO evaluation reports that relate to the programs of those agencies.

Current Research in Library & Information Science Lulu.com
 For more than 40 years, Computerworld has been the leading source of technology news and information for IT influencers worldwide. Computerworld's award-winning Web site (Computerworld.com), twice-monthly publication, focused conference series and custom research form the hub of the world's largest global IT media network.

IPA Projects for Improved State and Local Management Springer Nature

The proper understanding and managing of project risks and uncertainties is crucial to any organization. It is of paramount importance at all phases of project development and execution to avoid poor project results from meager economics, overspending, reputation and environmental damage, and even loss of life. The

Handbook of Research on Leveraging Risk and Uncertainties for Effective Project Management is a comprehensive reference source for emerging perspectives of managing risks associated with the execution and development of projects. Highlighting innovative coverage written by top industry specialists, such as complexity theory, psychological bias and risk management fallacies, probabilistic risk analysis, and various aspects of project decision making, this book is ideally designed for project and risk managers, project engineers, cost estimators, schedulers, safety and environmental protection specialists, corporate planners, financial and insurance specialists, corporate decision makers, as well as academics and lecturers working in the area of project management and students pursuing PMP, PMI-RMP, ISO 31000, etc. certification.

The official magazine of United States Army logistics.

Department of Transportation and Related Agencies Appropriations for 1999 IGI Global

This volume gathers selected, peer-reviewed original contributions presented at the International Conference on Computational Vision and Bio-inspired Computing (ICCVBIC) conference which was held in Coimbatore, India, on November 29-30, 2018. The works included here offer a rich and diverse sampling of recent developments in the fields of Computational Vision, Fuzzy, Image Processing and Bio-inspired Computing. The topics covered include computer vision; cryptography and digital privacy; machine learning and artificial neural networks; genetic algorithms and computational intelligence; the Internet of Things; and biometric systems, to name but a few. The applications discussed range from security, healthcare and epidemic control to urban computing, agriculture and robotics. In this book, researchers, graduate students and professionals will find innovative solutions to real-world problems in industry and society as a whole, together with inspirations for further research.

As with any industry, the education sector goes through frequent changes due to modern technological advancements. It is every educator's duty to keep up with these shifting requirements and alter their teaching style to best fit the needs of their classroom. Pre-Service and In-Service Teacher Education: Concepts, Methodologies, Tools, and Applications explores the current state of pre-service teacher programs as well as continuing education initiatives for in-service educators. It also emphasizes the growing role of technology in teacher skill development and training as well as key pedagogical developments and methods. Highlighting a range of topics such as teacher preparation programs, teaching standards, and fieldwork and practicum experiences, this multi-volume book is designed for pre-service teachers, teacher educators, researchers, professionals, and academics in the education field.
