### *Just War Theory*

Bloomsbury Publishing  
 Since the end of the Cold War, conflict prevention and resolution, peacekeeping and peacebuilding have risen to the top of the international agenda. The third edition of this hugely popular text explains the key concepts, charts the development of the field, evaluates successes and failures, and assesses the main current challenges and debates in the second decade of the twenty-first century. Existing material has been thoroughly updated and seven new chapters added, on conflict resolution in a changing international order; environmental conflict resolution; conflict resolution in the arts and popular culture; conflict resolution, the media and the communications revolution; managing radical disagreement in intractable conflict; theories and critiques of the field; and upcoming challenges and tasks for the next generation. The authors argue that a new form of cosmopolitan conflict resolution is emerging, which offers a

hopeful means for human societies to handle their conflicts non-violently and eventually to transcend and celebrate their differences. Part I offers a comprehensive survey of the theory and practice of conflict resolution. Part II sets the field within the context of rapid global change and addresses the controversies that have surrounded conflict resolution as it has entered the mainstream. Contemporary Conflict Resolution is essential reading for students of peace and security studies, conflict management and international politics, as well as for those working in non-governmental organizations and think-tanks.

### *Palgrave Advances in Continental Political Thought* Routledge

This is a major new edition of a highly regarded textbook on International Relations theory which combines coverage of the main contending theories and approaches with cross-cutting coverage of key current issues and debates; of the philosophical foundations of IR theory; and of why different theories are addressed to different research agendas.

### *Hegemony and Democracy* BRILL

This ground breaking text provides the ideal introduction to the ever-changing field of foreign policy. With a unique combination of theories, actors and cases in a single volume, the expert contributors provide students with a valuable and accessible introduction to what foreign policy is and how it is conducted. With an emphasis throughout on grounding theory in empirical examples, the textbook features a section dedicated to relevant and topical case studies where foreign policy analysis approaches and theories are applied. The expert team of contributors clearly conveys the connection between international relations theory, political science, and the development of foreign policy analysis, emphasizing the key debates in the academic community. The text is accompanied by an Online Resource Centre, which provides additional resources for both lecturers and students. For students: - Expand your reading with web links organized by chapter that point you to pertinent articles and useful

websites. - Test your understanding of key terms with the flashcard glossary. - Explore the evolution of foreign policy analysis by following an interactive timeline For lecturers: - Use the adaptable PowerPoint slides as the basis for lecture presentations, or as hand-outs in class. - Find out how to use case studies in your teaching with our guide to using case studies - Use the simulation exercises to help your students explore negotiations and debates

### **Liberal Peace**

Bloomsbury Publishing  
This long-awaited new edition has been fully updated and revised by the original authors as well as two new members of the author team. Based on many years of active research and teaching it takes the discipline's most difficult aspects and makes them accessible and interesting. Each chapter builds up an understanding of the different ways of looking at the world. The clarity of presentation allows students to rapidly develop a theoretical framework and to apply this knowledge widely as a way of understanding both more advanced theoretical texts and

events in world politics. Suitable for first and second year undergraduates studying international relations and international relations theory.

### **Rethinking Hobbes and Kant**

SAGE Publications  
Bruce Russett is one of America's leading international relations scholars. Hegemony and Democracy is constructed around the question of whether hegemony is sustainable, especially when the hegemon is a democratic state. The book draws on earlier publications over Bruce Russett's long career and features new chapters that show the continuing relevance of his scholarship.

### **Politics and Teleology**

**in Kant** Routledge  
Corruption, Politics and Development  
The Role of the World Bank  
Springer

### **Routledge Handbook of Security Studies**

University of Wales Press  
The fifth edition of this bestselling textbook offers a comprehensive and engaging introduction to International relations and has been fully updated to cover the dramatic changes in recent world politics. Written in the author's unique and engaging style, the text explores everything from

foreign policy and security to global governance and the global economy, to show how the theories and concepts Brown outlines are the only way to make sense of contemporary issues and events. With reference to such diverse events as Brexit, the Russian armed conflict in Ukraine, the financial crisis, the rise of China, and the challenges of identity politics, the author expertly shows how the range of theories presented in the book allow for an understanding of the destabilising events and developments that characterise global politics today, and will continue to do so in the future. This text remains the definitive guide to understanding international relations, and is suitable for undergraduate and postgraduate students of international relations at any stage of their studies.  
New to this Edition: - Thoroughly updated to showcase the breadth of the latest research and key thinkers in international relations theory. - Entirely rewritten chapter on the development of human rights and international criminal law. - Brand new chapter that offers a

sophisticated and up-to-date analysis of the current state of world politics.

### **Just War Thinkers**

Routledge

An accessible, higher-level introduction to a key selection of continental European thinkers from Spinoza to Zizek. Covering 'classical' exponents of the tradition such as Hegel and Marx, 'moderns' like Gramsci and Habermas and 'postmoderns' like Lacan and Deleuze, the volume introduces the main ideas of each thinker and reflects on their enduring theoretical relevance. The impressive breadth and contemporary angle make this a unique, up-to-date collection that will be invaluable to students and teaching staff alike.

### **Semantics of**

**Statebuilding** Springer  
This revised and updated second edition features over twenty new chapters and offers a wide-ranging collection of cutting-edge essays from leading scholars in the field of Security Studies. The field of Security Studies has undergone significant change during the past 20 years, and is now one of the most dynamic sub-disciplines within International Relations. This second edition has

been significantly updated to address contemporary and emerging security threats with chapters on organised crime, migration and security, cyber-security, energy security, the Syrian conflict and resilience, amongst many others. Comprising articles by both established and up-and-coming scholars, The Routledge Handbook of Security Studies provides a comprehensive overview of the key contemporary topics of research and debate in the field of Security Studies. The volume is divided into four main parts: • Part I: Theoretical Approaches to Security • Part II: Security Challenges • Part III: Regional (In)Security • Part IV: Security Governance This new edition of the Handbook is a benchmark publication with major importance for both current research and the future of the field. It will be essential reading for all scholars and students of Security Studies, War and Conflict Studies, and International Relations.

*Democracy in the New Europe* Polity

A major new reference volume - The Edinburgh Companion to Contemporary Liberalism

is the premier collection of material on a comprehensive range of topics in contemporary liberalism. Liberal theory has been caricatured by its critics as an abstract, unworldly, trivial philosophical navel-gazing pursuit. The Companion counters this view by showing how liberalism can tackle wide-ranging practical concerns that urgently demand attention in twenty-first century politics. Rather than presenting contemporary liberalism simply and narrowly as a survey of what its main academic protagonists have said over the past 30 years, the guiding principle of the volume is to conceptualise it primarily as a set of themes and approaches informed by the challenges to the practice of liberal politics. Issues such as human rights, citizenship, nationalism, feminism, international communities, supranational orders, post-communism and ecocentrism take their place alongside the more familiar and well-worked themes of justice and justification as topics for liberal theorising. The reader is vividly shown the ways in which liberalism engages

directly with the problems of practical political life today. This wide-ranging account of contemporary liberal thinking places the emphasis on agenda-setting, showing that contemporary liberalism is live - relevant, proactive, continuously engaged and adaptable - and that the problems faced by the liberal order are sufficiently complex and perplexing to demand the serious, rigorous philosophical reflection offered by contemporary liberal political theory. The Companion allows the reader to explore liberalism's contemporary relevance and to look to its likely future developments. With contributors including Will Kymlicka, Michael Freedman, Richard Bellamy, Rex Martin, Margaret Canovan, Diana T. Meyers, and Kate Soper, this large, definitive edition will be a must-buy for all libraries and a key reference tool for Sovereignty and the Limits of the Liberal Imagination Edinburgh University Press

International Relations is a concise and accessible introduction for students new to international relations and for the general reader. It offers the most up-to-date guide

to the major issues and areas of debate and: explains key issues including humanitarian intervention and economic justice features illustrative and familiar case studies from around the world examines topical debates on globalization and terrorism provides an overview of the discipline to situate the new reader at the heart of the study of global politics Covering all the basics and more, this is the ideal book for anyone who wants to understand contemporary international relations.

**The Rise and Fall of Peacebuilding in the Balkans** Edinburgh University Press

This volume critically examines and elucidates the complex relationship between politics and teleology in Kant's philosophical system. Examining this relationship is of key philosophical importance since Kant develops his political philosophy in the context of a teleological conception of the purposiveness of both nature and human history. Kant's approach poses the dual task of reconciling his normative political theory with both his priori moral philosophy and his teleological

philosophy of nature and human history. The fourteen essays in this volume, by leading scholars in the field, explore the relationship between teleology and politics from multiple perspectives. Together, the essays explore Kant's normative political theory and legal philosophy, his cosmopolitanism and views on international relations, his theory of history, his theory of natural teleology, and the broader relationship between morality, history, nature and politics in Kant's works. This important new volume will be of interest to a wide audience, including Kant scholars, scholars and students working on topics in moral and political philosophy, the philosophy of history, political theory and political science, legal scholars and international relations theorists, as well as those interested broadly in the history of ideas.

**Language, meanings and sovereignty**

Bloomsbury Publishing  
Comprising essays by Michael W. Doyle, *Liberal Peace* examines the special significance of liberalism for international relations. The volume begins by outlining the

two legacies of liberalism in international relations - how and why liberal states have maintained peace among themselves while at the same time being prone to making war against non-liberal states. Exploring policy implications, the author focuses on the strategic value of the inter-liberal democratic community and how it can be protected, preserved, and enlarged, and whether liberals can go beyond a separate peace to a more integrated global democracy. Finally, the volume considers when force should and should not be used to promote national security and human security across borders, and argues against President George W. Bush's policy of "transformative" interventions. The concluding essay engages with scholarly critics of the liberal democratic peace. This book will be of great interest to students of international relations, foreign policy, political philosophy, and security studies.

*Power Investigation*

Corruption, Politics and Development  
The Role of the World Bank

This volume offers a set of concise and accessible introductions to the

seminal figures in the historical development of the just war tradition. In what, if any, circumstances are political communities justified in going to war? And what limits should apply to the conduct of any such war? The just war tradition is a body of thought that helps us think through these very questions. Its core ideas have been subject to fierce debate for over 2,000 years. Yet they continue to play a prominent role in how political and military leaders address the challenges posed by the use of force in international society. Until now there has been no text that offers concise and accessible introductions to the key figures associated with the tradition. Stepping into this breach, *Just War Thinkers* provides a set of clear but detailed essays by leading experts on nineteen seminal thinkers, from Cicero to Jeff McMahan. This volume challenges the reader to think about how traditions are constituted—who is included and excluded, and how that is determined—and how they serve to enable, constrain, and indeed channel subsequent

thought, debate, and exchange. This book will be of much interest to students of just war tradition and theory, ethics and war, philosophy, security studies and IR.

*A Liberal Peace?*

Routledge

'Power investigation', or the practice of power to legitimize itself through commissioned programmes of scientific enquiry, is a hallmark of Nordic democracy. Five power investigations have been conducted in the Nordic countries since 1972. The close connection to state power has not dissuaded prominent scholars from participating in them, nor have their findings evoked strong criticism.

Combining politically guided perspectives with collaborative research, power investigations represent public events that typify the ostensibly open political culture of the Nordic countries, rather than simply existing as texts or as a politico-scientific genre. Although such investigations have been thought of as critical studies of power, the authors in this book show that their findings have varied greatly and that they have served as tools

for wielding power. Whatever shortcomings they uncover, the utility of these investigations in suggesting transparency and self-reflection enhances the legitimacy of Scandinavian government. The investigations are persuasive exercises through which the commissioning authorities and those scholars hired to carry them out engage in a mutually beneficial exchange. Underlying this strategy is the perception, deeply embedded in Nordic political culture, that politics is a progressive, rational endeavour, and that identification with the state is an honourable role for academics. This book was published as a special issue of the *Journal of Contemporary European Studies*.

### **Foreign Policy**

Routledge

Value pluralism is the idea, associated with the late Isaiah Berlin, that fundamental human values are irreducibly plural and incommensurable. Ends like liberty, equality and community are intrinsic goods which can neither be ranked in an absolute hierarchy nor translated into units of a common denominator. If that is

true, how can we choose among such values when they come into conflict in particular cases? In particular, what reason is there to justify the value ranking characteristic of liberal democracy, favouring personal autonomy and toleration? Recent commentators have seen value pluralism as undermining the traditional claims of liberalism to universal authority, rendering it at best no more than one political form among others with no greater claim to legitimacy. Against that view, George Crowder argues that a strong distinctive case for liberalism as a universal project is implied by value pluralism itself. Reflection on the elements of value pluralism yields a set of ethical principles, including respect for universal values, rejection of political utopianism, promotion of value diversity, accommodation of reasonable disagreement, and cultivation of civic virtues. Those principles are best satisfied by a liberal form of politics characterised by a strong commitment to personal autonomy, by policies of moderate redistribution and multiculturalism, and by constitutional restraints

on democratic politics. This is the first book-length defence of liberalism on the basis of value pluralism, complementing and extending the work of Berlin and others. [Capitalism, Democracy and the Prevention of War and Poverty](#) Springer For a free 30-day online trial to this title, visit <https://us.sagepub.com/fr/eetrial> How do we arrange our collective affairs? Why do we live together in the ways we do? How ought we to live together? All humans think about the world they live in, its history and future, and the ideals by which they want to live in relation to others. How we think today decisively influences the world of tomorrow. This encyclopedia attempts to bring greater clarity and understanding to political debate. Drawing together a team of international scholars, the *Encyclopedia of Political Theory* examines the ideas of the major political theorists from before Plato to our own times; the main schools of political thought; the concepts and issues that have captured the imagination and attention of political theorists; and some of the main institutions and

practices inspired by political thought. With more than 450 entries, these three volumes provide a quick, one-stop source to key topics in the field. Key Features Examines the global landscape of all the key theories and the theorists behind them Includes specific lists of entries that deal with constitutional thought and democratic thought Refers to distinctive norms and features of various governments, legal systems, and societies Devotes large parts to the history of ideas about government, ethics, and society Provides a chronology of political theory to help readers see how a given theorist, school, or issue fits into the bigger historical picture Key Themes Ancient Thought Applied Ethics Biographies Comparative Theory Constitutional Thought Critical Theory Democratic Thought Early Modern Thought International Theory Justice Liberal Theory Medieval Thought Modern Theory Power and Authority Religious Thought Self and Community This work is designed to serve as a reference source for anyone interested in the

roots of contemporary political theory. It will be a welcome addition to any academic or public library. *Encounters with World Affairs* Macmillan International Higher Education This book examines the practices in Western and local spheres of humanitarian intervention, and shows how the divide between these spheres helps to perpetuate Western involvement. Using the Democratic Republic of the Congo as a case study – an object of Western intervention since colonial times – this book scrutinizes the contemporary practice of humanitarian intervention from the inside. It seeks to expose how humanitarian aid and peacekeeping works, what obstacles they encounter and how they manage to retain their legitimacy. By examining the relationship between the West and the DR Congo, this volume asks why intervention continues to be so central for the relationship between Western and local spheres. Why is it normal and self-evident? The main answer developed here is that the separation of these two spheres allows

intervention to enjoy sufficient degrees of legitimacy to be sustained. Owing to the contradictions that surface when juxtaposing the Western and Congolese spheres, this book highlights how keeping them separate is key to sustaining intervention. Bridging the divide between the liberal peace debate in International Relations and anthropologies of humanitarianism, this volume thus presents an important contribution to taking both the legitimizing proclamations and ‘local’ realities of intervention seriously. The book will be of much interest to students of statebuilding, peacebuilding, peacekeeping, anthropology, research methods and IR in general. World Politics Macmillan International Higher Education This volume examines and critiques several of the classical theoretical foundations of domestic and international organization, concentrating on the contestable conceptions of community, order, justice, freedom, responsibility and wealth developed by the major

political theorists of the modern epoch. Nelson argues that the accepted discourses of world politics are constructed by way of particular interpretive negotiations of what sovereign power is and what it must be made to accomplish in domestic and world politics. Providing a Foucaultian analysis of modern power and the liberal subject, the work traces the history of modern inquiries into sovereignty to a time when the state was being severed from a Christian eschatology, a time when political theorists sought ways of lending meaning and purpose to emerging conceptions of 'the political.' Modern theories of sovereignty, Nelson argues, embody the remainders of a deep

worry over the precarious nature of legitimacy, the contingency of power, and the frailty of any political form. The theoretical traditions of liberalism and the Enlightenment dispense with anxiety over the politics of legitimacy by repressing the historical, constricting the political, and fashioning political rationalities suited to increasingly intimate and ever-expansive forms of liberal governance. This book aims to explore how modern theories of sovereignty elicit and effect governable subjects and forms of political community that have proven crucial to intensifying and expansive powers of the liberal state. An inquiry into modern theories of

sovereignty and statecraft and a critical interrogation of how political theories are invoked by the traditions of international relations across the modern era, this volume will be of interest to all scholars of political theory, political philosophy and international relations. Citizenship, Democracy and Justice in the New Europe Routledge Behind the façade of democracy are a number of unanswered questions, foremost among them how to relate democracy beyond the state especially at the EU level to democracy within the state. This important new text provides a wide-ranging assessment of the theory and practice of democracy at all levels in Europe today.
