"3d printing continues to advance, and will increasingly facilitate low-run, customized, on-demand and material-efficient manufacturing. Already 3D printed metal and plastic parts are being fitted into products that range from jet engines to medical devices and personalized shoes. Next generation 3D printing processes are also being developed, while the convergence of 3D printing with other technologies presents significant opportunities for localization and more sustainable production methods. The 3D printing industry is indeed in a state of radical transition as it evolves from selling niche rapid prototyping equipment, to supplying cutting-edge digital manufacturing systems."--Provided by publisher

The Decision-Making Process in Scholarly Publishing Createspace Independent Publishing Platform

"The Prince" is a political treatise by Machiavelli that is not considered to be representative of the work published during his lifetime, but is the most remembered. The theories in this book describe methods that an aspiring prince

can use to acquire the throne, or an existing prince can use to maintain his reign. These theories include defense and military, perceived reputation, generosity, cruelty versus mercy, gaining honors, fortune and a number of other discourses. It is customary for such as seek a Prince's favour, to present themselves before him with those things of theirs which they themselves most value, or in which they perceive him chiefly to delight. Accordingly, we often see horses, armour, cloth of gold, precious stones, and the like costly gifts, offered to Princes as worthy of their greatness.

Based on extensive fieldwork at two well-known commercial publishers of scholarly books, Walter W. Powell details the different ways in which both internal

politics and external networks influence decisions about what should be published. Powell focuses on the work of acquisitions editors: how they decide which few manuscripts, out of hundreds, to sponsor for publication; how editorial autonomy is shaped, but never fully curbed, by unobtrusive controls; and how the search process fits into the social structure of the American academy. Powell's observations—and the many candid remarks of publishers and their staffs—recreate the workaday world of publishing. Throughout, the sociology of organizations and of culture serves as Powell's interpretive framework. Powell shows how scholarly publishers help define what is "good" social science research and how the history and tradition of a publishing house contribute to the development of an organizational identity. Powell's review of actual correspondence, from outside letters proposing projects to internal "kill" letters of rejection, suggests that editors and authors at times form their own quasi-organization with external allegiances and bonds beyond those of the publishing house. "This is a welcome addition to the literature on the life of the organizations that produce our science and our culture. Powell's intimate look at two scholarly publishing companies has an insider's appreciation of the book business and an outsider's eye for questions the editors are not asking themselves."—Michael Schudson, University of California at San Diego
"Getting Into Print will long be the book about how academic editors choose the titles they sponsor. Even experienced editors and authors will find new insights here and revealing comparisons with decision-making in other kinds of organizations."—Edward Tenner, Los

Angeles Times Book Review "Getting Into Print is an unusually outstanding ethnographic study in that it reflects the evocative richness of detail associated with the ethnographic approach while simultaneously maintaining a clear-headed, analytical distance from the subject that allows for a meaningful theoretical contribution. Powell is an astute ethnographer who presents a vital and compelling 'insider's view' of the decision-making process in scholarly publishing, making this book fascinating reading for all those involved in the 'publish-or-perish' syndrome."—Barbara Levitt, American Journal of Sociology
