This volume of *Advances in Management Accounting* explores a variety of current issues through rigorous academic research. Topics include the link between CEO compensation and the 2008 financial crisis, the association between performance-based pay and employee honesty, and more. *International Journal of Accounting and Information Management* Elsevier  
 One of the prime purposes of accounting is to communicate and yet, to date, this fundamental aspect of the discipline has received relatively little attention. The Routledge Companion to Accounting Communication represents the first collection of contributions to focus on the power of communication in accounting. The chapters have a shared aim of addressing the misconception that accounting is a purely technical, number-based discipline by highlighting the use of narrative, visual and technological methods to communicate accounting information. The contents comprise

a mixture of reflective overview, stinging critique, technological exposition, clinical analysis and practical advice on topical areas of interest such as: The miscommunication that preceded the global financial crisis The failure of sustainability reporting The development of XBRL How to cut clutter With an international coterie of contributors, including a communication theorist, a Big Four practitioner and accounting academics, this volume provides an eclectic array of expert analysis and reflection. The contributors reveal how accounting communications represent, or misrepresent, the financial affairs of entities, thus presenting a state-of-the-art assessment on each of the main facets of this important topic. As such, this book will be of interest to a wide range of readers, including: postgraduate students in management and accounting; established researchers in the fields of both accounting and communications; and accounting practitioners. *International Journal of Corporate Finance and Accounting (IJCFA)*. McGraw-Hill Education  
 The IJAISL is an intellectually reviewed journal of present-day research in quantitative accounting, information science and qualitative leadership skills. Analyses relying on organizational size, statistical financial performance, and various operationalizations of leadership composition, will

present evidence of methodical control structure and demonstrate consistency in results. Examinations of meta-analyses of empirical work in accounting, information processing and leadership, useful for the understanding of their respective behaviors regionally as well as internationally, is the core of this journal.

*Advances in International Accounting* Routledge

This book is a full guidebook among more than 218 accounting international journals with an evaluation of 3,000 publications for over the last two years. It aims to help readers for selecting an appropriate journal for publishing own research in the international arena or to find the required topic for conducting further investigating or to be informed about so large-scale science as accounting. Here a reader will find detailed information about accounting journals in terms of Scopus, Web of Science and SCImago databases. In addition, there are highlighted accounting journals in terms of IFRS and blockchain concentration in accounting researches nowadays. The relevant aims and scope of each journal are also presented. Anyway, this book is an indispensable assistant for students while getting the "Accounting" specialization, as well as teachers and

scientists while conducting empirical researches in the practice and theory of the accounting field.
