ELLEN GRANT

Ethics in Health Care Elsevier Health Sciences

Organizational Behavior in Health Care was written to assist those who are on the frontline of the industry everyday—healthcare managers who must motivate and lead very diverse populations in a constantly changing environment. Designed for graduate-level study, this book introduces the reader to the behavioral science literature relevant to the study of individual and group behavior, specifically in healthcare organizational settings. Using an applied focus, it provides a clear and concise overview of the essential topics in organizational behavior from the healthcare manager's perspective. Organizational Behavior in Health Care examines the many aspects of organizational behavior, such as individuals' perceptions and attitudes, diversity, communication, motivation, leadership, power, stress, conflict management, negotiation models, group dynamics, team building, and managing organizational change. Each chapter contains learning objectives, summaries, case studies or other types of activities, such as, self-assessment exercises or evaluation.

Quality Care to the End of Life Elsevier Health Sciences

Containing almost 800 questions in an easy to use format, this unique study guide is an essential tool that reinforces the content presented in the core text. The variety of questions include critical thinking discussion questions, classroom and homework activities, and multiple response. Questions

build on key concepts presented in the core text on a chapter-by-chapter basis. Varying levels of difficulty are included for self-adaptive learning and review.

Evaluation and Testing in Nursing Education Springer Publishing Company

Kozier and Erb's Fundamentals of Nursing prepares students for practice in a range of diverse clinical settings and help them understand what it means to be a competent professional nurse in the twenty-first century. This third Australian edition has once again undergone a rigorous review and writing process. Contemporary changes in the regulation of nursing are reflected in the chapters and the third edition continues to focus on the three core philosophies: Person-centred care, critical thinking and clinical reasoning and cultural safety. Students will develop the knowledge, critical thinking and clinical reasoning skills to deliver care for their patients in ways that signify respect, acceptance, empathy, connectedness, cultural sensitivity and genuine concern.

Introductory Mental Health Nursing Elsevier Health Sciences

Take a fresh, new approach to nursing fundamentals that teaches students how to think, learn, and do while they make the 'connections' each step of the way.

Writing for Publication in Nursing Jutta and Company Ltd

GERONTOLOGICAL NURSING, 3/e is a comprehensive, research-based, and up-to-date guide to nursing care for older adults in all settings. It brings together essential information about normal and pathological changes associated with aging; healthy aging; common diseases of aging; and key

psychosocial, cultural, and public health issues. Reflecting today's emphasis on evidence-based practice and appropriate delivery of scarce healthcare resources, this text presents new best practices and QSEN standards throughout, promoting more effective assessment, diagnosis, planning, and outcome evaluation. The text's multidisciplinary approaches help nurses "add life to years," not just extend life. Its coverage of acute and chronic diseases includes nursing implications, atypical presentation, functional implications, pharmacology, evaluation, etiology, risk factors, and complications; the text also includes a full chapter on multisystem diseases. This book supports safe, effective, and appropriate practice in the home, hospitals, long-term care, and hospice settings.

An International Focus Springer Publishing Company

Preparing students for successful NCLEX results and strong futures as nurses in today's world. Now in its 12th edition, Brunner and Suddarth's Textbook of Medical-Surgical Nursing is designed to assist nurses in preparing for their roles and responsibilities in the medical-surgical setting and for success on the NCLEX. In the latest edition, the resource suite is complete with a robust set of premium and included ancillaries such as simulation support, adaptive testing, and a variety of digital resources helping prepare today's students for success. This leading textbook focuses on physiological, pathophysiological, and psychosocial concepts as they relate to nursing care. Brunner is known for its strong Nursing Process focus and its readability. This edition retains these strengths and incorporates enhanced visual appeal and better portability for students. Online Tutoring powered by Smarthinking--Free online tutoring, powered by Smarthinking, gives students access to expert nursing and allied health science educators whose mission, like yours, is to achieve success. Students can access live tutoring support, critiques of written work, and other valuable tools.

Palliative Care Nursing, Fourth Edition F.A. Davis

Three-time recipient of the AJN Book of the Year Award! Praise for the third edition: "This is an outstanding edition of this book. It has great relevance for learning about, developing, and using middle range theories. It is very user friendly, yet scholarly." Score: 90, 4 Stars -Doody's Medical Reviews The fourth edition of this invaluable publication on middle range theory in nursing reflects the most current theoretical advances in the field. With two additional chapters, new content incorporates exemplars that bridge middle range theory to advanced nursing practice and research. Additional content for DNP and PhD programs includes two new theories: Bureaucratic Caring and Self-Care of Chronic Illness. This user-friendly text stresses how theory informs practice and research in the everyday world of nursing. Divided into four sections, content sets the stage for understanding middle range theory by elaborating on disciplinary perspectives, an organizing framework, and evaluation of the theory. Middle Range Theory for Nursing, Fourth Edition presents a broad spectrum of 13 middle range theories. Each theory is broken down into its purpose, development, and conceptual underpinnings, and includes a model demonstrating the relationships among the concepts, and the use of the theory in research and practice. In addition, concept building for research through the lens of middle range theory is presented as a rigorous 10-phase process that moves from a practice story to a conceptual foundation. Exemplars are presented clarifying both the concept building process and the use of conceptual structures in research design. This new edition remains an essential text for advanced practice, theory, and research courses. New to the Fourth Edition: Reflects new theoretical advances Two completely new chapters New content for DNP and PhD programs Two new theories: Bureaucratic Caring and Self-Care of Chronic Illness Two articles from Advances in Nursing Science documenting a historical meta-perspective on middle range theory development Key Features: Provides a strong contextual foundation for understanding middle range theory Introduces the Ladder of Abstraction to clarify the range of nursing's theoretical foundation Presents 13 middle range theories with philosophical, conceptual, and empirical dimensions of each theory Includes Appendix summarizing middle range theories from 1988 to 2016

Theory, Practice, and Research Springer Publishing Company

The fourth edition of Certified Nurse Educator (CNE®/CNE®n) Review is designed to help you prepare for the National League for Nursing (NLN) certification exams. Designed for use by both novice and expert nurse educators, this comprehensive study aid with practice Q&A features a systematic approach to exam preparation and incorporates all key competencies and essential knowledge areas. The fourth edition has been updated to closely reflect the latest exam blueprints as well as current practices and an in-depth focus on the nurse educator shortage; competency-based education; technological teaching—learning tools, such as virtual simulation; and multigenerational learners. Case studies, critical-thinking questions, evidence-based teaching practice boxes, and teaching gems are also featured. Each chapter covers everything you need to know to pass the exam and includes end-of-chapter questions to check your knowledge. The review concludes with a full-length practice test to get you ready for exam day. With 300 practice questions, and detailed review content and answer rationales, the study aid empowers you with the tools and materials to study your way and the confidence to pass the first time, guaranteed! Know that you're ready. Know that you'll pass with Springer Publishing Exam Prep. Key Features Includes review for the new Academic Novice Nurse Educator (CNE®n) exam Reflects the latest NLN CNE®/CNE®n exam blueprints Provides a comprehensive yet concise review of essential knowledge for both exams Features case studies and critical-thinking questions to showcase practical applications of nurse educator topics. Provides Evidence-Based Teaching Practice Boxes and "Teaching Gems" from practice experts to reinforce key concepts. Includes end-of-chapter Q&A and a full practice test with detailed rationales Boosts your confidence with a 100% pass guarantee CNE® and CNE®n are registered service marks of the National League for Nursing (NLN). NLN does not sponsor or endorse this resource, nor does it have a proprietary relationship with Springer Publishing.

Jones & Bartlett Learning

"Addresses importance of new technology and changing structures of online learning. This authoritative text shows nurse educators and students how to teach in the online environment, using best practices and the latest technology. The fourth edition discusses the importance of lifelong learning and the relationship to flexible online learning environments, which are changing the dynamics of education. This valuable resource provides updated strategies for organizing and disseminating course content and examines such topics as massive open online courses (MOOCs), certificates, badges, and stackable degrees. The fourth edition also provides the latest evidence-based research examining student-teacher interactions, course management, web-based resources, and best practices. Chapters include real-world examples and applications of these concepts."--Publisher's description.

Essentials of Pharmacology for Nurses F.A. Davis

A portion of the revenue from this book's sales will be donated to Doctors Without Borders to assist the humanitarian work of nurses, doctors, and other health care providers in the fight against COVID-19 and beyond. Concepts and Cases in Nursing Ethics is an introduction to contemporary ethical issues in health care, designed especially for Canadian audiences. The book is organized around six key concepts: beneficence, autonomy, truth-telling, confidentiality, justice, and integrity. Each of these concepts is explained and discussed with reference to professional and legal norms. The discussion is then supplemented by case studies that exemplify the relevant concepts and show how each applies in health care and nursing practice. This new fourth edition includes an added chapter on end-of-life issues, and it is revised throughout to reflect the latest developments on topics such as global health ethics, cultural competence, social media, and palliative sedation, as well as ethical issues relating to COVID-19.

Juta's manual of nursing Springer Publishing Company

This ideal starter text for student nurses aims to make pharmacology less intimidating and focuses on the knowledge needed at pre-registration level in order to practice as a newly qualified nurse, in a variety of different settings.

Record Keeping Prentice Hall

Patient-focused and adopting a caring approach, this essential text will also help you to integrate nursing values alongside physical skills in your daily practice. Key features include: Full colour text design with clear illustrations and clinical photographs to aid visual learning Evidence-based and clearly mapped to key guidelines to ensure best practice Reader-friendly style with learning outcomes, activities and reflection points to help you link theory to practice Scenarios from a range of settings, including community, mental health and learning disabilities nursing A focus on adults and young people, and with "pointers" on caring for children to promote a lifespan approach Free companion website providing image library, videos of key skills, and MCQs as well as additional resources for lecturers to download This is a complete clinical skills resource for all pre-registration nursing students. *Clinical Teaching Strategies in Nursing, Fourth Edition* Pearson Higher Education AU

This fourth edition of a comprehensive text/reference that has been valued by students, educators, and practicing nurses for many years, Palliative Care Nursing continues to reflect the fundamental basic and advanced hospice and palliative care nursing competencies that are required for effective and empathetic care of patients and families. This new edition focuses on palliative care that is responsive to the demand for health care reform in America and globally. It provides the knowledge, scientific evidence, and skills needed by nurses to address the complex physical, emotional, social, and spiritual needs of patients and families within the context of a changing health care delivery system. With a focus on interprofessional collaboration, the book emphasizes the value of complementary, holistic models in promoting health, wholeness, and wellness across the illness trajectory, even as death approaches.

Health Care Service Management Springer Publishing Company

Designed for the management and development of professional nurses, this text provides management concepts and theories, giving professional administrators theoretical and practical knowledge, enabling them to maintain morale, motivation, and productivity. Organized around the four management functions of Planning, Organizing, Leadership, and Evaluation, it includes new chapters on total quality management, the theory of

human resource development, and collective bargaining. Additionally, content has been added to include recommendations from the work of the Institute of Medicine and the Magnet Appraisal process.

Concepts, Connections & Skills Lippincott Williams & Wilkins

Prepared under the auspices of the International Council of Nurses (ICN), this first volume provides a comprehensive overview of the rapidly emerging field of advanced nursing practice. It addresses central issues in the role and practice development that are fundamental to defining and differentiating the nature of this field. Topics include defining the role, role characteristics, scope of practice, education, regulation and research. Obstacles to and facilitators of that role are addressed and include ethical questions arising in the context of practice development. With an international focus, this volume examines international developments in the field, as reflected in country-specific case studies and examples. It offers a valuable resource for advanced practice nurses, educators and administrators at healthcare institutions.

Developing Online Courses in Nursing Education, Fourth Edition Delmar Pub

Leadership is central to all aspects of the nursing role, from managing the delivery of high quality care to acting as a role model for best practice.
