The Non-Prescription Medicines in the Pharmacy is a valuable resource to assist pharmacists, pharmacy assistants and students to respond appropriately to product requests and symptom presentations in the pharmacy. It acts as a guide to advice and treatment helping pharmacy staff to provide appropriate advice and/or recommend treatment in the pharmacy.--Publisher.

Abstracts of the Papers Printed in the Philosophical Transactions of the Royal Society of London Routledge

'Governance' has become a key word in the lexicon of international relations over the last twenty years. It is used, loosely, and invariably in a liberal idiom, by scholars, activists, civil society organizations, politicians and the voluntary sector. In many respects it has attained the status of a fetish, yet 'governance' remains a notion that has multiple definitions, a concept in-the-making. Notwithstanding the imprecision with which the term is employed, it has become an inescapable paradigm for the politics of development. The contributors

to this book, drawn from among some of the world's best area studies specialists, from North and South, offer a diverse global critique of 'governance' as deployed in several key areas: institutions and state actors; the rule of law, democracy and human rights; decentralization and state power; development and, last but not least, international cooperation and the role of the World Bank, the IMF and NGOs. The geographical spread of the volume ranges from Africa to Latin America, from Asia to the Middle East. Their objectives include: a reassessment of 'governance' in its many manifestations; an attempt to free the term from its often unhelpful linkage to the state, and thereby apply it to other organizations and actors; a re-evaluation of the Western-dominated use of the term politically and an attempt to broaden its application beyond issues such as transparency and the fight against corruption; and a search for innovative applications of the term, driven by a consensus that transcends current economic and political inequalities.

Lumière des origines Harcourt School Publishers

Practical methods for healing after the loss

of a member of the military When a loved one is killed in the line of duty, this book affirms that survivors' grief is shaped by the unique circumstances of the death. Because military deaths are almost always sudden and violent, the traumatic nature of the loss creates a two-part grief—one focused on the manner in which the person died, the other focused on the long-term repercussions of life without this special person. This guide acknowledges the unique mixture of sadness, pride, anger, and blame that often characterizes grief after a military death, including in the event of a military suicide, and offers ideas for constructively expressing thoughts and feelings. Anyone whose life has been touched by a military death will find compassionate understanding and healing guidance in the pages of this handbook.

Les Avaries Springer

Impressive but achievable flower arranging The Flower Book in ebook(PDF) format recognizes that we all love fresh flowers in our homes and want to keep them looking fabulous, without costing the earth or being too complicated. This book offers the solutions; with simple step-by-

steps and clear photos, you can now create impressive but achievable flower arranging for all occasions ♦ from pretty flowers in the home to striking bouquets for weddings. Featuring over 70 arrangements, using 38 most widely available flowers. Packed with insider tips and tricks for achieving stunning results with minimum effort and for keeping your flowers fresh and beautiful for as long as possible. There are also features on weddings throughout the year, showing you how to make beautiful pew ends, buttonholes and table arrangements for each season. While other flower arranging books look impressive, but leave you wondering just how to achieve such beautiful arrangements at home, this book isn't just about showing off, it's about showing how.

Flower Arranging SAGE

'One of the most entertaining and profound philosophical novels ever written' Washington Post On a cold night in Holland two men meet and change each other's lives forever. Max Delius - a hedonistic, yet brilliant astronomer who loves fast cars, nice clothes and beautiful women - picks up Onno Quist, a cerebral

chaotic philologist who cannot bear the ordinariness of everyday life. Despite their differences, they fast become great friends. And when they learn they were conceived on the same day, it is clear that their meeting is no coincidence. As the pair fall into and out of love with the same woman - Ada - so their lives become further intertwined. For all three are on a mysterious journey destined to shape human history. The Discovery of Heaven is internationally recognized as a masterpiece. Rich in philosophical, psychological, historical and theological enquiry, it is an extravagant, bold and satisfying novel of ideas. 'Sparkling, irresistible . . . you'll learn a lot from this novel' The Times 'Anyone who reads The Discovery of Heaven will come away enlightened, challenged and entertained' Wall Street Journal 'Written carefully and ingeniously by a novelist who is also a poet' John Updike, New Yorker

Global Business Intelligence refers to an organization's ability to gather, process and analyze pertinent international information in order to make optimal

business decisions in a timely manner. With a challenging economic and geopolitical environment, companies and executives need to be adept at information gathering in order to manage emerging challenges and gain competitive advantages. This book Global Business Intelligence assembles a cast of international experts and thought leaders and explores the implications of business intelligence on contemporary management. Global Business Intelligence will be a key resource for researchers, academics, students and policy makers alike in the fields of International Business & Management, Business Strategy, and Geopolitics as well as related disciplines like Political Science, Economics, and Geography.

Communications Operator Springer

Dr. Gunter Pauli is challenging the green movement he has been so much a part of to do better, to do more. He is the entrepreneur who launched Ecover; those products are probably in many of your homes. He built the largest ecologically-sound factory in the world. His participation in the Club of Rome and the founding of Zero Emissions Research

Institute (ZERI) has made an immense contribution to sustainability both in terms of research, public awareness and articulating a visionary direction. He has dedicated himself to teaching and the hands-on implementation of projects that have brought healthy environments, good nutrition, health care and jobs in sustainable commerce to a myriad of places in the world.

Good Press

Statistical Models and Methods for Reliability and Survival Analysis brings together contributions by specialists in statistical theory as they discuss their applications providing up-to-date developments in methods used in survival analysis, statistical goodness of fit, stochastic processes for system reliability, amongst others. Many of these are related to the work of Professor M. Nikulin in statistics over the past 30 years. The authors gather together various contributions with a broad array of techniques and results, divided into three parts - Statistical Models and Methods, Statistical Models and Methods in Survival Analysis, and Reliability and Maintenance.

The book is intended for researchers interested in statistical methodology and models useful in survival analysis, system reliability and statistical testing for censored and non-censored data.

by Good Press. Good Press publishes a

wide range of titles that encompasses

every genre. From well-known classics &

literary fiction and non-fiction to

forgotten—or yet undiscovered gems—of

world literature, we issue the books that

need to be read. Each Good Press edition

has been meticulously edited and

formatted to boost readability for all e-

readers and devices. Our goal is to

produce eBooks that are user-friendly and

accessible to everyone in a high-quality

digital format.

Emerging Framework of Interdependence

UN

This textbook provides a comprehensive overview of the main theories which structure debate about urban politics. It looks at aspects of power, taking in both traditional and more recent theories. It considers the nature of public bureaucracy and the importance of those officials with a leadership role in city government. It examines the way that citizens are involved in the processes of urban politics, and it puts urban politics in context in terms of the social and economic environment and the complex architecture of government in which it has to operate. (Adapté du résumé de l'éditeur).

Democratic Governance John Wiley & Sons

This title was first published in 2002: This monograph sets out to model a

macroeconomy that is inherently unstable because of qualitative - or Keynesian -

uncertainty. By modelling a

macroeconomic theory, this approach to

fixed or sticky prices also investigates the

link between uncertainty, sticky prices,

and macro-stability - by suggesting that

such prices improve economic activity

rather than impeding it.

Pièce en Trois Actes Passbooks

This book presents a comprehensive and systematic introduction to transforming process-oriented data into information about the underlying business process, which is essential for all kinds of decision-making. To that end, the authors develop step-by-step models and analytical tools for obtaining high-quality data structured in such a way that complex analytical tools can be applied. The main emphasis is on process mining and data mining techniques and the combination of these methods for process-oriented data. After a general introduction to the business intelligence (BI) process and its constituent tasks in chapter 1, chapter 2 discusses different approaches to modeling in BI applications. Chapter 3 is an overview and provides details of data provisioning, including a section on big data. Chapter 4 tackles data description, visualization, and reporting. Chapter 5 introduces data mining techniques for cross-sectional data. Different techniques for the analysis of temporal data are then detailed in Chapter 6. Subsequently, chapter 7 explains techniques for the analysis of process data, followed by the introduction of analysis techniques for

multiple BI perspectives in chapter 8. The book closes with a summary and discussion in chapter 9. Throughout the book, (mostly open source) tools are recommended, described and applied; a more detailed survey on tools can be found in the appendix, and a detailed code for the solutions together with instructions on how to install the software used can be found on the accompanying website. Also, all concepts presented are illustrated and selected examples and exercises are provided. The book is suitable for graduate students in computer science, and the dedicated website with examples and solutions makes the book ideal as a

textbook for a first course in business intelligence in computer science or business information systems. Additionally, practitioners and industrial developers who are interested in the concepts behind business intelligence will benefit from the clear explanations and many examples.
