*A Route and Planning Guide* Trail Blazer Publications

The fifth edition of *Numerical Methods for Engineers with Software and Programming Applications* continues its tradition of excellence. The revision retains the successful pedagogy of the prior editions. Chapra and Canale's unique approach opens each part of the text with sections called Motivation, Mathematical Background, and Orientation, preparing the student for what is to come in a motivating and engaging manner. Each part closes with an Epilogue containing sections called Trade-Offs, Important Relationships and Formulas, and Advanced Methods and Additional References. Much more than a summary, the Epilogue deepens understanding of what has been learned and provides a peek into more advanced methods. Users will find use of software packages, specifically MATLAB and Excel with VBA. This includes material on developing MATLAB m-files and VBA macros. Also, many, many more challenging problems are included. The expanded breadth of engineering disciplines covered is especially evident in the problems, which now cover such areas as biotechnology and biomedical engineering

In 2011, at the height of tension between the British and Iranian governments, travel writer Lois Pryce found a note left on her motorcycle outside the Iranian Embassy in London: ... I wish that you will visit Iran so you will see for yourself about my country. WE ARE NOT TERRORISTS!!! Please come to my city, Shiraz. It is very

famous as the friendliest city in Iran, it is the city of poetry and gardens and wine!!! Your Persian friend, Habib Intrigued, Lois decides to ignore the official warnings against travel (and the warnings of her friends and family) and sets off alone on a 3,000 mile ride from Tabriz to Shiraz, to try to uncover the heart of this most complex and incongruous country. Along the way, she meets carpet sellers and drug addicts, war veterans and housewives, doctors and teachers - people living ordinary lives under the rule of an extraordinarily strict Islamic government. Revolutionary Ride is the story of a people and a country. Religious and hedonistic, practical and poetic, modern and rooted in tradition - and with a wild sense of humour and appreciation of beauty despite the comparative lack of freedom - this is real contemporary Iran.

The Sibirsky (Siberian) Extreme Project was a 2009 motorcycle adventure project by motorcycle adventurer Walter Colebatch to attempt to go into the ultimate depths of Siberia. The project aimed to push the boundaries of what is known and what is possible in terms of motorcycling in Siberia and hoped to ride new routes and tracks that had yet to be explored by adventure motorcyclists to date. On the ambitious schedule were: - the Tuva Track, a vague boggy unriden route linking the Altai and Tuvan Republics, near the Mongolian border,

between the towns of Kosh Agach and Mugar Aksy - the Anabar Road from Lensk to Udachny, an unriden route leading further north in Asia than anyone had ridden before (over 66 degrees North). - the Vilyuisky Trakt, an unriden dirt track only completed in early 2009 that runs 1500 kms east (950 miles) between Lensk, Mirny and Yakutsk. - the legendary BAM Road, 4300 km from Vanino on the Pacific Ocean to Taishet in central Siberia; an abandoned road no motorcyclist had ever even attempted in its entirety, let alone ridden. To many adventurers, the BAM Road is the toughest road on the planet. This book covers the planning, the riding, the struggles, the triumphs and the disappointments of this incredibly challenging itinerary.

Young and beautiful, Lois Pryce was a rising star at the BBC. Unbeknownst to her co-workers, Lois lived a parallel life as a biker babe with an overwhelming sense of wanderlust. So she packed in her career to ride her motorcycle on her own from the northernmost tip of Alaska to the southernmost tip of South America. Alone. Armed only with the Spanish words for 'caution' and 'cheese', Lois was rather under-prepared for multiple bear sightings, bribing her way through borders, spending a night in a Mexican brothel and crashing her bike in the wilds of Patagonia. She most certainly got the adventure she craved, and her pulse-pounding, soul-searching adventure has already attracted fans worldwide - a weblog that she kept whilst on her travels was receiving more than two-thousand hits a day. Her hilarious, brilliantly written travelog will appeal to anyone who's ever dreamt of jacking-it-all-in and running away to see the world.

Bernt Spiegel's *The Upper Half of the Motorcycle* was a best-selling motorcycling book in its original German with multiple editions and printings to its credit. Now translated into English, its provocative message is available to a wider audience. Spiegel's metaphor considers the rider and the motorcycle as a single unit, the rider being the upper half. Taking a multidisciplinary approach, the author draws on anthropology, psychology, biology, physics, and other disciplines to analyze the theory and function of the man-machine unit. Motorcycle riding is seen as a junction where people have created

machines for personal transport and then become so adept at using them that the machine becomes like an extension of the rider themselves. The ultimate goal for riders is the integration of the man-machine interface and subsequent skill development to the point of virtuosity. Spiegel considers the various aspects of motorcycle riding that must be understood, practiced, and mastered before virtuosity can be attained. Many anecdotes, supplementary material, and in-depth treatment of specialized topics is contained in sidebars and footnotes. Numerous diagrams and photographs illustrate the book's principles allowing the reader to consider and develop their riding skill set.

To most thirty-something women, walking across the street to get a skinny latte and the latest copy of heat in excruciating high heels is an all-terrain task in itself. But Lois Pryce isn't just any woman - nine to five and post-work white wine spritzers have never been her thing. Unafraid of a challenge - having already ridden her motorbike from Alaska to the southernmost tip of South America - she decided she could never be one to settle for a last minute package holiday in Viva Espana. So, she began the kind of adventure most of us could only ever dream of.

Ella Maillart was the adventurous Swiss woman who made her name as an intrepid explorer and one of the most remarkable woman travelers of the early twentieth century. An amazing sports woman, she first represented her country as the only woman competitor at the 1924 Paris Olympics in the single-handed boat-sailing contest, then later raced for Switzerland as a member of the international ski team. Yet these outdoor activities only developed Maillart's insatiable curiosity to travel east, leaving behind the confines of her early life in Geneva in search of the perfect life that she was instinctively seeking. Her later adventures took her across many continents and various oceans. Maillart sailed the Mediterranean in a

yawl, traveled with famed travel English travel writer Peter Fleming from Peking to Kashmir, explored Tibet with a half-wild tiger-cat in search of spiritual enlightenment, and finally drove 4,000 miles from war-torn Europe to the fabled Khyber Pass in a battered Ford car. Yet her solo journey through Central Asia in the early 1930s was considered to be a highlight of her adventure-filled life. Setting off from the Tien Shan mountains of Mongolia, Maillart rode horses and camels to the far away walls of fabled

Bokhara. Turkestan Solo is her vivid account of this wonderful, mysterious and dangerous portion of the world, complete with its Kirghiz eagle hunters, lurking Soviet secret police, and the timeless nomads that still inhabited the desolate steppes of Central Asia. If any book can give its reader the ability to look back in time, this one does, written as it was by one of the world's foremost female equestrian explorers. Amply illustrated, it remains a timeless adventure classic.
