Water plays a vital role in shaping our built environment, as it has done for centuries. We depend on it, we use it, we live with it and we must respect it. Aquatecture is the first book to outline new ways of 'designing for water,' using examples from around the world to illustrate methods of utilizing water innovatively, efficiently and safely. The first part of the book explores the historical relationship between water and architecture, examining how cities and civilisations have been drawn to water and have attempted to control it. The chapters go on to assess how this relationship has changed over time, and introduce readers to a range of brand new techniques that will revolutionise the way we think about water, design and urban planning. Solutions such as amphibious housing, wet-proof buildings, zero carbon development, rain gardens, flood storage and new methods of waterfront design are discussed and their effectiveness assessed. Full colour illustrations and international case studies are used throughout the book to bring these new theories to life; practical, technical advice sits alongside truly ground-breaking and ambitious ideas for the future. This book is an ideal reference tool for all architects, urban designers, planners and sustainability experts who have an interest in creating a beautiful, sustainable, intelligent and pleasurable built environment on land, in water and with water.

This book, companion to the much-acclaimed Dalit Literatures in India, examines questions of aesthetics and literary representation in a wide range of Dalit literary texts. It looks at how Dalit literature, born from the struggle against social and political injustice, invokes the rich and complex legacy of oral, folk and performative traditions of marginalised voices. The essays and interviews systematically explore a range of literary forms, from autobiographies, memoirs and other testimonial narratives, to poems, novels or short stories, foregrounding the diversity of Dalit creation. Showcasing the interplay between the aesthetic and political for a genre of writing that has 'change' as its goal, the volume aims to make Dalit writing more accessible to a wider public, for the Dalit voices to be heard and understood. The volume also shows how the genre has revolutionised the concept of what literature is supposed to mean and define. Effervescent first-person accounts, socially militant activism and sharp critiques of a little-explored literary terrain make this essential reading for scholars and researchers of social exclusion and discrimination studies, literature (especially comparative literature), translation studies, politics, human rights and culture studies.

One of Reader's Digest Best Summer Reads (US). Set against the backdrop of the Sri Lankan civil war, Ru Freeman's epic novel explores the lives of the diverse families that live on Sal Mal Lane and the heartbreaking ways this once harmonious community turns on one another with the country on the brink of war. On the day the Herath family moves in, Sal Mal Lane is a quiet street, disturbed only by the cries of the children whose triumphs and tragedies sustain the families that live there. As each neighbour adapts to the newcomers in different ways, the children fill their days with cricket matches, romantic crushes, and small rivalries. But when the tides of civil war begin to turn towards the neighbourhood, their differences ignite in ways no one could have imagined. As the stability of their neighborhood is threatened by clashing political beliefs and prejudices, the children of the community are forced to watch their parents and friends turn against one another. Seen through the children's eyes, the events on Sal Mal Lane come to mirror the course of modern Sri Lanka at its most violent and volatile. A powerful, evocative work, *On Sal Mal Lane* masterfully illuminates the origins of this war and explores the lengths family will go to protect one another.
