A beginner's manual especially geared to the needs of entry-level riders, this book provides all the basic instruction necessary to become a motorcycle rider with an emphasis on

the challenges faced by neophyte riders.

Starting at neophyte level and evolving into a serious, intelligent expert, *How to Ride a Motorcycle* tells the reader how to be a motorcycle rider with a strong emphasis on safety and big-picture strategy ("think about it this way" as opposed to "do this.")

Manuals N. America, Incorporated From the publishers of Motorcycle Consumer News, Shifting Gears at 50 is a one-of-a-kind motorcycling manual for returning and late-entry riders, essentially anyone 40 years old and up who's looking to hit the road on two wheels. Author Philip Buonpastore, a motorcycle journalist and retired US Air Force photographer, helps readers gear up to get

back on a motorcycle (or get on one for the first time). In Part 1, "Becoming a Motorcyclist," Buonpastore discusses the basics of buying the right bike, gear, and equipment and getting the bike up to speed. The book continues with a good overview of learning to ride, the importance of taking a road course, venturing out on the first ride, and extending rides to long-

distance jaunts. Throughout Part 1 are sidebars by riding- safety instructor and expert Walt Fulton, offering sound advice on safety precautions and execution for every leg of the new and returning rider's journey. The author emphasizes what older riders should be aware of and which factors can affect their rides. Adding lots of great firsthand advice are humorous and

helpful stories collected by the author and related by returning riders at various ages, from their late 30s to 60s. In Part 2, Buonpastore shares five of his favorite travelogues covering his long-distance tours around the US, from the American South to the west coasts. This section is illustrated by over 100 of the author's breathtaking photographs of the various locations he toured on his bike. The foreword to

the book is provided by best-selling motorcycle author David Hough (author of I-5 Press's *Proficient Motorcycling and Mastering the Ride*). Hough writes, "If you're getting into today's motorcycling at an age your doctor would describe as 'middle aged' or 'senior,' do you yourself a clever favor and read Phil's book." *Cycle World* The Rosen Publishing Group, Inc Focusing only on those features of

Microsoft Word 2013 that are relevant to the legal community, this updated edition of the Payne Group's market-leading guide to Word provides industry-specific information about the computer program that will help legal professionals operate effectively and efficiently in their environment. A companion website also includes customized legal templates and

documents, hands-on exercises, and practice files, among many other services. Whether they are using Word for the first time or simply updating to the most recent version, readers will find all of the information they'll need to increase their productivity and make the most out of Microsoft's word processing program in this expert manual.
