Financial management SBPD Publications

This new edition, expanded with the addition of four new chapters, continues to help students develop an essential understanding of how financial management plays a positive role in strategic management of organisations. The book is designed for a foundation course in

financial management for postgraduate students of business management (MBA), commerce, engineering and technology. It focuses on the basic concepts underlying the theory of financial management and also real-world practice in areas of investment, financing and asset management. Each financial function is discussed in a lucid and concise manner to help students improve their basic skills in financial management. The aim of the book is to enable the readers to gain insight into the financial decision-making processes. The book introduces the readers to the three major decision-making areas in financial management: break-even analysis,

decisions involving alternative choices, and variance analysis. Key Features: A systematic presentation of the subject matter, supported with a number of illustrations and diagrams The topics of ratio analysis and cash flow analysis have been thoroughly revised and enlarged in accordance with the Accounting Standards (AS) issued by the ICAI Theoretical discussions are supplemented with suitable case studies Examination problems are given at the end of each chapter The chapter New Horizons in Budgeting explains the latest trends in budgeting.

Fundamentals of Financial Management
