Health, Human Rights, and the New War on the Poor Penguin

Leadership, Robert W. Terry contAnds, is a type of action. In Authentic Leadership, he shows how this shift in perspective carries enormous consequences for consideration of courage, vision, ethics, and spirituality as they relate to leadership. Terry show that the central organizing principle of leadership is authenticity. And he shows how authenticity and action joined together form a sure foundation for effective leadership.

In the Trenches of Hell On July 19, 1916, 7000 Australian soldiers - in the first major action of the AIF on the Western Front - attacked entrenched German positions at Fromelles in northern France. By the next day, there were over 5500 casualties, including nearly 2000 dead - a bloodbath that the Australian War Memorial describes as 'the worst 24 hours in Australia's entire history. Just days

later, three Australian Divisions attacked German positions at nearby Pozieres, and over the next six weeks they suffered another 23,000 casualties. Of that bitter battle, the great Australian war correspondent Charles Bean would write, "The field of Pozieres is more consecrated by Australian fighting and more hallowed by Australian blood than any field which has ever existed . . ." Yet the sad truth is that, nearly a century on from those battles, Australians know only a fraction of what occurred. This book brings the battles back to life and puts the reader in the moment, illustrating both the heroism displayed and the insanity of the British plan. With his extraordinary vigour and commitment to research, Peter FitzSimons shows why this is a story about which all Australians can be proud. And angry.

NAMED ONE OF THE BEST BOOKS OF THE YEAR BY: Los Angeles Times • San Francisco Chronicle • Chicago Tribune • The Christian Science Monitor • Publishers Weekly In Strength in What Remains, Tracy Kidder gives us the story of one man's inspiring American journey and of the ordinary people who helped him, providing brilliant testament to the power of second chances.

Deo arrives in the United States from Burundi in search of a new life. Having survived a civil war and genocide, he lands at JFK airport with two hundred dollars, no English, and no contacts. He ekes out a precarious existence delivering groceries, living in Central Park, and learning English by reading dictionaries in bookstores. Then Deo begins to meet the strangers who will change his life, pointing him eventually in the direction of Columbia University, medical school, and a life devoted to healing. Kidder breaks new ground in telling this unforgettable story as he travels with Deo back over a turbulent life and shows us what it means to be fully human. Thom Jones made his literary debut in *The New Yorker* in 1991. Within six months his stories appeared in Harper's, *Esquire*, *Mirabella*, *Story*, *Buzz*, and in *The New Yorker* twice more. "The Pugilist at Rest" - the title story from this stunning collection - took first place in Prize Stories 1993: The O. Henry Awards and was selected for inclusion in Best American Short Stories 1992. He is a writer of astonishing talent. Jones's stories - whether set in the combat zones of Vietnam or the brittle social and intellectual milieu of an elite New England college, whether recounting the poignant last battles of an alcoholic ex-fighter or the hallucinatory visions of an American wandering lost in Bombay in the aftermath of an epileptic fugue - are fueled by an almost brutal vision of the human condition, in a world without mercy or redemption. Physically battered, soul-sick, and morally exhausted, Jones's characters are yet unable to concede defeat: his stories are infused with the improbable grace of the spirit that ought to collapse, but cannot. For in these extraordinary pieces of fiction, it is not goodness that finally redeems us, but the heart's illogical resilience, and the ennobling tenacity with which we cling to each other and to our lives. The publication of *The Pugilist at Rest* is a major literary event, heralding the arrival of an electrifying new voice in American fiction, and a writer of magnificent depth and range. With these eleven stories, Thom Jones takes his place among the ranks of this country's most important authors. [Conversations with Dr. Paul Farmer and Fr. ABOUT THE BOOK I first heard of Partners in Health, the organization founded by Dr. Paul Farmer, after the catastrophic earthquake in Haiti in January, 2010. I was impressed by this organization and its commitment to the long-term welfare of the people of Haiti, and I sent in an online donation. That small gesture led me to Tracy Kidders, *Mountains Beyond Mountains*, a nonfiction book focusing on the life and mission of Farmer. The book is a gripping story of a doctor who has changed the face of global medicine and public health; particularly in impoverished countries like Haiti. Kidder tells Farmers life story using interviews, observations, and extensive first-hand. MEET THE AUTHOR Freelance writer Vivian Wagner has wide-ranging interests, from technology and business to music and motorcycles. She writes features regularly for ECT News Network, and her work has also appeared in *American Profile*, *Entrepreneur*, *Bluegrass Unlimited*, and many other publications. She is also the author of *Fiddle: One Woman, Four Strings, and 8,000 Miles of Music* (Citadel 2010). For more about her, visit her website at www.vivianwagner.net. EXCERPT FROM THE BOOK *Mountains Beyond Mountains* is a biography of Paul Farmer, as well as a narrative about the work that Farmer has done in the field of global medicine and poverty. To write the book, Tracy Kidder spent extensive time with Farmer and his colleagues, friends, and family members, conducting interviews, observing, and even participating in the action. The book was published in 2003 to much critical acclaim. In USA Today Nicolas Thomas remarks, *Mountains Beyond Mountains* is an astonishing book that will leave you questioning your own life and political views. Its the perfect testament to a man who continues to reshape medicine and who has become, undoubtedly, an uncommon savior to a country that desperately needed one. A review in the San Jose Mercury News said, with gripping descriptions of the plight of the people Farmer treats, Kidder makes us see the urgency of Farmers mission. Buy a copy to keep reading! This powerful and inspiring new book shows how one person can make a difference, as Kidder tells the true story of a gifted man who is in love with the world and has set out to do all he can to cure it. At the center of *Mountains Beyond Mountains* stands Paul Farmer. Doctor, Harvard professor, renowned infectious-disease specialist, anthropologist, the recipient of a MacArthur "genius" grant, world-class Robin Hood, Farmer was brought up in a bus and on a boat, and in medical school found his life's calling: to diagnose and cure infectious diseases and to bring the lifesaving tools of modern medicine to those who need them most. This magnificent book shows how radical change can be fostered in situations that seem insurmountable, and it also shows how a meaningful life can be created, as Farmer--brilliant, charismatic, charming, both a leader in international health and a doctor who finds time to make house calls in Boston and the mountains of Haiti--blasts through convention to get results. At the heart of this book is the example of a life based on hope, and on an understanding of the truth of the Haitian proverb "Beyond mountains there are mountains": as you solve one problem, another problem presents itself, and so you go on and try to solve that one too.

Among Schoolchildren Harper Collins

On February 29, 2004, the first democratically elected president of Haiti, Jean-Bertrand Aristide, was forced to leave his country. The president was kidnapped, along with his Haitian-American wife, by American soldiers and flown to the isolated Central African Republic. In *An Unbroken Agony*, best-selling author and social justice advocate Randall Robinson chronicles his own cross-Atlantic journey to rescue the Haitian president from captivity in Africa while also connecting the fate of Aristide's presidency to the Haitian people's century-long quest for self-determination. Quicklet on Tracy Kidder's *Mountains Beyond Mountains* Jossey-Bass

Winner of the National Book Award for First Fiction: "Beguiling stories . . . about an uncommonly fascinating part of the hemisphere" (Time). Easy in the Islands is a "stunning" collection of stories by one of contemporary America's foremost journalists and fiction writers. Infused with the rhythms of the Caribbean, these vivid tales of paradise sought and paradise lost are as lush, steamy, and invigorating as the islands themselves (The Washington Post). A calypso singer named Lord Short Shoe consorts with a vampish black singer to bilk an American out of his only companion—a monkey. An island bureaucracy confounds the attempts of a hotel owner to get his dead mother out of the freezer and into a real grave—until he resorts to a highly unusual form of burial. Two poor islanders stumble into a high-class dance party and find themselves caught in a violent encounter that just might escalate into revolution. And a young woman sails off into the romantic tropics with the man of her dreams, only to learn the hard way—as Eve did—that paradise is just another place to leave behind. From fishing fleets in remote atolls too small to appear on any map to the sprawling barrios and yacht filled marinas of Miami, Bob Shacochis charts a course across a Caribbean that no tourist will recognize.

Innovative EMS content and pedagogical elements make this an excellent choice for brief A&P courses that build a foundation of essential knowledge in human anatomy and physiology. Profound and powerful, *Mountains Beyond Mountains* takes us from Harvard to Haiti, Peru, Cuba and Russia, as the charismatic but flawed genius Dr Paul Farmer challenges widely-held preconceptions about poverty and healthcare. As a medical student, Farmer found his life's calling: to cure infectious diseases and to bring the lifesaving tools of modern medicine - so readily available in the developed world - to those who need them most. Beginning in Haiti, he tackles the conditions that contribute to so many unnecessary deaths with his trademark combination of world-class expertise, unlimited compassion, and the unstinting dedication of friends and colleagues. Tracy Kidder's magnificent and moving account shows how, from achieving this modest dream, one person can make a difference in solving global problems through a clear-eyed understanding of the interaction of politics, wealth, social systems and medicine.

The Pulitzer Prize-winning author's classic, "brilliantly illuminated" account of education in America (TheNew York Times Book Review). Mrs. Zajac is feisty, funny, and tough. She likes to call herself an "old-lady teacher." (She is thirty-four.) Around Kelly School, she is infamous for her discipline: "She is mean, bro," says one of her students. But children love her, and so will the reader of this extraordinarily moving book by the Pulitzer Prize-winning author of *House* and *The Soul of a New Machine*. Tracy Kidder spent nine months in Mrs. Zajac's fifth-grade classroom in a depressed area of Holyoke, Massachusetts. Living among the twenty schoolchildren and their indomitable teacher, he shared their joys, catastrophes, and small but essential triumphs. His resulting New York Times bestseller is a revelatory and remarkably poignant account of an inner-city school that "erupts with passionate life," and a close-up examination of what is wrong—and right—with education in America (USA Today). "More than a book about needy children and a valiant teacher; it is full of the author's genuine love, delight and celebration of the human condition. He has never used his talent so well." —The New York Times
