Classical Piano Solos for Weddings contains 9 favorite solos in their original form by composers of piano masterworks. Most of these solos are lyrical in style and can be used in wedding ceremonies or at receptions. Each solo has been carefully edited and fingered for performance ease. Essential ornamentation has been realized in the score and suggestions for interpreting grace notes are given in footnotes. This book is a valuable resource for wedding pianists since the most popular classical piano solos are included in one volume. Both the wedding party and guests will enjoy the beautiful melodies and lush harmonies of these timeless favorites. Titles: * Adagio cantabile (2nd movement), from Grand Sonate pathétique, Op. 13 (Beethoven) * Clair de lune, from Suite bergamasque (Debussy) * First Gymnopédie (Satie) * Nocturne in E-flat Major, Op. 9, No. 2 (Chopin) * Nocturne, Op. 54, No. 4 (Grieg) * Prelude in C Major, from The Well-Tempered Clavier, Book 1 (Bach) * Prelude in D-flat Major, Op. 28, No. 15 (Chopin) * Salut d'amour (Liebesgruss), Op. 12 (Elgar) * Träumerei, from Scenes of Childhood, Op. 15, No. 7 (Schumann).

The Morphological Atlas of the Dutch Dialects (MAND) presents word formation in Dutch and Frisian dialects at the end of the twentieth century in two comprehensive volumes. Based on data acquired in the field between 1979 and 2000, this collaborative effort between linguists from the Netherlands and Belgium deals with the grades of comparison of adjectives, possessive pronouns, personal pronouns for subject and object, the endings of present- and past-tense strong and weak verbs, the participle prefix, and the stem form of strong verbs.

Britain's public (that is, its major independent) schools have a conspicuous role in the country's social system, and as a result are the subject of a long-standing political debate. The discussion is generally founded on a stereotyped image of what these school may have been like in the 1950s - this books shows how they were in the late 1980s. It is based on fieldwork in two major public boarding schools which the author conducted over an extended period, and draws on interviews, observation and documentary sources to establish a picture of what public school life is actually

like for pupils and staff. Since the schools were predominantly male preserves, the major part of the book describes the social world and experiences of boys and school-masters. An important section of the book, however, discusses the introduction of girl pupils, the experiences of female teachers and the way schoolmasters' wives tend to be drawn into their husbands' work. Geoffrey Walford's conclusions about life in public schools differ considerably from traditional expectations. At the same time he asks whether there really has been a 'public school revolution'. His book makes an important contribution to our knowledge of public schools, to debates in the sociology of education and to the issues of abolishing or extending the independent sector.

While ideology has been treated widely in CDA-literature, the role played by the interaction of text and image in multiplying meaning and furthering ideological stances has not so far received a lot of attention. Mediating Ideology in Text and Image offers a number of approaches to such analysis, offering students and academics valuable tools for identifying possible discrepancies between the world and the way it is represented through various mediational means. The authors' common aim is one of assisting the audience in reading between the lines, thus offering a variety of approaches that may contribute to a better understanding of how ideologies possibly work and how they may be denaturalised from text and image. The articles in part I look at rhetorical strategies used in meaning construction processes unfolding in various kinds of mass media. Part II focuses on the re-semiotization of meaning and looks at how analysing the combination of text and image may contribute to a better understanding of ideological processes brought about by multimodal resources. Foreword by Ruth Wodak.

Written in recognition of developments in spatial data analysis that focused on differences between places, the first edition of Local Models for Spatial Analysis broke new ground with its focus on local modelling methods. Reflecting the continued growth and increased interest in this area, the second edition describes a wide range of methods which account for local variations in geographical properties. What's new in the Second Edition: Additional material on geographically-weighted statistics and local regression approaches A better overview of local models with reference to recent critical reviews about the subject area Expanded coverage of individual methods and connections between them Chapters have been restructured to clarify the distinction between global and local methods A new section in each chapter references key studies or other accounts that support the book Selected resources provided online to support learning An introduction to the methods and their underlying concepts, the book uses worked examples and case studies to demonstrate how the algorithms work their practical utility and range of application. It provides an overview of a range of different approaches that have been developed and employed within Geographical Information Science (GIScience). Starting with first principles, the author introduces users of GISystems to the principles and application of some widely used local models for the analysis of spatial data, including methods being developed and employed in geography and cognate disciplines. He discusses the relevant software packages that can aid their implementation and provides a summary list in Appendix A. Presenting examples from a variety of disciplines, the book demonstrates the importance of local models for all who make use of spatial data. Taking a problem driven approach, it provides extensive guidance on the selection and application of local models.

Liposome Technology, Second Edition, is an updated, expanded new edition of a classic volume in the field. It covers all aspects of liposome technology, including liposome preparation and analysis, drug entrapment, and techniques used for in vivo and in vitro evaluation of liposomes. Leading authorities have contributed 70 chapters to create what is destined to be the standard liposome technology book for the 1990s. Many of the chapters describe methodologies practiced in authors' laboratories and provide specific examples of how these methodologies are applied in specific circumstances. Liposome Technology, Second Edition will be an essential reference volume for academic and industrial researchers in pharmacology, pharmacy, medicine, biochemistry, and immunology. What's new in the 2nd Edition? The 2nd Edition covers significant developments in liposome technology that have occurred since the publication of the 1st Edition in 1982. These developments include the following: New preparative procedures Special approaches to accommodate the incorporation of certain drugs New targeting techniques Large scale production of liposomes, patents, and clinical trials
