Free Preview Data Transmission at Millimeter Waves - Exploiting the 60 ... The millimeter wave spectrum operates above the 24 GHz band, and, as you'd expect, it's great for superfast data transmission. But, as we mentioned earlier, the millimeter wave spectrum is prone to distortion. Think of the millimeter wave spectrum like a laser beam: it's precise and dense, but it's only capable of covering a small area. Not All 5G Is Equal: Millimeter Wave, Low-Band, and Mid ...
