Expanded and revised, the Second Edition of the Algebra Survival Guide unleashes its power for a new generation of students. Now that the Common Core Standards have changed how math is taught, this 2nd edition aligns its content to these broad new guidelines. The new Edition also adds advanced content. In its XTREME ALGEBRA section, the new edition tackles the topics of Functions,

Inequalities and the Advanced Coordinate Plane, and it teaches story problems in all three areas. These additions update the book for today's elementary and secondary students; they also provide additional support for adults taking algebra in their return to college. Plus, with its newly expanded index and glossary, the 2nd Edition makes all of its content easy to find. The book retains the cartoons, analogies and conversational format that brought out praise from all corners and garnered the book both a Parents Choice Commendation and a Golden Porch Award for pedagogical excellence.

 Richard Gray Problem solving is an
 indispensable part of learning a
 quantitative science such as
 neurophysiology. This text for graduate
 and advanced undergraduate students
 in neuroscience, physiology, biophysics,
 and computational neuroscience
 provides comprehensive, mathematically
 sophisticated descriptions of modern
 principles of cellular neurophysiology. It
 is the only neurophysiology text that
 gives detailed derivations of equations,
 worked examples, and homework
 problem sets (with complete answers).
 Developed from notes for the course
 that the authors have taught since 1983,
Foundations of Cellular Neurophysiology

covers cellular neurophysiology (also
 some material at the molecular and
 systems levels) from its physical and
 mathematical foundations in a way that
 is far more rigorous than other
 commonly used texts in this area.

Sharing our stories, who we are, what we love, how we feel, why we fear, connects us to one another. Weaving moments of grace with spiritual practices that have grounded her through life's challenges, Laurie Blefeld invites the reader into her sacramental stories. You will find yourself in Laurie's stories and reclaim bits and pieces of your own. "Our days are a stream of moments - some

devastating, some down to earth and some filled with ineffable meaning. Laurie Blefeld has written a book full of tender moments that warm the heart and remind us to be grateful for and conscious of how laced with grace our lives really are. This is a book to enjoy and treasure."-Gunilla Norris, author of Sheltered in the Heart and Companions on the Way: A Little Book of Heart-full Practices "Laurie's transformational stories, told in her authentic and lyrical voice, are evocative of the highs and lows in everyone's life. Laurie's generous prose connects us to her family's living history - and through it to our own. She is a natural spiritual teacher.
