**Happy Relationship** HarperCollins  
By a Booker Prize nominee and an  
internationally bestselling author: a  
captivating homage to Georges Simenon,  
an absorbing character study and a highly  
original detective story. Manfred Baumann  
is a loner. Socially awkward and  
perpetually ill at ease, he spends his  
evenings quietly drinking and  
surreptitiously observing Adèle Bedeau,  
the sullen but alluring waitress at a drab  
bistro in the unremarkable small French  
town of Saint-Louis. But one day, she  
simply vanishes into thin air. When

Georges Gorski, a detective haunted by his failure to solve one of his first murder cases, is called in to investigate the girl's disappearance, Manfred's repressed world is shaken to its core and he is forced to confront the dark secrets of his past. The Disappearance of Adèle Bedeau is a literary mystery novel that is, at heart, an engrossing psychological portrayal of an outsider pushed to the limit by his own feverish imagination.

With the premise that close relationships are subjected to extraordinary scrutiny in contemporary society, the authors go on to say that this generation values individual fulfilment more than any before us. We are able to leave existing relationships with relative ease, demand a high level of satisfaction from our intimate relationships, and are frustrated at those times when we fail to achieve it.; This volume presents a range Of Theoretical And Clinical Approaches To Understanding And Promoting relationship satisfaction. Integrating findings from social, clinical and counselling psychology, researchers illuminate what it means to be satisfied within a love relationship and identify the

factors that allow couples to create successful relationships over time.

Eugenics movements gained momentum throughout Eastern Europe between World Wars I and II. Maria Bucur demonstrates that the importance of the eugenics movement in Romania rests not so much in the contributions made to the study of science as in the realm of nationalist ideology and social policy making. The notion that the quality and quantity of the human species could and should be controlled manifested itself through social engineering projects ranging from reshaping gender roles and isolating ethnic undesirables to introducing broad public health measures and educational reform. Romanian eugenicists sought to control such modernization processes as urbanization and industrialization without curbing them, yet they also embraced attitudes more typically identified with anti-modernists in Romanian politics and culture. Bucur is the first historian to explore the role of eugenics as a response to the challenges of nation- and state-building in Eastern Europe. She presents a

balanced assessment of the interwar eugenics movement's success and failures and identifies connections and discontinuities between the movement and the post-war communist regime.

**Girls & Sex** Harvard University Press Islamic ideas about women and their role in society spark considerable debate both in the Western world and in the Islamic world itself. Despite the popular attention surrounding Middle Eastern attitudes toward women, there has been little systematic study of the statements regarding women in the Qur'an. Stowasser fills the void with this study on the women of Islamic sacred history. By telling their stories in Qur'an and interpretation, she introduces Islamic doctrine and its past and present socio-economic and political applications. Stowasser establishes the link between the female figure as cultural symbol, and Islamic self-perceptions from the beginning to the present time.

**Harrison's Principles of Internal Medicine** Routledge

Through a broad-ranging survey of the allegory, utopia, the historical novel and the epic in post-colonial literature, Jean-Pierre Durix proposes a critical reassessment of the theory of genres. He argues that, in the New Literatures which are often rooted in hybrid aesthetics, the often decried mimesis must be viewed from a completely different angle.

Analysing texts by Gabriel García Márquez, Salman Rushdie, Alejo Carpentier, Wilson Harris and Edouard Glissant, he pleads for the redefinition of 'magic realism' if the term is to retain generic relevance.
