Charles Cumming, lauded internationally as the successor to John le Carré, returns with his biggest, most ambitious thriller to date. Beginning in 1997, just as the British are about to re - turn Hong Kong to Chinese rule, Joe Lennox, a young opera tive for SIS (MI6), loses both his girlfriend and his first high profile asset—a prominent defector who disappears from a safe house. The girlfriend he lost to Miles Coolidge, a hard-bitten CIA agent; the asset to collusion between his bosses and the CIA. Over ten years later, during the run-up to the Beijing Olympics, Lennox is back in China, facing his old nemeses. With the CIA plotting to use an Islamic group to destabilize China, the SIS seeking to thwart them and his old asset the key to all of this, Joe Lennox, Miles Coolidge, and the girlfriend they shared are all hopelessly intertwined in a plot where trust is impossible and truth is unknowable. PLUS SPECIAL BONUS CONTENT: FIRST CHAPTER "SNEAK PEEK" OF CHARLES CUMMING'S THE TRINITY SIX. The most closely-guarded secret of the Cold War is about to be exposed - the identity of a SIXTH member of the infamous Cambridge spy ring. And people are killing for it... London, 1992. Late one night, Edward Crane, 76, is declared dead at a London hospital. An obituary describes him only as a 'resourceful career diplomat'. But Crane was much more than that - and the circumstances surrounding his death are far from what they seem. Fifteen years later, academic Sam Gaddis needs money. When a journalist friend asks for his help researching a possible sixth member of the notorious Trinity spy ring, Gaddis knows that she's onto a story that could turn his fortunes around. But within hours the journalist is dead, apparently from a heart attack. Taking over her investigation, Gaddis trails a man who claims to know the truth about Edward Crane. Europe still echoes with decades of deadly disinformation on both sides of the Iron Curtain. And as Gaddis follows a series of leads across the continent, he approaches a shocking revelation - one which will rock the foundations of politics from London to Moscow... "Cumming's novel is characterized by a gripping sense of realism. He displays a vast knowledge of spycraft and Cold War history, and the dense, three-dimensional world he crafts comes complete with seedy hotels and smoky nightclubs. The result is absolutely gripping. Taut, atmospheric and immersive—an instant classic." - Kirkus Reviews (starred review) on The Trinity Six The Trinity Six is a Kirkus Reviews Best of 2011 Thrillers title.

Für den Autokäufer entscheidet häufig schon der erste Blick auf ein Fahrzeug, ob er sich dafür oder dagegen entscheidet. Ausschlaggebend ist in diesem Fall die Formensprache, die sich über das Automobildesign vermittelt. Automobildesign und Technik beschreibt die Abhängigkeiten zwischen Formgebung und technischer Machbarkeit. Ohne ein vom Kunden akzeptiertes Außen- und Innendesign lässt sich ein Automobil schlecht verkaufen. Autoren sind die erfolgreichen Automobildesigner und die -techniker der großen Autoproduzenten. Sie zeigen die Lösungen zwischen technischen Zwängen, wie Aerodynamik, Produktion, Gesetzes- und Kundenanforderungen. Damit steht erstmals ein Werk zur Verfügung, das gleichzeitig die Welt des Designs und die Welt der Technik näher bringt.

This book is an authentic historical document, supported by extensive analytical information, in which former Fiat top manager Giorgio Garuzzo passionately recounts his experience within Fiat between 1976 and 1996. It is a narrative from the inside that sheds new light on events that have remained cloaked in mystery: the arrival and departure of Carlo De Benedetti, the "march of the forty thousand", the sacking of Vittorio Ghidella, the clashes between Umberto Agnelli and Cesare Romiti, the Group's involvement in the "clean hands" scandal, the role of Gianni Agnelli and his relationships with his brother and Cesare Romiti and the intervention of Mediobanca. Garuzzo discusses the issues connected with the range of cars and marques, touching on major themes of national or international relevance that were unrelated to Fiat but nonetheless conditioned its activities: terrorism and the unmanageability of the factories, inflation, the devaluation of the lira, the role of the trade unions and the General Confederation of Italian Industry, Japanese competition and European integration.

From the first motor cars and classic cars to today's supercars and Formula 1, this is the ultimate book about the history of the car. Packed with stunning photography, and featuring more than 2,000 cars, Car shows you how cars have evolved around the world over the the last 130 years, and their impact on society as objects of curiosity, symbols of status and luxury, and items of necessity.

Extensive catalogues showcase the most important marques and models, organized in categories such as sports cars, convertibles, and city compacts. The book also features virtual photographic tours of some of the most iconic cars from each era such as the Rolls Royce Silver Ghost, Ford Model T, Lamborghini Countach, and Ferrari F40, while cross-sections of key engines explore the driving force behind them. Lavishly illustrated feature spreads detail the stories of the men, machines, and magic that helped create the car world's most famous marques and made brands such as Porsche, Mercedes-Benz, Aston Martin, and Cadillac household names. If you love cars, then you'll love Car. It is simply a must-have title for all car enthusiasts.

Extracting maximum torque and horsepower from engines is an art as well as a science. David Vizard is an engineer and more aptly an engine building artist who guides the reader through all the aspects of power production and high-performance engine building. His proven high-performance engine building methods and techniques are revealed in this all-new edition of How to Build Horsepower. Vizard goes into extreme depth and detail for drawing maximum performance from any

automotive engine. The production of power is covered from the most logical point from the air entering the engine all the way to spent gasses leaving through the exhaust. Explained is how to optimize all the components in between, such as selecting heads for maximum flow or port heads for superior power output, ideal valvetrain components, realizing the ideal rocker arm ratios for a particular application, secrets for selecting the best cam, and giving unique insight into all facets of cam performance. In addition, he covers how to select and setup superchargers, nitrous oxide, ignition and other vital aspects of high-performance engine building.

In deciding which models to choose for inclusion in this book selected from Fiat's huge inventory, the author concentrated on three criteria - greatness, size and emotion. Where size is an easy parameter to qualify, greatness is more complicated because it is a combination of of both the manufacturer's and the public's opinion. A car that is highly regarded by the public may not have been a commercial success and vice versa. A truly great car is one that works well for both parties. Emotion may be considered to be an element of greatness in that the public's 'love' for a car is a fantastic benefit for a manufacturer and must be treasured. Fiat have made the mistake of 'improving' an icon on several occasions only to find that public opinion went against them. Fortunately Fiat has been magnanimous enough to respond by giving the car buying public more of what it wants. As long as they continue to do so then Fiat's reputation as the world's greatest small car manufacturer is set to continue. The author chose the Topolino as the starting point as the car fulfils all the criteria and it was the first Fiat built in the late 1930s to satisfy the Italian public's new-found desire for mobilisation. The old conventions of car production were turned upside down with the arrival of the 600 which revolutionised car production techniques and maximised on passenger space and performance at minimal cost. These principals continued via a succession of models which include the 500, 850, 126, 127 through to more recent models like the Cinquecento and

Seicento. Running in parallel with these 'cheeky' Fiats, this book covers a range of slightly larger cars that were built in huge numbers. Though rather staid in appearance, the 1950s Millecento was family transport for millions of Italians covering three decades, four when the Indian-built cars are included. Similarly the 128, Panda and Uno were 'the' Italian small cars of the '70s, '80s and '90s. Nuova Panda carries the banner to the present day.

This anthology brings together Nick's darker poems in his 20 years of writing. There are many

moods, topics, styles and poems here. Each tells a story. It's up to you, the reader, to judge the work here. The human condition is one of thoughts and emotions. How many of us have been hurt, depressed or angry in our own existence? Nick has experienced much in life; some of his experiences and views are here, in his work. Unlike most people, he writes and documents his life. A unique and varied book suitable for not only goths but everybody else. Welcome to Nick's dark yet creative world.
