Suppose, you have to appear for an exam next week, who would be the go-to person for seeking help and guidance? Option 1: A Subject Matter Expert (SME) who studying/teaching the subject for several years and often assumes while explaining that the basics are covered or looks it from their frame of reference. Or Option 2: Someone who also started from scratch as you have and passed the exam just last week. He/She knows the exact process, challenges, doubts, and roadblocks you may be facing and can think from your perspective. If your option is 2, you are in the right place. I am a Technology Consultant by profession, and started my leathercraft journey in the year 2014. I started by going through multiple YouTube videos, courses, Facebook groups, and finally completed my first project after four months. I was confused and was lost in the magnitude of information available online. I firmly believe that while starting, you need exact, necessary,

minimalistic information to start your first project, pardon: Complete your first project! So I started writing this book to provide a minimalistic approach to information required to start your first leather project. It covers: - History of leather - Basics Tools and their usage - Making Patterns - Cutting Patterns - Gluing - Beveling, Embossing, Stamping - Stitching basics - Coloring and Finishing - Tips, Techniques for the beginner -Leather Crafting, Physical Pain & Ergonomics * (New Chapter added!) - Appendix: List of online resources available for free patterns, tips, and techniques. I still remember the initial doubts I had and the tips which helped me. This book is for people who are in their first lap (0-3 years) of Leather crafting journey and want to have a holistic idea of processes, tools, and need help in their initial projects. I have included photographs of realistic projects of beginners explaining the process and standard operating procedure while starting. So, what are you waiting for? Get this updated edition of the book with 22 chapters and start your Leather Crafting Journey Today!!

There's never been a better time to be prepared. "This book is an indispensable basic manual for the real-life issues that await us in the decades to come. . . [A] treasure trove of practical wisdom."—James Howard Kunstler, author of *The Geography of Nowhere* Matthew Stein's comprehensive primer on sustainable living skills—from food and water to shelter and energy to first-aid and crisis-management skills—prepares you to embark on the path toward sustainability. But unlike any other book, Stein not only shows you how to live green in seemingly stable times, but to live in the face of potential disasters, lasting days or years, coming in the form of social upheaval, economic meltdown, or environmental catastrophe. When *Technology Fails* covers the gamut. Inside, you'll learn: The basics of installing a renewable energy system for your home or business How to find and sterilize water in the face of utility failure How to keep warm if you've been left temporarily homeless Practical information for dealing with water-quality issues Alternative health and first-aid techniques Each chapter describes skills for self-reliance in good times and bad. Chapters Include: A survey of the risks to the status quo Supplies and preparation for short- and long-term emergencies Emergency measures for survival Prepping water, food, shelter, and clothing First aid, low-tech medicine, and healing Securing energy, heat, and power Metalworking Utensils and storage Low-tech chemistry engineering, machines, and materials Fully revised and expanded, *When Technology Fails* ends on a positive, proactive note with a chapter on "Making the Shift to Sustainability," which offers practical suggestions for changing our world on personal, community and global levels.

A big part of the artisanal/DIY movement is about authenticity and quality, with a return to simplicity, real values, genuine materials, and careful craftsmanship. Leather is one of those authentic materials, and while it has always been used for handbags and gloves, it's also enjoying a resurgence in the field of crafts. Simple objects elegantly made of leather are featured everywhere on maker blogs, photo-sharing sites, tutorials, and craft marketplaces. Leather is in the real world, too, in heavily curated hipster boutiques and well-edited coffee shops that sell sundries. *Idiot's Guides®: Leather Crafts* offers 20 projects (illustrated with copious step-by-step photos), ranging from beginner to advanced, each one building on the skills that have been taught in prior projects. Unlike most existing books on leathercraft, which come with a heavy whiff of the '70s, this one has a sleek, modern aesthetic. The projects are functional, and the minimal, elegant embellishment and natural finishes will keep them timeless.
