How right-wing political entrepreneurs around the world use religious offense—both given and taken—to mobilize supporters and marginalize opponents. In the United States, elements of the religious right fuel fears of an existential Islamic threat, spreading anti-Muslim rhetoric into mainstream politics. In Indonesia, Muslim absolutists urge suppression of churches and minority sects, fostering a climate of rising intolerance. In India, Narendra Modi's radical supporters instigate communal riots and academic censorship in pursuit of their Hindu nationalist vision. Outbreaks of religious intolerance are usually assumed to be visceral and spontaneous. But in *Hate Spin*, Cherian George shows that they often involve sophisticated campaigns manufactured by political opportunists to mobilize supporters and marginalize opponents. Right-wing networks orchestrate the giving of offense and the taking of offense as instruments of identity politics, exploiting democratic space to promote agendas that undermine democratic values. George calls this strategy “hate spin”—a double-sided technique that combines hate speech (incitement through vilification) with manufactured offense-taking (the performing of righteous indignation). It is deployed in societies as diverse as Buddhist Myanmar and Orthodox Christian Russia. George looks at the

world's three largest democracies, where intolerant groups within India's Hindu right, America's Christian right, and Indonesia's Muslim right are all accomplished users of hate spin. He also shows how the Internet and Google have opened up new opportunities for cross-border hate spin. George argues that governments must protect vulnerable communities by prohibiting calls to action that lead directly to discrimination and violence. But laws that try to protect believers' feelings against all provocative expression invariably backfire. They arm hate spin agents' offense-taking campaigns with legal ammunition. Anti-discrimination laws and a commitment to religious equality will protect communities more meaningfully than misguided attempts to insulate them from insult.

The Ecology of Papua provides a comprehensive review of current scientific knowledge on all aspects of the natural history of western (Indonesian) New Guinea. Designed for students of conservation, environmental workers, and academic researchers, it is a richly detailed text, dense with biogeographical data, historical reference, and fresh insight on this complicated and marvelous region. We hope it will serve to raise awareness of Papua on a global as well as local scale, and to catalyze effective conservation of its most precious natural assets. New Guinea is the largest and highest tropical island, and one of the last great wilderness areas remaining on Earth. Papua, the western half of New Guinea, is noteworthy for its equatorial glaciers, its vast forested floodplains, its imposing central mountain range, its Raja Ampat Archipelago, and its several hundred traditional forest-dwelling societies. One

of the wildest places left in the world, Papua possesses extraordinary biological and cultural diversity. Today, Papua's environment is under threat from growing outside pressures to exploit its expansive forests and to develop large plantations of oil palm and biofuels. It is important that Papua's leadership balance economic development with good resource management, to ensure the long-term well-being of its culturally diverse populace.

The role of governance has only recently begun to be researched and discussed in order to better understand tourism policy making and planning, and tourism development. Governance encompasses the many ways in which societies and industries are governed, given permission or assistance, or steered by government and numerous other actors, including the private sector, NGOs and communities. This book explains and evaluates critical perspectives on the governance of tourism, examining these in the context of tourism and sustainable development. Governance processes fundamentally affect whether – and how – progress is made toward securing the economic, socio-cultural and environmental goals of sustainable development. The critical perspectives on tourism governance, examined here, challenge and re-conceptualise established ideas in tourism policy and planning, as well as engage with theoretical frameworks from other social science fields. The contributors assess theoretical frameworks that help explain the governance of tourism and sustainability. They also explore tourism governance at national, regional and local scales, and the relations between them. They assess issues of power and

politics in policy making and planning, and they consider changing governance relationships over time and the associated potential for social learning. The collection brings insights from leading researchers, and examines important new theoretical frameworks for tourism research. This book was originally published as a special issue of *Journal of Sustainable Tourism*.

This book is an anthology of Ahmad Tohari's fifteen short-stories that had appeared in countless newspapers between 1983 and 1997. Like his novels, his short-stories always have distinct characteristics. He always portrays the lives of the poor people or the low working class, with all their pain and struggles. Ahmad Tohari knew their lives well. As a result, he was able to weave the stories with a touching sympathy and empathy that can enrich the readers' mind.

In *The Interpretation of Cultures*, the most original anthropologist of his generation moved far beyond the traditional confines of his discipline to develop an important new concept of culture. This groundbreaking book, winner of the 1974 Sorokin Award of the American Sociological Association, helped define for an entire generation of anthropologists what their field is ultimately about.

Presently, many of the greatest debates and controversies in international criminal law concern modes of liability for international crimes. The state of the law is unclear, to the detriment of accountability for major crimes and of the uniformity of international criminal law. The present book aims at clarifying the state of the law and provides a thorough analysis of the jurisprudence of international courts and tribunals, as well as of the debates and the questions these debates have left open. Renowned international criminal law scholars analyze, in discrete chapters, the modes of liability one by one; for each mode they identify the main trends in the jurisprudence and the main points of controversy. An introduction addresses the cross-cutting issues, and a conclusion anticipates possible evolutions that we may see in the future. The research on which this book is based was undertaken with the Geneva Academy.

This (research) book highlights the unavoidable conversation engaging readers about the meaning and significance of Indonesian plays from the flights of Wayang and Brechtian strategy. The goal is, thus, to provide those willing to understand Indonesian plays with the necessary steps to go through. Not only are they invited to pay a visit to (world) literature, but they are also to deal with cultural studies, the dramatic text, and a critical vocabulary common to play analysis. Offering a response to such a compact goal, there are important things that need pointing out, namely, the elaboration of Wayang strategy and its application. This also suggests highlighting Brechtian strategy, the world of literature, Indonesian literature, Bahasa Indonesia (Indonesian language) and its roles within the national political affairs. This book is, thus, organized to discuss methods of play analysis which primarily means to find the meaning of the very plays, in this case the work of Arifin C. Noer.

There are so many different 'gospels' today, each presenting significantly different views about the Messiah (Who He is and what He has done), that clearly the questions which should be asked by everyone who professes to be a Christian (that is, a follower of Jesus Christ) are, "How will I know a false minister from a true one?" and "How can I know whether or not I have believed a false gospel or God's Gospel?" How is a man saved? How can we know if we are true Christians believing in the only Gospel that saves? What is God's only Gospel? Jesus Himself asked the religious leaders of His day, "...What think ye of Christ?..." (Matt. 22:42). These are vital questions about which every professing believer should be concerned. With all the lies that abound in our day concerning the Gospel and true salvation the question should not be whether we have faith but are we in THE Faith: "Examine yourselves, whether ye be in THE Faith..." (2 Cor. 13:5).

Understanding Indonesian Plays

Wayang and Brechtian Strategy

The book which was written and compiled from many sources was aimed to provide theoretical foundations to students who want to learn the arts and skills of translating. Since translation is both science and skills, understanding of the theories is beneficial before embarking on the translation project. This book, which was also drawn from the writer's personal research, also provides overview of relevant theories that translation students or translators need to justify their decision making. *Catatan pinggir 3* Abhinav Publications
Bibliography Index The Tantra Is A Body Of Theories, Techniques And Rituals Developed In India In Antiquity, Which Has Two Fundamental Aspects. The First Aspect Of The Tantra Is The Theory Of Creation, Which Posits That The Universe Has No Beginning And No End, And That All Its Manifestations Are Merely The Projections Of Divine Energy Of Its Creator. The Second Aspect Of The Tantra Is The Belief That The Performance Of Tantrik Techniques And Rituals Facilitates Access To This Divine Energy, Enabling Their Practitioners To Empower Themselves, As Well As Empower Others Associated With Them In The Guru-Disciple Relationship. Thus The Knowledge And Proper Application Of Tantrik Techniques And Rituals Is Believed To Harness The Creator'S Cosmic Energies To The Promotion Of The Mundane As Well As Spiritual Goals Of Their Practitioners. The Ecology of Sulawesi is a comprehensive ecological survey of one of Indonesia's least populated and most diverse islands. It is hoped that it will prove useful to resource managers, ecologists, environmental scientists and local government personnel, and be enlightening to Sulawesi's inhabitants and visitors. Sulawesi is one of the least-

known islands of Indonesia, and wise environmental management, including the proper assessment of environmental management, including the proper assessment of environmental impacts arising from development projects and other activities, is currently very difficult.

Child of All Nations Fanfare

In *Child of All Nations*, the reader is immediately swept up by a story that is profoundly feminist, devastatingly anticolonialist—and full of heartbreak, suspense, love, and fury. Pramoedya immerses the reader in a world that is astonishing in its vividness: the cultural whirlpool that was the Dutch East Indies of the 1890s. A story of awakening, it follows Minke, the main character of *This Earth of Mankind*, as he struggles to overcome the injustice all around him. Pramoedya's full literary genius is evident in the brilliant characters that populate this world: Minke's fragile Mixed-Race wife; a young Chinese revolutionary; an embattled Javanese peasant and his impoverished family; the French painter Jean Marais, to name just a few.

Corporate social responsibility (CSR) has become an increasingly heated topic since the 1980s. This title proposes that the concept of Corporate Social Irresponsibility (CSI) offers a better theoretical platform to avoid the vagueness, ambiguity, arbitrariness and mysticism of CSR.
