For many, a motorcycle bought at the beginning of the 1950s was a first taste of the freedom offered by personal transport. Although postwar austerity was fading, money was still tight and new machines virtually unobtainable, but there were plenty of cheap prewar machines around and an ex-War Department motorcycle could be bought from one of the big city dealers on the never-never; better still it would be sent to your local railway station. Ex-army dispatch riders' coats and boots would serve to keep the weather at bay as the new motorcyclists explored and enjoyed the quiet roads in a pre-motorway era. The decade would become a Golden Era of motorcycling as manufacturers brought new and excitingly advanced machines to an appreciative audience which had never even heard of a Japanese motorcycle. Motorcycle sport mushroomed in popularity at a time when you actually had to go to the race to see it and helped to reinforce the public's ever-growing enthusiasm for the motorcycle. The era would also see the arrival of the moped, scooter and bubblecar. For those that were there, Jeff Clew's insight to motorcycling of the '50s will provide a delightful nostalgic journey into the past, while those younger riders who cherish 1950s motorcycles today will discover a whole new dimension to their enjoyment of the machines.

Scooters and scootering are the fastest growing segment of the American motorcycling market. Because of their low cost, ease of operation, and unimposing nature, scooters are especially appealing to new riders. This book will provide the scooter owner with everything he or she needs to know. It will tell a person what kind of scooter to buy, how to buy it, and where to buy it. It will instruct the owner on maintaining and customizing his or her scooter. It will even help the scooterist find scooter-related events and activities. In sum, this is all the book any scooter owner will ever need.

The standard mode of transportation for decades in Europe, motor scooter was a cult "fun" vehicle in the USA until the past two years. With oil prices soaring and the 20-to-40 set looking for alternative means of commuter (and weekend cruising) travel, motor scooter have exploded across the United States. In 2001, less than 30,000 scooters cruised U.S. roadways. In 2005, over 100,000 are road-bound, and the number is growing by double digits each year. Beginning at \$1,000 and ranging up over \$5,000, dozens of models of scooters are available, as are thousands of accessories. And scooter clubs meet from San Diego to Bangor, Maine. Every year, the largest gathering of motor scooters takes place in Indianapolis, speed capital of the world. The Complete Idiot's Guide to Motor Scooters is the perfect introduction to the wonderful world of motor scooting. [Scooters](#) Causey Enterprises, LLC
