A book that became an instant classic when it first appeared in 1995, *Old Southern Apples* is an indispensable reference for fruit lovers everywhere, especially those who live in the southern United States. Out of print for several years, this newly revised and expanded edition now features descriptions of some 1,800 apple varieties that either originated in the South or were widely grown there before 1928. Author Lee Calhoun was one of the foremost figures in apple conservation in America. This masterwork reflects his knowledge and personal experience over more than thirty years, as

he sought out and grew hundreds of classic apples, including both legendary varieties (like Nickajack and Magnum Bonum) and little-known ones (like Buff and Cullasaga). Representing our common orchard heritage, many of these apples are today at risk of disappearing from our national table. Illustrated with more than 120 color images of classic apples from the National Agricultural Library's collection of watercolor paintings, *Old Southern Apples* is a fascinating and beautiful reference and gift book. In addition to A-to-Z descriptions of apple varieties, both extant and extinct, Calhoun provides a brief history of apple culture in the South, and includes practical information on growing apples and on their traditional uses.

As *The Giving Tree* turns fifty, this timeless

classic is available for the first time ever in ebook format. This digital edition allows young readers and lifelong fans to continue the legacy and love of a classic that will now reach an even wider audience. "Once there was a tree...and she loved a little boy." So begins a story of unforgettable perception, beautifully written and illustrated by the gifted and versatile Shel Silverstein. This moving parable for all ages offers a touching interpretation of the gift of giving and a serene acceptance of another's capacity to love in return. Every day the boy would come to the tree to eat her apples, swing from her branches, or slide down her trunk...and the tree was happy. But as the boy grew older he began to want more from the tree, and the tree gave and gave and gave. This is a tender story, touched with sadness, aglow with consolation. Shel

Silverstein's incomparable career as a bestselling children's book author and illustrator began with *Lafcadio, the Lion Who Shot Back*. He is also the creator of picture books including *A Giraffe and a Half*, *Who Wants a Cheap Rhinoceros?*, *The Missing Piece*, *The Missing Piece Meets the Big O*, and the perennial favorite *The Giving Tree*, and of classic poetry collections such as *Where the Sidewalk Ends*, *A Light in the Attic*, *Falling Up*, *Every Thing On It*, *Don't Bump the Glump!*, and *Runny Babbit*. And don't miss the other Shel Silverstein ebooks, *Where the Sidewalk Ends* and *A Light in the Attic! Narratives from the Nursery* Schiffer Publishing

*People Under Three* translates child development theory and research into everyday practice. The book also explores the difficult area of child protection and working with parents and children with a variety of problems. *People Under Three* is an established text for all those training to work with young children or managing day care facilities. This new edition has been completely updated to take account of the expansion and radical changes which have taken place in child care provision since the book was first published and includes new chapters on assessing the quality of care and short-term and intermittent care. *Moore's Rural New-Yorker Arrow/Children's* (a Division of Random House Group) Outlines simple but effective techniques for growing apples, plums, cherries, peaches, and other fruits on small trees that take up less space and require minimal care in home gardens.

There is more childcare available and more parents are using it, but it is not of higher quality and it is not more affordable. Psychologists are still asking whether children should be in daycare at all--today the particular concern is for young infants--and parents are still having trouble finding high-quality services. These problems will not be resolved anytime soon. There must be a concerted effort to educate all Americans--those in positions of power as well as those with young children--about the importance of good daycare. This book is dedicated to that effort.

Whether you want to plant a single fruit tree or an entire orchard, this book will show you how to save time and money and be successful right from the start. A professional orchardist, Susan Poizner guides novices and experts alike through every step of the process. She describes which key elements are necessary in site preparation and offers a basic overview of the anatomy of fruit trees. Originally published in 1991, this study uses the 1983 outbreak of Giardiasis in Luzerne County, Pennsylvania as a case study to explore the social costs of waterborne illnesses to a community. With over 6,000 people affected in that particular case, *Economics and Episodic Disease* emphasises the importance of Federal and State drinking water standards to protect the population from contamination whilst also commenting how regulations can be applied to other areas within public health as well as how to appraise the damage caused to surface water by the release of hazardous substances. This title will be of interest to students of Environmental Studies.
