NOAA Technical Memorandum CRCP 11. Identifies goals, objectives, and approaches to guide NOAA's research, management, and international cooperation activities on deep-sea coral and sponge ecosystems for fiscal years 2010 through 2019. Integrates research and conservation needs and is intended to be a flexible, evolving document that allows NOAA and its partners to address new management challenges and priorities as appropriate. The primary goal of this Strategic Plan is to improve the understanding, conservation, and management of deep-sea coral and sponge ecosystems.

Frugal Innovation Springer Nature The 2012 ASHRAE Handbook--HVAC Systems and Equipment discusses various systems and the equipment (components or assemblies) they comprise, and describes features and differences. This information helps system designers and operators in selecting and using equipment. An accompanying CD-ROM contains all the volume's chapters in both I-P and SI units.

"Jugaad Innovation is the most comprehensive book yet to appear on the subject [of frugal innovation]." —The Economist A frugal and flexible approach to innovation for the 21st century Innovation is a key directive at companies worldwide. But in these tough times, we can't rely on the old formula

that has sustained innovation efforts for decades—expensive R&D projects and highly-structured innovation processes. Jugaad Innovation argues the West must look to places like India, Brazil, and China for a new approach to frugal and flexible innovation. The authors show how in these emerging markets, jugaad (a Hindi word meaning an improvised solution born from ingenuity and cleverness) is leading to dramatic growth and how Western companies can adopt jugaad innovation to succeed in our hypercompetitive world. Outlines the six principles of jugaad innovation: Seek opportunity in adversity, do more with less, think and act flexibly, keep it simple, include the margin, and follow your heart Features twenty case studies on large corporations from around the world—Google, Facebook, 3M, Apple, Best Buy, GE, IBM, Nokia, Procter & Gamble, PepsiCo, Tata Group, and more—that are actively practicing jugaad innovation The authors blog regularly at Harvard Business Review; their work has been profiled in BusinessWeek, MIT Sloan Management Review, The Financial Times, The Economist, and more Filled with previously untold and engaging stories of resourceful jugaad innovators and entrepreneurs in emerging markets and the United States This groundbreaking book shows leaders everywhere why the time is right for jugaad to emerge as a powerful business tool in the West—and how to bring jugaad practices to their organizations.

John Wiley & Sons

With growing international business, small and medium-sized enterprises (SMEs) have been faced with increased

competition, but also with enhanced opportunities. Edith Olejnik addresses four major issues within the context of SMEs' internationalization process: First, she identifies the three different internationalization patterns that SMEs take and analyzes how these patterns develop over time. Second, she looks at dynamic changes of foreign operation modes and the managerial reasons for these changes. Third, she derives an empirical classification of smaller family firms and profiles them using a comprehensive set of organizational variables. Fourth, she investigates the relationship between firm-level processes and dynamic capabilities in driving the international performance of SMEs. Based on theoretical considerations and empirical analyses this work provides important implications for research and management practice.

A Solo Walk Across Iceland Springer
Global growth for 2018–19 is projected to remain steady at its 2017 level, but its pace is less vigorous than projected in April and it has become less balanced. Downside risks to global growth have risen in the past six months and the potential for upside surprises has receded. Global growth is projected at 3.7 percent for 2018–19—0.2 percentage point lower for both years than forecast in April. The downward revision reflects surprises that suppressed activity in early 2018 in some major advanced economies, the negative effects of the trade measures implemented or approved between April and mid-September, as well as a weaker outlook for some key emerging market and developing economies arising from country-specific factors, tighter financial conditions, geopolitical tensions, and higher oil import bills. The balance of

risks to the global growth forecast has shifted to the downside in a context of elevated policy uncertainty. Several of the downside risks highlighted in the April 2018 World Economic Outlook (WEO)—such as rising trade barriers and a reversal of capital flows to emerging market economies with weaker fundamentals and higher political risk—have become more pronounced or have partially materialized. Meanwhile, the potential for upside surprises has receded, given the tightening of financial conditions in some parts of the world, higher trade costs, slow implementation of reforms recommended in the past, and waning growth momentum.

History of the Ontario Regiment (RCAC), 1866-2016 Springer

This book presents beautiful full color art of ten of the most amazing unbuilt streamlined auto projects of the interwar era, including a torpedo-like race car with periscopes; teardrop passenger cars; rocket-powered winged autos; Harry Miller's LSR dream car; an aircraft-like three-wheel GP car; and a pair of futuristic Nazi record vehicles.

Dead Lies Dreaming Stanford University Press

This book provides a philosophically informed, institutionalist account of political leadership. It is rooted in a certain version of the American pragmatist philosophical tradition and privileges the study of institutions as a cause of leadership outcomes. The book adopts a multi-method approach. It includes a laboratory experiment identifying the psychological effects of presidentialism and parliamentarism on leader behavior; a large-n statistical study of the impact of semi-presidentialism on voter choice; an expert survey of president/cabinet conflict in Europe; an analysis of

presidential control over cabinet composition in France; and two in-depth case studies of the circumstances surrounding constitutional choice in France and Romania. This book is aimed at scholars and students of political leadership, political institutions, the philosophy of the social sciences, and research methods. Overall, it shows that an institutional account has the potential to generate well-settled beliefs about the causes of leadership outcomes.

World Architecture Tordotcom
Analysing developments in digital technologies and institutional changes, this book provides an overview of the current frenetic state of transformation within the global automobile industry. An ongoing transition brought about by the relocation of marketing, design and production centres to emerging economies, and experimentation with new mobility systems such as electrical, autonomous vehicles, this process poses the question as to how original equipment manufacturers (OEMs) and newcomers can remain competitive and ensure sustainability. With contributions from specialists in the automobile sector, this collection examines the shifts in power and geographical location occurring in the industry, and outlines the key role that public policy has in generating innovation in entrepreneurial states. Offering useful insights into the challenges facing emerging economies in their attempts to grow within the automobile industry, this book will provide valuable reading for those researching internationalization and emerging markets, business strategy and more specifically, the automotive industry.

This book sheds new light on the role of the military in Italian society and culture during war and peacetime by bringing together a whole host of contributors across the interdisciplinary spectrum of Italian Studies. Divided into five thematic units, this volume examines the continuous and multifaceted impact of the military on modern and contemporary Italy. The Italian context offers a particularly fertile ground for studying the cultural impact of the military because the institution was used not only for defensive/offensive purposes, but also to unify the country and to spread ideas of socio-cultural and technological development across its diverse population.

A Pragmatic Institutional Approach McGraw Hill Professional
'A BRILLIANT TRIBUTE TO A BRILLIANT MAN.' BOOK OF THE MONTH - CLASSIC AND SPORTS CAR --- A celebration of the extraordinary life of legendary commentator Murray Walker, with tributes from key figures in Formula 1 and motorsport. Murray Walker was the voice of Formula One, matching the thrill of the track with his equally fast-paced and exhilarating commentary, delivering the euphoria of motor racing to millions. Commentating on his first grand prix for the BBC at Silverstone in 1949, Murray's broadcasting career spanned over fifty years. His natural warmth and infectious enthusiasm won great affection with audiences, whilst his passion and knowledge of motorsport allowed him to hone his instinctive presenting style into a craft. When Murray passed away in March 2021, tributes came flooding in

from every corner of the sporting world. This book, compiled by Murray's great friend and colleague Maurice Hamilton, celebrates the extraordinary life of this truly legendary man. With contributions from drivers and industry figures, and many friends from the world of motorsport and beyond, Incredible! combines fond memories, never-before-told stories and famous Murrayisms with reflections on the highlights of a life lived at full throttle.

Investigator Kjartan's investigation of the murders of a cryptographer with ties to a medieval manuscript and a victim mutilated in a Viking tradition embroils him in a world of legend and symbology in his search for the killer.

Ten Amazing Unbuilt Automobile Designs, 1916-1939 OUP Oxford

The rapid takeoff of the continent-sized national economies and the increasing expense of extraction have led to strong tensions in petrol prices and a race towards alternative driving systems. This book analyses the emergence of a second automobile revolution through the trajectories of automobile firms since the nineties.

Mechanization for Rural Development Springer

Romania Army, National Security and Defense Policy Handbook

2012 ASHRAE Handbook Kogan Page Publishers

This is a carefully developed work focused on the analysis of supply chain interaction issues in emerging markets and industry sectors. It is a leading-edge

handbook that will emphasize areas of study where, thus far, little work has been done and where the "rubber meets the road" - the supply chain process, information, and systems integration. These are pertinent issues facing practitioners and researchers in today's business environment. This is a gap-bridging handbook that analyzes interaction issues from both the research and practitioner sides. The result is a volume that examines and provides practical solutions on interaction issues while being firmly grounded in research principles.

Packed with spectacular superlatives, shocking stats, fantastic facts and fun figures, Science and Stuff celebrates the simple joy in finding things out. What can cats teach us about the laws of physics? Why was cabbage banned on the International Space Station? (Can you fart in space?) And would a penny dropped from the Empire State Building really kill someone? (Short answer: No!) But it's not all facts and stats. The feature chapter just for Makers, introduced by our very own mad professor Burnaby Q. Orbax, challenges you to attempt record-breaking science experiments at home, from the fastest Mentos & Soda rocket car to the most slime thrown and caught in a minute! Join us as we rise from the deepest depths of the ocean, where weird glowing fish hunt in the darkness, to the mountaintop observatories where scientists unravel the secrets of the universe.

A History of Classical Greek Literature

Prabhat Prakashan

Semi-Presidentialism is the term used to describe the constitutional arrangement where there is a directly elected president and a prime-minister who is responsible to parliament. Examples of semi-presidential regimes include Finland, France, Portugal, Poland, Russia, and Ukraine. These countries share certain constitutional features, but the exercise of presidential and prime-ministerial power varies greatly from one to another. Semi-Presidentialism in Europe examines the politics of semi-presidentialism and explores why it is that seemingly similar political systems operate in such different ways.

Furthermore, the book examines the constitutional powers of political leaders, the role of political parties and the importance of past precedent.

Frugal innovation is a way that

companies can create high-quality products with limited resources. Once the preserve of firms in poor markets, Western companies are now seeking ways to appeal to cost-conscious and environmentally-aware consumers at home. With an estimated trillion-dollar global market for frugal products, and with potentially huge cost savings to be gained, frugal innovation is revolutionizing business and reshaping management thinking. This book explains the principles, perspectives and techniques behind frugal innovation, enabling managers to profit from the great changes ahead. The book explains: How to achieve mass customization, using low-cost robotics, inexpensive product design and virtual prototyping software. How consumers and other external partners can help develop products How to implement sustainable practices, such as the production of waste-free products How to change the corporate culture to become more frugal
