Semiconductor —I. • Materials that permit flow of electrons are called conductors (e.g., gold, silver, copper, etc.). • Materials that block flow of electrons are called insulators (e.g., rubber, glass, Teflon, mica, etc.). • Materials whose conductivity falls between those of conductors and insulators are called semiconductors. Basic Electronics - NYU Tandon School of Engineering This course covers the fundamentals of Electrical and Electronic Engineering. Most of the topics in this course would be covered on any level 3 Engineering programme, particularly if your studies are electrically biased. Level 3 Fundamentals of Electrical and Electronic Engineering engineering teams having different areas of expertise. Therefore, a basic understanding of electronic circuits will allow the mechanical engineer to evaluate whether or not a given electrical specification is reasonable and feasible. The following text is designed to provide an efficient introduction to electronic circuit design. Fundamentals of Electronic Circuit Design Fundamentals of Digital Circuits - A.
