Many nonprofits never take full advantage of their board members. Extraordinary Board Leadership: The Keys to Governing deals with an incredibly important topic - "high-impact governing" - which is at the heart not only of a nonprofit's effectiveness, but also the key to a positive, productive,

and enduring board-CEO partnership. This text offers practical, hands-on guidance, which is based on in-depth real-life experience and can be put to immediate use. It goes beyond the old-fashioned "policy governance" approach - beyond the rules - in dealing with the board-CEO-executive staff partnership. The 2nd edition of this successful book includes more case studies and new information aimed at public governing bodies, as well as more tables and charts to accompany a fresh new text design. *Advanced Aerospace Materials* John

Over one million copies sold! A baseball fan learns the true meaning of success in this beloved classic that will capture the imaginations of a new generation of young readers. Sylvester loves baseball, but he isn't exactly what you'd call a good hitter. Even though he wants nothing more than to join his neighborhood team, the Hooper Redbirds, he's sure he'll never do anything more than warm the bench. But then he meets the mysterious Mr. Baruth who promises to make Sylvester one of the best players ever. Suddenly, Sylvester goes from the worst player on the team to the kid who can only hit homers. With his overnight success, however, come tough questions. Will Sylvester ever learn the true meaning of

teamwork? And what will happen when he has to learn to stand on his own? This beloved story about baseball, confidence, perseverance, and being a good teammate is a modern classic and sure to win over a new generation of young sports fans.

Digital Logic Cambridge University Press

An exciting new, full-colour edition of Face Reading in Chinese Medicine featuring over 200 colour photographs and practical instructions on how to conduct a face reading! Face reading has been part of Traditional Chinese Medicine for many centuries, and Professor Lillian Bridges is a popular academic and international lecturer on the subject who gained her fascinating knowledge through her family line of

Master Face Readers in China. Based on an understanding of the shapes, markings and features of a face, practitioners can learn about the health and life of a patient relating to the principles of Chinese medicine. In addition to understanding how the body's internal functions - physical, psychological and emotional - can be seen on a face, practitioners can also learn how to evaluate Shen to understand non-verbal expressions. Technical and detailed information is presented in an upbeat, insightful and highly readable manner. This was the first book to focus on the deeper aspects of face reading and diagnosis, this edition includes ancient Taoist knowledge regarding the Original Face and Facial Jing and Qi markers which

have previously only been taught through the oral tradition. Clear discussions demonstrate how this technique can be used as a supplement to other diagnostic tools in Traditional Chinese Medicine. Engaging, insightful, highly readable text is written by a well-known and experienced lecturer in the field. Extensive illustrations give you a clear understanding of theories and techniques. A focus on the deeper aspects of face reading and diagnosis helps readers become more conscious of their actions, reactions, and the health consequences of behavior.

Discipline Without Distress Springer Science & Business Media

In this book, the authors address the concepts and terminology that are needed to apply advanced control

techniques in the process industry. The book is written for the process or control engineer that is familiar with traditional control but has little or no experience in designing, installing, commissioning and maintaining advanced control applications. Each chapter of the book is structured to allow a person to quickly understand the technology and how it is applied. Application examples are used to show what is required to address an application. Also, a section of each chapter is dedicated to a more in-depth discussion of the technology for the reader that is interested in understanding the mathematical basis for the technology. A workshop is provided at the end of each chapter that explores the technology. The reader may view the workshop solution by going to

the web site that accompanies the book. The book provides comprehensive coverage of the major advanced control techniques that are most commonly used in the process industry. This includes tools for monitoring control system performance, on-demand and adaptive tuning techniques, model predictive control, LP optimization, data analytics for batch and continuous processes, fuzzy logic control, neural networks and advancements in PID to use with wireless measurements. Since many readers may work with an existing DCS that does not support advanced control, a chapter of the book is dedicated to tools and techniques that the authors have found useful in integrating advanced control tools into an existing control system. Also, one

chapter of the book addresses how dynamic process simulations may be easily created in a DCS to support checkout and operator training on the use of advanced control.

Hassell Street Press

Live the life God planned for you Know the love He has for you And live out the dreams He gave you! Every girl has the potential to live an extraordinary life and this gorgeous little book wants to celebrate just that! Girls, "Live Love Dream" is for you! From self-image to sharing the gospel with friends, discover what the Bible has to say, and what God has in store for you, every day. 60 days devotionals for girls aged 1-15 years. Extracts from popular YPs series 2011/2012

Cross-Cultural Considerations in the Education of Young Immigrant Learners
IGI Global

During last decade significant progress has been made in the oil industry by using soft computing technology. Underlying this evolving technology there have been ideas transforming the very language we use to describe problems with imprecision, uncertainty and partial truth. These developments offer exciting opportunities, but at the same time it is becoming clearer that further advancements are confronted by fundamental problems. The whole idea of how human process information lies at the core of the challenge. There are already new ways of thinking about the problems within theory of perception-based information. This theory aims to

understand and harness the laws of human perceptions to dramatically improve the processing of information. A matured theory of perception-based information is likely to be properly positioned to contribute to the solution of the problems and provide all the ingredients for a revolution in science, technology and business. In this context, Berkeley Initiative in Soft Computing (BISC), University of California, Berkeley from one side and Chevron-Texaco from another formed a Technical Committee to organize a Meeting entitled "State of the Art Assessment and New Directions for Research" to understand the significance of the fields accomplishments, new developments and future directions. The Technical Committee selected and invited 15 scientists (and oil industry

experts as technical committee members) from the related disciplines to participate in the Meeting, which took place at the University of California, Berkeley, and March 15-17, 2002.

Extraordinary Board Leadership

Little, Brown Books for Young Readers

* This information-rich reference book provides solutions to the architectural problem of vibrations in beams, arches and frames in bridges, highways, buildings and tunnels * A must-have for structural designers and civil engineers, especially those involved in the seismic design of buildings * Well-organized into problem-specific chapters, and loaded with detailed charts, graphs, and necessary formulas

Applications and Design Newnes

You understand the basic concepts of

game design: gameplay, user interfaces, core mechanics, character design, and storytelling. Now you want to know how to apply them to the strategy game genre. This focused guide gives you exactly what you need. It walks you through the process of designing for the strategy game genre and shows you how to use the right techniques to create fun and challenging experiences for your players.

The Keys to High-impact Governing New Riders

Using circuit diagrams, PCB layouts, parts lists and clear construction and

installation details, this book provides everything someone with a basic knowledge of electronics needs to know in order to put that knowledge into practice. This latest collection of Maplin projects are a variety of power supply projects, the necessary components for which are readily available from the Maplin catalogue or any of their high street shops. Projects include, laboratory power supply projects for which there are a wide range of applications for the hobbyist, from servicing portable audio and video equipment to charging batteries; and miscellaneous projects such as a split charge unit for use in cars or similar vehicles when an auxiliary battery is used to power 12v accessories in a caravan or trailer. Both useful and innovative, these projects are above all

practical and affordable.

 Expert Oracle RAC 12c is a hands-on book helping you understand and implement Oracle Real Application Clusters (RAC), and to reduce the total-cost-of-ownership (TCO) of a RAC database. As a seasoned professional, you are probably aware of the importance of understanding the technical details behind the RAC stack. This book provides deep understanding of RAC concepts and implementation details that you can apply toward your day-to-day operational practices. You'll be guided in troubleshooting and avoiding trouble in your installation. Successful RAC operation hinges upon a fast-performing network interconnect,

and this book dedicates a chapter solely to that very important and easily overlooked topic. All four authors are experienced RAC engineers with a wealth of hard-won experience encountering and surmounting the challenges of running a RAC environment that delivers on its promise. In Expert Oracle RAC 12c they provide you a framework in which to avoid repeating their hard-won lessons. Their goal is for you to manage your own RAC environment with ease and expertise. Provides a deep conceptual understanding of RAC Provides best practices to implement RAC properly and match application workload Enables readers to troubleshoot RAC with ease What you'll learn Know when to apply RAC, and when not to Design

applications to take advantage of RAC

The rapid growth in online and virtual
learning opportunities has created
culturally diverse university classes and
corporate training sessions. Instruction
for these learning opportunities must

adjust to meet participant needs. Cross-Cultural Considerations in the Education of Young Immigrant Learners brings together professional discourse regarding best practices, challenges, and insights on both higher education and corporate training settings. This book is a vital instrument for instructional designers, faculty, administrators, corporate trainers, students and researchers interested in design and facilitation of online learning for a global audience.

This work has been selected by scholars as being culturally important and is part of the knowledge base of civilization as we know it. This work is in the public domain in the United States of America,

and possibly other nations. Within the United States, you may freely copy and distribute this work, as no entity (individual or corporate) has a copyright on the body of the work. Scholars believe, and we concur, that this work is important enough to be preserved, reproduced, and made generally available to the public. To ensure a quality reading experience, this work has been proofread and republished using a format that seamlessly blends the original graphical elements with text in an easy-to-read typeface. We appreciate your support of the preservation process, and thank you for being an important part of keeping this knowledge alive and relevant.

Fin & Lady Apress

In the Greenwich Village of 1964, eleven-

year-old Fin moves in with his glamorous, careless older sister, and it's hard to tell who's raising whom.

Face Reading in Chinese Medicine - E-Book Advanced Control Foundation Tools, Techniques and Applications

In the first comprehensive and unflinching overview of the erotic initiation and sexual sorcery essential to the mysterious magical tradition known as the 'Left Hand Path', this complete guide covers an enormous array of taboo and previously forbidden practices. Penetrating the veil of secrecy and obscuring the ecstasies and dangers of a way of magic that can be a powerful instrument of psychic transmutation, this is a sometimes disturbing, always inspiring study of the shadow side of eros.

Fundamentals of Traffic Engineering Pws Publishing Company

Proceedings of the Second Bath International Fluid Power Research Workshop held in September 1989.

Contributors address recent developments in the control of valves, pump design and performance, pressure ripple and noise, servo-systems, modelling and simulation and circuits for mobile systems.

Power Supply Projects Research Studies Press Ltd

Progress in understanding skin diseases has been aided enormously by the use of tissues derived from animals, by studying normal processes in animals, and by the development of animal models. The cellular activities in animals and humans are remarkably similar and

the actual pathological process of an inflammatory skin disease can only be accurately observed and analyzed in a living animal model, and not in any in vitro model system. These factors have led to the regular use of animal tissues and models to allow the disease processes to be studied at a much greater depth. *Animal Models of Human Inflammatory Skin Diseases* features the principles and practices of how to go about studying inflammatory skin diseases using live animal models. On the principle side, the book describes the comparative structure and function of the skin, and the comparative immunology system in animal species commonly used as models. From the practical perspective, it presents a general discussion on methods of

experimental animal modeling and contains specific expert experience on individual models. The authors include a detailed method of disease induction for each model, present chapters on comparative histology and immunology, and discuss potential targets of disease intervention. Written by biomedical investigators with first-hand experience in their chosen fields, this book is a valuable guide and reference for investigators in the biomedical and pharmaceutical sciences. It provides an instantaneous comparison between the skin structure and immunology of humans and animals, aiding in the interpretation and application of pathologic and immunologic findings. Engineering Metrology & Instrumentation Professional Parenting

"You still roller skate?" This is the age-old question that skaters hear each time they mention this passionate pastime. The truth is, skating never ceased. The Evolution of Skating: It's Our Expression, Volume IV, follows skaters from around the globe: Tyrone Dixon, Liliana Monique Ruiz, Wanda Brown, Rickey Davis, Joe Bowen, Denise Wesley, aka DanceLegz, Ron Butts, aka G. Whiz, Odis "O.D." Rowlett, Ash Fahrenheit, Jaclyn Duncan, Jody Allen, Lionel Laurent, Naimah Cyprian, aka Xstra, Nicholas Moore, Derrick Johnson, Christopher Morales, Cristina Bauer, Harry Gaskin, Toure Clark, Victor Smith, Marilyn Coleman, aka Socks, Haleigh Gross, April Guillory, aka Black Diamond, and Angie McClendon as they share their tales of discovery, growth, inspiration, and

passion of when they fell in love with roller skating and the impact it has had on their lives. Enjoy a twisting ride into the gritty underground of the sport and take a peek into the deep, passionate, and sometimes personal world of this artistic, vibrant, and seldom understood historical pastime and culture known as roller skating.

Demons of the Flesh Routledge Provides a clear, concise, and self-contained introduction to Computational Fluid Dynamics (CFD) This comprehensively updated new edition covers the fundamental concepts and main methods of modern Computational Fluid Dynamics (CFD). With expert guidance and a wealth of useful techniques, the book offers a clear, concise, and accessible account of the

essentials needed to perform and interpret a CFD analysis. The new edition adds a plethora of new information on such topics as the techniques of interpolation, finite volume discretization on unstructured grids, projection methods, and RANS turbulence modeling. The book has been thoroughly edited to improve clarity and to reflect the recent changes in the practice of CFD. It also features a large number of new end-of-chapter problems. All the attractive features that have contributed to the success of the first edition are retained by this version. The book remains an indispensable guide, which: Introduces CFD to students and working professionals in the areas of practical applications, such as mechanical, civil, chemical, biomedical, or environmental

engineering Focuses on the needs of someone who wants to apply existing CFD software and understand how it works, rather than develop new codes Covers all the essential topics, from the basics of discretization to turbulence modeling and uncertainty analysis Discusses complex issues using simple worked examples and reinforces learning with problems Is accompanied by a website hosting lecture presentations and a solution manual Essential Computational Fluid Dynamics, Second Edition is an ideal textbook for senior undergraduate and graduate students taking their first course on CFD. It is also a useful reference for engineers and scientists working with CFD applications. *A Novel* W. W. Norton & Company Discipline that you and your child will

feel good about! At last, a positive discipline book that is chock-full of practical tips, strategies, skills, and ideas for parents of babies through teenagers, and tells you EXACTLY what to do “in the moment” for every type of behavior, from whining to web surfing. Parents and children today face very different challenges from those faced by the previous generation. Today’s children play not only in the sandbox down the street, but also in the World Wide Web, which is too big and complex for parents to control and supervise. As young as age four, your children can contact the world, and the world can contact them. A strong bond between you and your child is critical in order for your child to regard you as their trusted advisor. Traditional discipline methods no longer work with

today’s children, and they destroy your ability to influence your increasingly vulnerable children who need you as their lifeline! Spanking and time-outs do not work. You need new discipline tools! Help your child gain:

- Strong communication skills for school, career, and relationship success.
- Healthy self-esteem, confidence, and greater emotional intelligence.
- Assertiveness, empathy, problem-solving, and anger-management skills.
- A respectful, loving connection with you!

You will gain:

- An end to resentment, frustration, anger, tears, and defiance in your parent-child relationship.
- Tools to respectfully handle most modern challenging parenting situations, including biting, hitting, tantrums, bedtimes, picky eating, chores, homework, sibling wars,

smoking, "attitude," and video/computer games. · Help for controlling your anger "in the moment" during those trying times. · A loving, respectful, teaching and fun connection with your child! "Offers a wealth of ideas and suggestions for raising children without the use of punishment of any kind." Linda Adams, President and CEO of P.E.T. Parent Effectiveness Training and Gordon Training International "The world is in desperate need of gentle, caring discipline techniques. Judy Arnall has created a wonderful, nurturing guide

that all parents can benefit from." Elizabeth Pantley, Author of The No-Cry Solution series of books. "Parents always prefer to be loving but often don't know how. Arnall's book debunks all the old beliefs about discipline through painful measures such as punishment, consequences or bribes and provides far more effective and kind ways to raise well behaved and thriving children." Naomi Aldort, Ph.D., Author of Raising Our Children, Raising Ourselves BONUS! 50-page quick reference tool guide included
