Waxmann Verlag  
 Fraud and Education gives an informative overview of cheating in examinations in the U.S. and foreign countries and of the current state of fraud in education and research. It differs however, from many popular treatises on the same subject, in that it is not intended as a blanket condemnation of American (or foreign) education. Instead of assigning blame for the prevalence of fraud, the authors point to such factors as growth in the number of persons engaged in education and research, pressures on individuals to succeed,

improvements in communications (especially the Internet and e-mail), and in techniques of document reproduction.

The rise and fall of the British Empire profoundly shaped the history of modern Scotland and the identity of its people. From the Act of Union in 1707 to the dramatic fall of the British Empire following the Second World War, Scotland's involvement in commerce,

missionary activity, cultural dissemination, emigration, and political action could not be dissociated from British overseas endeavours. In fact, Scottish national pride and identity were closely associated with the benefits bestowed on this small nation through its access to the British Empire. By examining the opinions of Scots towards the empire from numerous professional and personal backgrounds, Scotland emerges as a nation inextricably linked to the British Empire. Whether Scots categorized themselves as proponents, opponents, or victims of empire, one conclusion is clear: they maintained an abiding interest in the empire even as it

rapidly disintegrated during the twenty-year period following the Second World War. In turn, the end of the British Empire coincided with the rise of Scottish nationalism and calls for Scotland to extricate itself from the Union.

Decolonization had a major impact on Scottish political consciousness in the years that followed 1965, and the implications for the sustainability of the British state are still unfolding today.

Thomas Toren

experienced more horror, loss, and change in his life than most. When he was just six, his mother was arrested for Rassenschande and imprisoned by the Nazis. Young Thomas would not see her again until he was almost thirty. He did not know who his father was, and the man who raised him was cold and distant. His older half-sister grew up to be an unkind, egotistical person who betrayed him and his beloved wife, Lisa. He was born in Berlin in 1931. He was expelled from two German primary schools because of his stepfather's Jewish surname. From age seven, he was raised by two women in the Russian immigrant community of Harbin,

China, where he finished a Russian high school at the top of his class. Having spent his formative years there and suspecting that his biological father was either Russian or Polish, Toren considers himself Russian. This all seemed perfectly normal to the young man. Toren's explanation: children accept everything as normal. Only in hindsight, after acquiring some life experience and wisdom, are we able to understand and analyse our childhood. To escape the Soviet bloc, he managed to travel to Israel, where he married his lifelong love, Lisa. In these transitions, a bit of stability emerged. Toren had a long, successful career as a qualified

mechanical engineer and brilliant inventor. Now retired, Toren felt the urge to record the stories of his unusual life, during which he has experienced four cultures and observed many more. He's called Europe, Asia, the Middle East, and Australia home at various times of his life. These intercontinental movements were not by choice; they were imposed as a result of political upheavals of the twentieth century. Toren knows that life was not meant to be easy. Wishing and hoping is not enough. Determination and perseverance are essential. A bit of luck also helps. Life has taught Toren an important lesson. He says: We should learn to fully appreciate each

one of our many blessings, which we normally take for granted. We tend to fully appreciate our blessings only in retrospect, after we have lost them! "

*Chinese Perspectives from Hong Kong, Taiwan and Mainland China* Pearson South Africa

In the context of outcomes-based school governance, statewide exit exams are often expected to have a positive effect on student achievements if schools and teachers use the performance feedback from the exams for school, instructional, and professional development.

However, very little is known about whether the exams are used for development at all and

how this is affected by factors in the exam system and organizational aspects of schools. In a comparison of Finland, Ireland, and the Netherlands, the study therefore investigates how different exam systems and their functions, the conditions at school level, and the use of the exams for school and classroom development are associated. The study uses expert interviews and a questionnaire survey with principals and teachers. The role statewide exit exams can play in education systems is analyzed from a governance perspective and a school development perspective and discussed with an international comparative view.

Esther Dominique Klein, born in 1982, Dr. phil., is research assistant at the Faculty of Educational Sciences of the University of Duisburg-Essen. Her main research interests lie in the areas of school system and school development research and international comparative education.
