Alfred Music Publishing
Earth Day celebrates our beautiful planet and calls us to act on its behalf. Some people spend the day planting flowers or trees. Others organize neighborhood clean-ups, go on nature walks, or make recycled crafts. Readers will discover how a shared holiday can have multiple traditions and be celebrated in all sorts of ways.

Band Today Routledge
Messages, Signs, and Meanings can be used directly in introductory courses in semiotics, communications, media, or culture studies. Additionally, it can be used as a complementary or supplementary text in courses dealing with cognate areas of investigation (psychology, mythology, education, literary studies, anthropology, linguistics). The text builds upon what readers already know intuitively about signs, and then leads them to think critically about the world in which they live - a world saturated with images of all kinds that a basic knowledge of

semiotics can help filter and deconstruct. The text also provides opportunities for readers to do "hands-on" semiotics through the exercises and questions for discussion that accompany each chapter. Biographical sketches of the major figures in the field are also included, as is a convenient glossary of technical terms. The overall plan of the book is to illustrate how message-making and meaning-making can be studied from the specific vantage point of the discipline of semiotics. This third edition also includes updated discussions of information technology throughout, focusing especially on how meanings are now negotiated through such channels as websites, chat rooms, and instant messages.

Getting someone to tell the truth is an essential skill that very few people possess. In the boardroom, classroom, or our own homes, every day we interact with others and try to get the truth from them. People are often untruthful out of fear of negative consequences associated

with divulging information. But if a person is made to forget the long-term outcomes of lying, he or she can be influenced to disclose sensitive information that's being withheld. The aim is to encourage the person to remain in short-term thinking mode, shifting focus away from the long-term ramifications of telling the truth. As former CIA agents and bestselling authors of *Spy the Lie*, Philip Houston, Mike Floyd, and Susan Carnicero are among the world's best at detecting deceptive behavior and eliciting the truth from even the most accomplished liars. *Get the Truth* is a step-by-step guide that empowers readers to elicit the truth from others. It also chronicles the fascinating story of how the authors used a methodology Houston developed to elicit the truth in the counterterrorism and criminal investigation realms, and how these techniques can be applied to our daily lives. Using thrilling anecdotes from their careers in counterintelligence, and with easy-to-follow instructions, the authors provide a foolproof means of getting absolutely

anybody to give an honest answer. Get the Truth is the easy and effective way to learn how to get the truth every time.

Santa Barbara Research Center Cambridge University Press

One man's dream spawned a company that impacted the way we see our world even today. The roots of Santa Barbara Research Center were established when founder Dave Evans set up radio communications for the round-the-world flight of infamous Howard Hughes. Dave went to work for Hughes, became head of the Hughes Aircraft Electronics Department, then struck out on his own with an ambitious vision. Gathering superior talent, Dave and five men pulled together to build something deemed impossible, a daylight star tracker for navigation. The journey was not easy, but their innovations produced instruments and results that were ultimately in high demand by United States defense forces and NASA's space explorations. The family of Santa Barbara Research Center bonded and thrived, supporting our country through several war efforts, the Space age, the Cold War, and beyond. For over fifty

years, SBRC provided the technologies for star navigation, for soldiers to see at night, for astronomers to peer into deep space, and for tracking world-wide weather. Eventually, big business interests and a political train wreck led to the death of a dream and the disbursement of technical genius and talent that could never be recaptured. This is our story.

NATIONAL BESTSELLER •

For anyone who wants to learn a foreign language, this is the method that will finally make the words stick. "A brilliant and thoroughly modern guide to learning new languages."—Gary Marcus, cognitive psychologist and author of the New York Times bestseller *Guitar Zero* At thirty years old, Gabriel Wyner speaks six languages fluently. He didn't learn them in school—who does? Rather, he learned them in the past few years, working on his own and practicing on the subway, using simple techniques and free online resources—and here he wants to show others what he's discovered. Starting with

pronunciation, you'll learn how to rewire your ears and turn foreign sounds into familiar sounds. You'll retrain your tongue to produce those sounds accurately, using tricks from opera singers and actors. Next, you'll begin to tackle words, and connect sounds and spellings to imagery rather than translations, which will enable you to think in a foreign language. And with the help of sophisticated spaced-repetition techniques, you'll be able to memorize hundreds of words a month in minutes every day. This is brain hacking at its most exciting, taking what we know about neuroscience and linguistics and using it to create the most efficient and enjoyable way to learn a foreign language in the spare minutes of your day. *Fluent Forever* Albert Whitman & Company Air conditioning in vintage cars often falls into disrepair, as owners figure that it never really worked all that well when it was new, and assume that rejuvenation would be prohibitively expensive. In his new book, *Just Needs a Recharge: The Hack Mechanic Guide to Vintage Air Conditioning*, Rob Siegel details exactly

what's needed to resurrect long-dead air conditioning in a vintage car, or install a/c in a car that never had it. In a level of detail not found in any other automotive a/c book, Rob reveals what you need to know about flare and o-ring fittings, upgrading to a rotary-style compressor and a parallel-flow condenser, making or specifying custom hoses, and selecting refrigerant so that the a/c blows cold enough to be usable. Although the book draws from Rob's BMW experience (with specifics for the BMW 2002 and 3.0CS), and concentrates on vintage a/c systems (those that have flare fittings and originally contained R12), most of the information applies to any air conditioning system, foreign or domestic, vintage or modern. Written in Rob's entertaining Hack Mechanic narrative voice, and including 240 photographs and illustrations, the book covers theory, the choice of refrigerant (R12, R134a, other EPA-approved, non-EPA-approved), legality, tools for a/c work, fittings and sizes, the compressor, the evaporator assembly and expansion valve or orifice

tube, the condenser and fan, the receiver/drier or accumulator, electrical connections and compressor cycling, connecting and using manifold gauges, the basic steps for a/c rejuvenation, from-scratch a/c retrofit, making and installing hoses, flushing the system, pressure-testing and leak detection, evacuating and charging the system troubleshooting, and other things that heat up the cabin.

Human Rights and Intellectual Property

AuctionCore
Written by a practicing emergency physician, *The White Coat Investor* is a high-yield manual that specifically deals with the financial issues facing medical students, residents, physicians, dentists, and similar high-income professionals. Doctors are highly-educated and extensively trained at making difficult diagnoses and performing life saving procedures. However, they receive little to no training in business, personal finance, investing, insurance, taxes, estate planning, and asset protection. This book fills in the gaps and will teach you to use your high income to escape from

your student loans, provide for your family, build wealth, and stop getting ripped off by unscrupulous financial professionals. Straight talk and clear explanations allow the book to be easily digested by a novice to the subject matter yet the book also contains advanced concepts specific to physicians you won't find in other financial books. This book will teach you how to: Graduate from medical school with as little debt as possible
Escape from student loans within two to five years of residency graduation
Purchase the right types and amounts of insurance
Decide when to buy a house and how much to spend on it
Learn to invest in a sensible, low-cost and effective manner with or without the assistance of an advisor
Avoid investments which are designed to be sold, not bought
Select advisors who give great service and advice at a fair price
Become a millionaire within five to ten years of residency graduation
Use a "Backdoor Roth IRA" and "Stealth IRA" to boost your retirement funds and decrease your taxes
Protect your hard-won assets from professional

and personal lawsuits
 Avoid estate taxes, avoid probate, and ensure your children and your money go where you want when you die Minimize your tax burden, keeping more of your hard-earned money
 Decide between an employee job and an independent contractor job
 Choose between sole proprietorship, Limited Liability Company, S Corporation, and C Corporation
 Take a look at the first pages of the book by clicking on the Look Inside feature
 Praise For The White Coat Investor
 "Much of my financial planning practice is helping doctors to correct mistakes that reading this book would have avoided in the first place." - Allan S. Roth, MBA, CPA, CFP(R), Author of How a Second Grader Beats Wall Street
 "Jim Dahle has done a lot of thinking about the peculiar financial problems facing physicians, and you, lucky reader, are about to reap the bounty of both his experience and his research." - William J. Bernstein, MD, Author of The Investor's Manifesto and seven other investing books
 "This book should be in every career counselor's office and delivered with every medical degree." - Rick

Van Ness, Author of Common Sense Investing
 "The White Coat Investor provides an expert consult for your finances. I now feel confident I can be a millionaire at 40 without feeling like a jerk." - Joe Jones, DO
 "Jim Dahle has done for physician financial illiteracy what penicillin did for neurosyphilis." - Dennis Bethel, MD
 "An excellent practical personal finance guide for physicians in training and in practice from a non-biased source we can actually trust." - Greg E. Wilde, M.D

Mapping the Global Interface Springer

Do you drive with stress and frustration? Do you frequently complain about other drivers or get involved in hostile interactions with other motorists? Are you afraid for your teenage drivers in this climate of highway warfare? We're in the midst of an escalating epidemic of aggressive driving, which eats up 250 billion dollars a year in economic cost and causes the misery associated with 6 million injuries every year. Now the government has declared war on road rage with tough new laws that can

land people in jail for behaviors they're used to doing every day. Traffic psychology educators Dr. Leon James and Dr. Diane Nahl trace the aggressive driving problem to its roots in childhood when child passengers imbibe their parents' aggressiveness towards other motorists and their cynicism towards regulations and the law. By the time teenagers begin to drive they've been exposed to years of media portrayals of the fun and excitement of aggressive driving with no serious consequences. The authors argue that road rage and aggressive driving are common traffic emotions experienced by the vast majority of drivers. This authoritative book-the first to synthesize the subject of aggressive driving-presents conclusions of recent studies, highlights citizen activism, and summarizes legislative and police initiatives. Besides vivid anecdotal evidence and personal stories of typical road rage incidents that we have all experienced, James and Nahl present self-tests that readers can use to estimate their own road rage tendency, and they prescribe activities to help every driver learn

self-improvement and self-awareness skills behind the wheel. The authors outline their innovative three-step program to help people transform themselves from aggressive to supportive drivers. This book redefines driver education for all drivers, including commercial drivers and truckers. Our traffic emotions need to be trained, the authors stress, and they provide the explanations and activities needed to strengthen critical thinking about road events. Leon James, Ph.D. (Honolulu, HI), the nation's foremost authority on road rage and aggressive driving, is frequently quoted in the nation's press and has raised the standard of discussion on this topic. His expert testimony at congressional hearings in July 1997 helped legislators to realize that aggressive driving is a cultural problem. Diane Nahl, Ph.D. (Honolulu, HI), is associate professor of Information and Computer Sciences in the Library and Information Science Program at the University of Hawaii and is the founder of the new field of Driving Informatics. Dr. Nahl and Dr. James have authored the

RoadRageous aggressive-driving video course, which is used in driving schools and court-mandated traffic violator schools. They're also active in aggressive-driving prevention training for law enforcement, and their Web site at DrDriving.org provides services for older drivers, commercial drivers, and teen drivers. *Em Choi (I Play)* CarTech Inc

For undergraduate and graduate courses in global marketing The excitement, challenges, and controversies of global marketing. Global Marketing reflects current issues and events while offering conceptual and analytical tools that will help students apply the 4Ps to global marketing. MyMarketingLab for Global Marketing is a total learning package. MyMarketingLab is an online homework, tutorial, and assessment program that truly engages students in learning. It helps students better prepare for class, quizzes, and exams—resulting in better performance in the course—and provides educators a dynamic set of tools for gauging individual and class progress.

Scholars' Press

The thrilling, long-awaited return of the #1 New York Times bestselling author of *The Revenant* In 1866, with the country barely recovered from the Civil War, new war breaks out on the western frontier—a clash of cultures between the Native tribes who have lived on the land for centuries and a young, ambitious nation. Colonel Henry Carrington arrives in Wyoming's Powder River Valley to lead the US Army in defending the opening of a new road for gold miners and settlers. Carrington intends to build a fort in the middle of critical hunting grounds, the home of the Lakota. Red Cloud, one of the Lakota's most respected chiefs, and Crazy Horse, a young but visionary warrior, understand full well the implications of this invasion. For the Lakota, the stakes are their home, their culture, their lives. As fall bleeds into winter, Crazy Horse leads a small war party that confronts Colonel Carrington's soldiers with near constant attacks. Red Cloud, meanwhile, wants to build the tribal alliances that he knows will be necessary to defeat the soldiers. Colonel Carrington seeks to hold

together a US Army beset with internal discord. Carrington's officers are skeptical of their commander's strategy, none more so than Lieutenant George Washington Grummond, who longs to fight a foe he dismisses as inferior in all ways. The rank-and-file soldiers, meanwhile, are still divided by the residue of civil war, and tempted to desertion by the nearby goldfields. Throughout this taut saga—based on real people and events—Michael Punke brings the same immersive, vivid storytelling and historical insight that made his breakthrough debut so memorable. As *Ridgeline* builds to its epic conclusion, it grapples with essential questions of conquest and justice that still echo today.

Modern Mandarin Chinese Grammar Workbook

Henry Holt and Company
This book explores the interface between intellectual property and human rights law and policy. The relationship between these two fields has captured the attention of governments, policymakers, and activist communities in a diverse array of international and domestic political and judicial venues. These

actors often raise human rights arguments as counterweights to the expansion of intellectual property in areas including freedom of expression, public health, education, privacy, agriculture, and the rights of indigenous peoples. At the same time, creators and owners of intellectual property are asserting a human rights justification for the expansion of legal protections. This book explores the legal, institutional, and political implications of these competing claims: by offering a framework for exploring the connections and divergences between these subjects; by identifying the pathways along which jurisprudence, policy, and political discourse are likely to evolve; and by serving as an educational resource for scholars, activists, and students.

Global Marketing, Global Edition McGraw Hill Professional

There is a Haynes manual for most popular domestic and import cars, trucks, and motorcycles. By conducting complete tear-downs and rebuilds, the Haynes staff has discovered all the problems owners will find in rebuilding or repairing their vehicle.

Documenting the process in hundreds of illustrations and clear step-by-step instructions makes every expert tip easy to follow. From simple maintenance to trouble-shooting and complete engine rebuilds, it's easy with Haynes. *Saar Sloddervos* Dell Saar is een echte sloddervos. Haar kamer is een grote puinhoop. On 31 August 2008, Sister Jesme left the Congregation of Mother of Carmel. The authorities repeated attempts to have her declared insane, she says, left her no other option. This book, a first of its kind in India, is an outpouring of her experiences as a nun for thirty-three years. Spirited and fun-loving, from a good family, deeply-rooted in Catholicism, Jesme was drawn to religious life at seventeen after a Retreat at junior college. As a nun, seven years later, she felt distressed at the many ills growing inside the

convent and being forced to remain silent about them. There was corruption, by way of donations for college seats; sexual relations between some priests and nuns, and between nuns; class distinctions whereby the cheduthies, or poorer and less-educated sisters, did menial jobs; and a wide gap between comforts and facilities enjoyed by the priests and nuns. Jesme was permitted to complete her doctorate in English Literature, to pursue her passion for literature, cinema and teaching college students. She exposed them to classic films, believing that aesthetics enhances spirituality. But these joys were clouded by the troubles she faced. Searing, sincere, and sensitive, Amen is a plea for a reformation of the Church and comes at a time of its growing concern about nuns and priests. It affirms Jesme's unbroken spirit and faith in Jesus and the Church, living like a nun, but outside the Four Walls of the convent.

The Art and Science of Design Management Penguin UK
Poetry. WELCOME LIGHT straddles the earth's hemispheres while charting experiences contemplative and peripatetic, bucolic and

urban, and metaphysical and scientific. Paul Kane evokes his predecessor--Joseph Brodsky, Robert Frost, Pushkin, and others--as only a mature poet of wide experience, keen sensitivity, and deep knowledge can. Poems lyric and narrative and elegiac and ecstatic escort us through past and present, east and west, and the earthly and the celestial. The mournful and the celebratory resonate together in fresh, lucid English translations of Hafiz.

How Human Resources Can Create Value and Impact Business Strategy St. Martin's Press
This book examines how to optimize design management processes in order to produce innovation within organizations. It first looks at how to harvest a culture of design and then examines topics specific to product and service design. Individual chapters provide anecdotes drawn from leading design-oriented firms, and best practices based on cutting-edge, scientific research. This book's unique blend of theory and application will offer students, scholars, and managers valuable insight on how

organizations can
revolutionize their design

processes and leverage
their approach to create

groundbreaking products
and services.
