Composite Figures MOVIE THEATERS

One of the largest movie theater screens is in St. Louis, Missouri. The 500-seat theater houses a 60-foot by 80-foot movie screen that is nearly twice the size of a traditional movie theater screen.

1. Suppose the theater owners find the perimeter of a composite figure. We can see that 5 is 2 higher than 3 so we know that 2 is being added. To find the answer, add 2 to 7. 2 quarters + 7 quarters is 9 quarters. Step 4 Check Check that the difference between 9 quarters and 7 quarters is 2 quarters. $9 - 7 = 2$ Your answer is correct. Use any strategy to solve. Tell which strategy you used.
