Tuned Dipole Antenna
RadioThe 3048 Tuned
Dipole Antenna
provides continuous
tuning for transceivers
that use multiple
frequencies. It is
designed to withstand

extreme environmental
and physical
conditions. The
antenna tunes its four
4.8 m dipole elements
to a VSWR less than
1.5:1 over the whole
range of 2.5 to 30 MHz.
The antenna is3048
Tuned Dipole Antenna -
HistoryThe 3048 Tuned
Dipole is a HF antenna
solution designed for
base station use.
Codan's 3048 antenna
system comprises a
main tuner unit and
antenna element
assembly mounted on
top of a 6 m mast. A
control cable and
coaxial cable run down
from the tuner unit to
an interface box
mounted at the base of
the mast. The interface
box provides
connection points for
the transceiver
antenna control, RF
cables and ground
connection.3048 Tuned

ROMANCE ACTION & ADVENTURE MYSTERY &3048 Tuned Dipole Antenna Radio Codan - 1x1px.meFirst, cut the dipole slightly longer to 7.1 MHz. $L(\text{feet}) = 468 / F(\text{MHz})$ or $L = 468 / 7.1 = 65.9155$ feet for our example. Raise the antenna up in the air to its final position. Next, with a MFJ-269 antenna analyzer, find the frequency with the lowest SWR. For this example say the frequency is 7.044 MHz which is way below the 7.2 MHz we would like

it to be. Tuning a Dipole | Moore County Amateur Radio Society Tuning a Dipole Antenna for Resonance! Find a Ham Radio Dipole Resonant Length. Most dipoles will require a little "trimming or adding" to resonate at the desired frequency. Here is a good recommendation in 7 steps. 1. Cut your dipole wire some 2-3 % longer than the length given by the standard formula. 2. Building and Tuning A Dipole The Easier Way - HAM RADIO Access Free 3048 Tuned Dipole Antenna Radio Codan 3048 Tuned Dipole Antenna Radio Codan Right here, we have countless book 3048 tuned dipole antenna radio codan and collections to check out. We additionally

give variant types and also type of the books to browse. 3048 Tuned Dipole Antenna Radio Codan Trimming a dipole antenna refers to the adjustment of antenna length to operating frequency. The total length of the dipole should be just under one-half wavelength for the operating band. (See Shack Talk, Your First Dipole Antenna for information on calculating approximate dipole lengths.) When the dipole is properly trimmed for an operating ...
