This application manual uses Excel to connect typical business mathematics topics to real-world applications--yet, mastery of Excel is not needed! Excel templates are supplied for a series of business math topics typically covered in an introductory business mathematics course.

Each template is accompanied by a brief review of the math concepts dealt with in the exercises. The projects are designed to help students

understand the mathematics of the topic and, at the same time, discover the power of the spreadsheet as applied in business.

Born in the Bronx to Greek immigrant parents, George Lois left art school in his sophomore year and ultimately landed in the advertising

department at CBS. He joined Doyle Dane Bernbach as an art director in 1959, immediately establishing himself as the talented enfant terrible of the American advertising industry. He left to start his own agency, Papert Koenig Lois, in 1961, where his seminal ads for such products as Smirnoff vodka and Coty cosmetics established him as a media darling as well as a master of the provocative sell. In October 1962 he began designing covers for Esquire magazine, among them the famed Andy Warhol shot, Muhammad Ali as St Sebastian (1967), and Claudia Cardinale, in a transparent vinyl dress, straddling a motorcycle (1966).

The Mathematics of Money: Math for Business and Personal Finance covers all the traditional topics of the business math course, but with a more algebraic focus than

many of the texts currently on the market. The text develops a solid understanding of percent and interest early, then applies that foundation to other applications in business and personal finance. While it is appropriate for students of all levels, the book takes the approach that even if students are coming into the class with only high school math, neither they nor the instructor need to be afraid of algebra; it takes care to clearly present and reinforce the formulas given and to consistently return to them and apply the material to contexts that are relevant to the students.
